**ariton** - September 4, 2010, 3:27 pm

So i wan't a good signature. The signature can be at any color and with the size of a regulary signature. The signature should contain:My name (neccesary)

HackForums.net HF.Net HF (you're choice)

DaVa (you're choice)

The only way to enter the contest is by posting the signature and his upoad link.

Good Luck!

What image do you want in the signature? I am in the mood for some photoshop :D

**ariton** - September 5, 2010, 11:32 am

Must have a random size of a normal signature. Try to make the best signature, and nevermind the colors. Try to find the best ones to win your award!

didn't get what you meant by "random" size. unless you mean that the background is transparent, and the actual image itself isn't in a square formation, I can do all that too.

those are a pretty good idea, they look a little pixelated though, if you smoothed up the edges I think they would look pretty cool man :)

No problem man, I like the curved edge on it, and you stuck to the theme of the picture with the text, it's good.

**ariton** - September 6, 2010, 2:58 pm
