Sorry if this sounds a bit harsh but I'm not whining about the fonts. I just don't like it when people write next to the option font "Anything" then if I do something and they don't like the font then I get the blame for it. I'll get the fonts right now. Thanks for suggestion that to me too.

Rapelsin - October 6, 2010, 11:48 am

Dude, these don't look good at all. Don't go around spreading these, please. You're basically just writing text, adding drop shadows and glows.

Seriously? Get off my thread, I don't care if they don't look good. I'm offering a FREE service. Just go away if you have nothing nice to post.

Juke - October 6, 2010, 7:20 pm

Yo Kyle, Thanks for the sig bro. Looks good, Love the font.

But I was wondering if you could maybe try a few different colors like:

-Cyan

-Gold

Just leave my sig the way it is but just change the color. Keep the shadow white and the same font. Thanks alot, I really appreciate you doing these man.
