Thread: [\[FREE\] HyptoTube BETA -- Youtube Subscriber + Liker / Disliker \[No Shitcash\]](#)

Hyptonix - September 8, 2010, 3:12 am

Threw this together really quick, so it's bound to be buggy but I wanted to release something to see if it was worth continuing. Like the title says, it's a subscriber + liker. It's extremely basic, and there's no customization to it. You enter the URL and the Video Title, load the account list (it loads from \accounts.txt, so make a new text file in it's directory called accounts) Accounts must be in account:password format.

Download:

Free: <http://uppit.com/co5mdyti5h1c/HyptoTube.exe>

Shitcash (if you feel like being nice): [http://\[spam\].us/0gJi0](http://[spam].us/0gJi0)

If you are having problems with that, here is an older, more stable version:

<http://uppit.com/ge5axqmhekq3/HyptoTube1.exe>

Test Accounts (save as accounts.txt):

Code brunolg_007@hotmail.com:hallanaluana

antonyneal:antony

vodk44pow44:izo7jf333

heavenbolt:cloud447

mrgamerpro2:djiceout1

Dunno why it says 2 detections, probably because it uses web browser and variables username and password.

Anyway, like I said this is extremely basic, but depending on how HF responds I'll definitely work on it more and add more functions.

If community reaction is decent, this is what you have to look forward to:

Proxy Lists

Commenting

Multiple Video Liking

Sexy Gui

Account Checker
Video Flagger

Thanks for reading please post back and tell me what you think. Don't flame me for having a simple program, it's a beta. Tell me what's wrong with it and I'll gladly fix it.

Cheers,

Hyptonix.

Edit:

Known Bugs / Being Fixed list

If the account email is unverified, the bot will stop

If google pops up the add recovery phone to your account, the bot will stop

If it says "Please Wait..." delete the first account, and make sure to logout.

If possible, post back with what you think of It.
If positive, I'll try It myself.

Nice share, will check it out.

I created /accountlist.txt in its directory, but it doesn't load any accts when I press "load accts". :S

Do i have to supply it with my own list of accountss?

Edit: doesnt work -.-'

this thing doesnt load for me .-.

spydor - September 8, 2010, 8:49 am

Awesome :) Will check it out soon

What do you mean it doesn't load? Can you elaborate? It works on my desktop (Win 7) and my laptop (Win XP).

zoh - September 8, 2010, 9:52 am

ok, the accounts load, but they don't rate, and after signing in to every account, it says you need to sign in to do this. I am signed in, don't know whats the prob

Ugleh - September 8, 2010, 10:18 am

he put a rat and istealer in them, you are all now victims goodbye.

Debugging right now.

Edit:

Fixed the double logout problem.

Edit2:

Add disliker, go trash other peoples vids :P

Sasuke01 - September 8, 2010, 4:55 pm

Wow thats cool, gotta check this out later.

The Forgotten One - September 8, 2010, 7:32 pm

This shit is cash.

Thanks bro :D

Edit out the login details on the left, or I'll have to junk the thread.

Hyptonix - September 9, 2010, 7:39 am

:s sorry, edited them out..

working on adding proxy list and recoding because its kind of sloppy.

expertprogrammer - June 25, 2011, 2:10 pm

Dude it got a fucking RAT for sure. The icon is a program compiled with vb6 and your program is NOT made in VB6. Also VB6 icons are used for Crypters, GTFO...

indeed_newb - *August 28, 2011, 1:44 pm*

i wanted to try this but im afraid its ratted...

can someone please confirm this?

thanks in advance.

krislovesholly - *February 6, 2013, 8:33 am*

can confirm this is 100 percent safe just checked through sandbox and hex editor ? people here need check the file propely before they start accusing people of rats....plus the guy as positive rep nice one ?
