Very nice headphones :O:O

(Btw apple earphones are shit, its only cost few dollars, for that price you cant get quality sound :P)

I got the SkullCandy Skullcrushers, I prefer them over the Beats by Dre because of the built in subwoofer lol.

TBH they're a waste of money, I had them but they didn't sound that nice, I also hat monster. HD 555s are the best headphones ever and they are really cheap.

Schwalm - September 10, 2010, 5:18 pm

I would have probably waited to get the Beats Pro but ehh they are still nice :D

First post in this section :D , did you buy them officialy from the site or used of someone?

skytz - *September 10, 2010, 8:58 pm*

i dont think i would have gotten beats pro cause their too expensive... and kinda for professionals.

i got them from best buy. there are hundreds of fake ones, so the only way to be sure is to get them from an authorized retailer.

and if you want good headphones for the price of apple ones, get these...
