Thread: [\[SRC\]Noob Manager...Task Manager](#)

The_KGB - August 30, 2010, 6:03 pm

Okay, this is a random program that I made a while back.

It is a very very simple task manager that maybe a few people could learn off of.

Maybe someone can make it really cool and all that jazz.

My Noob code screenshot:

[\[IMG\]http://img837.imageshack.us/img837/2471/noobcode.jpg\[/IMG\]](#)

Uploaded with [ImageShack.us](#)

Main screen:

[\[IMG\]http://img291.imageshack.us/img291/2193/scrnsst.jpg\[/IMG\]](#)

Uploaded with [ImageShack.us](#)

It Running:

Looks interesting. Youve got me into wanting to start the controller for my rat now but I need to wait off on it. Decisions Decisions....

btw, you got some wonky shit going on in taskmanager I think.. That many open browsers means to me that chrome dosent have tabs, which would suck balls, or that a rat is injecting into your browser for a firewall bypass and it has a crappy coded persistence on the file..

Might be good to learn a few things from thanks man!

The_KGB - *August 30, 2010, 9:47 pm*

your welcome...yea, chrome starts a new process for each tab, it is supposed to be more "crash friendly".
