If you sell unlimited shoutcast servers for \$10 then every radio station in the world would move to you. No longer interested. 'unlimited' doesn't exist.

Yeah, unlimited listeners but it still has a bandwidth limit. Why wouldn't it exist?

Please, don't try to ruin my sales.

You are the one who is fucking lying. DON'T POST UNLIMITED, IT DOESN'T EXIST. You heard of the "?" sign? It means infinity. It is a non-real number because you cannot possibly hit that. If you have a bandwidth limit, mention it. Don't hide it from people.

**proXace™** - September 1, 2010, 11:18 pm

Can I haz a setup for free pl0x???

I can vouch.

Okay well i'm sorry if i was unclear, unlimited listeners but still a bandwidth limit :)

Added to the first post!
