Thread: [The best way to validate Windows 7 \[TUT\]](#)

Obi-Wan Cannabis - September 4, 2010, 6:15 pm

Windows 7 Loader

The best way to validate your pirated Windows 7 is to use a loader.

The best loader you can find is called Windows 7 Loader.

Spoiler ([Click to View](#))

[img]http://www.taelimseeya.com/files/attach/images/2788/632/004/Windows_7_Loader_by_Daz.jpg
[/img]

About

This is the loader application thats used by millions of people worldwide, well known for passing Microsoft's WAT (Windows Activation Technologies) and is arguably the safest Windows activation exploit ever created. The application itself injects a SLIC (Software Licensing Description Table) into your system before Windows boots, this is what fools Windows into thinking it's genuine.

Features

- Can be run as a standalone application
- Works well with all system languages
- Argument support for silent installs
- Can be used for pre-activation Application integrity checking
- Custom error handling
- Support for hidden partitions and complex setups
- Can work alongside Linux's GRUB or any other boot manager
- Works with TrueCrypt and many other types of hard drive encryption applications
- Add your own certificates and serials externally
- Offers certificate and serial installation only for users with an existing SLIC 2.1
- Automated system profiling (The application matches everything up for you)

The rundown

- This will run on x86 and x64 systems ? check
- This can activate all Windows versions at the same time, just install it on each ? check
- No core system files get modified ? check
- No extra processes are run so you have nothing eating at your RAM ? check
- All key parts of the exploit are encrypted with a custom encryption ? check
- The exploit runs before Windows so it's harder for Microsoft to prevent ? check The exploit patches all necessary tables making activation look authentic ? check
- The application will select the best profile for your system during installation ? check
- Each and every user has a unique version of the exploit installed on his/her system ? check

Versions it works with:

- Windows 7 Ultimate Windows 7 Professional
- Windows 7 Home Premium Windows 7 Home Basic

Windows 7 Starter Windows Vista Ultimate
Windows Vista Business Windows Vista Business N
Windows Vista Home Premium Windows Vista Home Basic
Windows Vista Home Basic N Windows Vista Starter
Windows Server 2008 R2: Enterprise Windows Server 2008 R2: Standard
Windows Server 2008 R2: Foundation Windows Server 2008: Enterprise
Windows Server 2008: Standard Windows Server 2008: Foundation
Windows Small Business Server 2008

Note: You must be running build 7600 or greater for Windows 7 and Windows Server 2008 R2.
Note: Windows 7 N and E editions will only be supported when OEM SLP serials leak for them editions.

No one needs to activate Windows 7?

-mothered- - September 4, 2010, 9:39 pm

Good tut there mate. The only thing that's missing, Is the actual activation process, with documentation and screenshots provided as a guidance.

Apart from that, a nice tutorial that'll be sure to help many.

Nice to read that you posted the credits too.

No problem at all mate.
Appreciate the contribution :)

zIFuLLILeTe - September 8, 2010, 9:20 pm

this really works.. i just tried on my friends laptop and it WINS..)
Thanks for the share mate..

Thanks for the share mate..
No problem!?

I'm here to help!

Greed™ - September 9, 2010, 2:40 am

wait you mean you don't need an activation key with this?

Obi-Wan Cannabis - September 9, 2010, 2:57 am

How can I explain? No! ^^)

Greed™ - September 9, 2010, 3:06 am

oh i understood now thanks for the share

Obi-Wan Cannabis - September 9, 2010, 3:16 am

No problem man! ?

Thanks for reading! xD

ShoXor - September 9, 2010, 11:08 am

I have some legit windows 7 keys, but everytime I have to rebuild my pc, I have to phone activate which is super annoying. Definitely going to try this out next time.

vizzy - September 9, 2010, 11:23 am

Can't one of these topics be made a sticky or something? to stop a new topic about activating windows appear every day?

poohead - September 9, 2010, 12:20 pm

Top quality mate keep it up. Very good.

EDIT: LOL I just clicked the link and got a access denied error. Ive never had that before!

Grift. - September 9, 2010, 1:48 pm

Thank you very much! My Windows 7 said it was counterfeit a few months ago so I tried an activator and removing the WAT but neither fixed it completely. I even tried entering a product key but it wouldn't let me. Then I tried this, just pressed install, waited for the restart and activated it on Microsoft's website and now it's working perfectly so thank you very much!

By the way 1 of the links is broken, the mods.myftp one.

Obi-Wan Cannabis - September 9, 2010, 2:09 pm

Glad it worked for you!

Thanks by telling me about the broken link! ?

RANA - December 9, 2010, 12:19 pm

remember guys if you are not using a legit copy of windows
than after installing this make sure you never install those updates which say that they are for windows piracy control or for key legitimization safety or for anything having keys and legitimate version of windows in it.

stefan0s_7 - December 9, 2010, 1:07 pm

whats the difference between Windows Vista Business N and Windows Vista Business???

Obi-Wan Cannabis - December 9, 2010, 1:11 pm

There's no password on the Archive...

What have you downloaded ? Download the DataFileHost one .

[**eno**] - *January 5, 2011, 6:06 am*

Good tutorial mate, this very hopefully.

Thanks for this share.

;)
