Thread: [\[Ideas\] Need Some Ideas! \[Ideas\]](#)

BraydenTimbery - August 31, 2010, 10:30 am

Okay, so I'm going to develop a new application, I'm not too sure what I'm going to call it yet.

I'm thinking of making an all in one with loads of different tools.

Here's what I've come up with so far:

- + String Encryption.
- + Junk Cleaner.
- + Secure File Eraser.
- + Login System (Password settings).
- + Theme (Should I have changeable themes).
- + Text Editor (Programmer functions?).
- + File Tools (Pumper, Encrypt?).
- + YouTube Download?

So yeah, I do need some ideas, please help!

Credits will be given!

?

JohnRonder - August 31, 2010, 10:34 am

Evry single one of those "tools" have a source on HackForums, just go through the Vb.net section and you'll find all the help you need :)

BraydenTimbery - August 31, 2010, 10:39 am

No, I don't need source code help, I can code all of the above, but I need ideas to include in my new application to make it worthwhile.

187Modz - August 31, 2010, 11:15 am

penis enlarger? joking :)

Icy Wind - August 31, 2010, 11:19 am

Text reader which reads/saves text on images (Kinda like a Captcha one).

Tabby - August 31, 2010, 11:47 am

Just find a source.

then make a Good GUI

BraydenTimbery - August 31, 2010, 12:42 pm

People, I don't need sources!

Penis enlarger lol!

IcyWind, your suggestion is a good one, I'll be considering it!

ubbelol - August 31, 2010, 12:43 pm

JustAnotherAIO?

Too many of these "multi tools" already.. made by people just stuffing in random sources they find

on the internet.
