I-Doser talk is coming.

Here it is.

http://download.cnet.com/I-Doser/3000-2054_4-10396009.html - Download for the I-Doser program.

<http://www.mediafire.com/?3b6w6e6d177xeht> - The drug files (They are in .drg)

A lot of you are going to be disappointed.

Learn about it before trying it.

1. Lay down.
2. Turn off anything causing noises.
3. Turn off the lights.
4. Make sure you have headphones, and put them on.
5. Act like you are sleeping, think about nothing.
6. Don't move around or open your eyes.

THIS THREAD IS OVER 2 YEARS OLD. JUST GOT BUMPED.

Troxin - August 31, 2010, 5:30 pm

Bumping this up maybe if I can?

Shout - August 31, 2010, 5:31 pm

What does it do :o? Make you fall asleep?

Troxin - August 31, 2010, 5:32 pm

It makes you a retarded 12 year old who thinks he just got high.

Dude this shit will fuck you up. But make sure your parents aren't around when you try it. They had me take a drug test. I failed and I haven't done drugs my whole life. I would use this with caution.

Im going to say that iDoser honestly works(not trolling). If you just lay down and relax the stronger ones really take an effect on you

Topper - August 31, 2010, 6:28 pm

I've done a ton of these, and none worked... but inhalants scared the shit outta me haha

The nitrous one worked really well. After the dose I couldn't walk straight..

Ive tried pretty much all of them. I really wanted them to work but they didn't. I'm going to try hands of god or gates of hades tonight I guess. Does the experience go on before or after? I hate how a bunch of idiots on youtube make videos and the experience last for like 1 second during the end of the track where they freak out.

Most of the time the effect kicks in about 2-10 min after starting. On the marijuana one it worked almost immediately. On the morphine it took 10 min but then it worked pretty good

I actually listen to the gates of hades WHEN IM WORKING and its just like makes me un-coordinated lol. i like it
