You really need to learn what spelling and grammar are. They will one day, play a major part in your lonely life.

Grimskulls - September 10, 2010, 2:42 pm

Agreed, why deface random sites for thats just stupid, use your hacking skills for something useful in life, become an IT tech or a sysadmin for a company.

MaliciousActions - September 10, 2010, 2:45 pm

Your deface images aren't very good. You wrote paragraphs for no reason when the hack wasn't even that good, you found a simple exploit alot of shit sites have. A simple phrase would have done it, deface with no warning destroy with no remorse.
