Thread: [\[C#\]Simple LAN chat](#)

killerdoob420 - September 7, 2010, 9:51 am

This is a very simple LAN chat program i made during the course of another project, it allows you to chat with other people running it, just put in their LAN ip, It uses tcp port 3000 for communication the messages are also encrypted in XOR

Nice, but you can make it read only, change the background color to white instead of window and it won't even look like it was changed. Nice job anyway ?
