Thread: [\[Guide\] iPhone Jailbreak: The Ultimate Guide! \[+POLL!\]](#)

Drive-By - September 8, 2010, 9:15 am

Hey guys,

I decide to start a special iPhone Jailbreaking Guide for you guys i hope my Guide will give you enough information. And i hope i will get some trust and some good reply's because i want to help you guys out!

Spoiler ([Click to View](#))(Just don't look at my Reputation. I got repfucked. I deserved but i learned not be a noobie so ignore it please)

What is iPhone Jailbreak?

In short, Jailbreak is the process of hacking an iPhone to free it from Apple restrictions.

Because the iPhone is far from flawless as Apple created it, thousands of iPhone users have flocked to Jailbreak in search of iPhone changes and improvements. iPhone has been held back by limited customizability, text message privacy issues, and a lack of multitasking capabilities. But Jailbreak can solve all of these problems with apps and fixes available in Cydia and Installer.

Cydia and Installer are the unofficial “App Stores” of the Jailbreak world. Developers create apps and tweaks and different utilities and upload them to these package managers, which organize everything into categories. The differences between Cydia and the App Store are the lack of an app approval process, and the lack of access limits on the iPhone software — i.e. you can do things Apple did not design the iPhone software to do.

Why Jailbreak iPhone?

No restrictions. Want a custom wallpaper on your home screen? Custom icons for your apps? Internet tethering? A category system for organizing your apps? The ability to hide native iPhone apps you don't use? You can do all of this and more with Jailbreak, as iSmashPhone describes in ten reasons to Jailbreak your iPhone. As one of my readers recently noted, Jailbreak can make all your iPhone wishes come true.

To join the subculture. Sick of Apple's stranglehold on the iPhone? Those who Jailbreak iPhone belong to a movement of people who demand more from their iPhones. And they're not gonna let Apple stop them. Beat the system: Jailbreak your iPhone.

Unlock iPhone. To unlock your iPhone and use it on any carrier, you must first Jailbreak your iPhone. Some of the Jailbreak solutions below also allow you to unlock the iPhone, though unlocking is generally beyond the scope of this tutorial.

So guys, that's a enough reading i guess. Now we are off to the JailBreaking side. Here below some information:

Jailbreak iPhone 3G & 3GS w/ iOS4

Jailbreak iPhone 3GS 3.1.3 with Spirit

Jailbreak iPhone 3.1.2 with QuickPwn

Jailbreak iPhone 3GS 3.1 with Pwnage tool on Windows

How to Jailbreak and Unlock 2G iPhone OS 3.0 with redsn0w

How to Jailbreak iPhone 3G 3.0 on Windows & Mac with QuickPwn

Step-By-Step Guide to Jailbreak iPhone 3G Running iPhone OS 3.0 with redsn0w (Windows)

Jailbreak iPhone 2.1 with QuickPwn

This are currently avaible, but there is something more to be used for. Some quicker Jailbreaking and special for the iPhone 4. www.jailbreakme.com It's a special site that Jailbreak's your iPhone is just 1 minute!

Here a picture of it:

Spoiler ([Click to View](#))

So you can see, just slide it and you will be waiting. Just like 1 minute your iPhone will be Jailbroken, but one problem! It will not Jailbreak if your iPhone is a version of 4.0.3. (That will be soon Possible)

So guys, you can decide between all those Jailbreak methods, but the best one is www.jailbreakme.com

I hope i helped you guys enough this is one of my first iPhone Guides.
Good luck and i hope you will get understand this.

Regards! PM me or Reply for some information! ?

Come guys, some reply's or what?.... mstmstms
