I suggest you to remove Hacking from everywhere. Otherwise this topic is going to get closed and you won't be able to advertise your site on HF anymore.

Omniscient Wrote:HF has strict policies against advertising of "competing forums" this means any hacker related forum with categories that are similar to the ones in the existing Hacking tab will get deleted and the member warned for advertising. To clarify you also cannot advertise such forums in your profile, posts, or PM. You will get banned for doing so.

You ain't allowed to advertise competing hacking forums on here.

Also, it's a really shitty domain. Doesn't even sound 'hackerish'.

Advertising of competing forums is not allowed. Please read the rules.

And also, as I can see you copied Hack Forums forums/categories and descriptions.
