I did not change much just in the error status.
a small mistake with the melt compatibility server.

so far no serious beug apparently.

thanks you.

You have encrypted password in 1st post. Just decrypt it, it took about 90 secs for me ;)

Btw it s really great crypter, gonna test if it works for me, but it looks awesome dude ?

Cheers

The Janitor - September 11, 2010, 1:00 am

Hey, i am new and have no idea how to decrypt suchlike passwords, can someone help me on decrypting such passwords?

SIM-307931 - September 11, 2010, 1:03 am

Sure, check out this link: <http://imgtfy.com/?q=How+to+decrypt+AER+256>

Remember that if he encrypted password using aer 256 -> tripo-5 etc. you have to decrypt it bckwards (You start from tripo-5 in that case) Do you catch it? :)

Good luck dude, and when you decrypt your password DO NOT SCAN ON VIRUSTOTAL!!!

Cheers

rockey123 - September 11, 2010, 1:07 am

i m getting how to do it .pls tell me how to proceed..!

The Janitor - September 11, 2010, 1:08 am

I truely dont get how to do it (still) When i enter the code i get an empty field... Btw i lold at the google thing :x.

Im starting to get this, i get all weird letters and stuff, and at the AER-256 i get an empty place, i reversed backwards starting from feron-74, than to base-64 than tripo-5 and than aer-256,. But the password is wrong T.T

The Janitor - September 11, 2010, 1:18 am

YOU IDIOT NEVER POST THE PASSWORD DELETE IT NOW!

SIM-307931 - September 11, 2010, 1:21 am

Well since this moron gave out the password you don t have to decrypt this, but normally you use crypto.com and just ctrl+c and ctrl+v the password, it s easy :)

Pm me if you have any further questions ;D

Cheers
