Plutonium - September 11, 2010, 10:21 am

Didn't you post a tutorial like this already?

Charmz - September 11, 2010, 10:23 am

Downloading Now... If its infected shit is going down... If it works. I <3 You.

Edit:

I <3 You. No Homo.

Doggie! - September 11, 2010, 10:28 am

I know that i have posted this tutorial be4 but i cant edit my theard otherwise i would...

And the links are messed up...fileave account has been closed...

The pics arent working and it wasnt really easy to follow so here is new1...

Its not infected...I have scanned all files with Avast 5 IE and its clean...also i have tested all files and all are working...

L0gic - September 11, 2010, 10:54 am

Oh god why #? It will take literal 2 hours to download that with the 30min DL limit w/o premium. Why couldn't you have just uploaded the whole pack?

Charmz - September 11, 2010, 11:24 am

He Did. Click Download All Tools. Duh!

L0gic - September 11, 2010, 11:25 am

facepalm I apologize. My bad.

Doggie! - September 11, 2010, 11:29 am

Heh...apologize axepted xD

I know that not all have HF premium and the reason for the separate links is if you lose or axidently delete 1 tool you can download it...

Guys here are few tips about proxys if you cant get a good proxy list with the tools from the tutorial then use this sites and check them...you should get alot of good proxys...

Will come in handy, the I always run into problems when it comes to proxies.

oc0r3yx - September 11, 2010, 11:52 am

Im going to download and edit this back. and try to tell everyone how it works

Edit: It woked Fine(: thanks so much

Doggie! - September 11, 2010, 11:56 am

Yeah I know it worked xD

Spread the link to this not the tools xD

End - September 11, 2010, 12:12 pm

trying this right now. Thanks for the tut.

alisamer60 - September 11, 2010, 5:50 pm

hey is Cforce safe to use???

will we get caught ? :S

Bansil - September 11, 2010, 6:54 pm

I'll try it when i get home, Thanks.

kane and lynch - September 11, 2010, 6:56 pm

thanks now i can beat my meat with legit shittt

Doggie! - September 12, 2010, 1:25 am

CForce is safe to use...cuz u use a proxy...

Enjoy guys...

nyzze - September 12, 2010, 9:28 am

Damn dude very nice done. Thanks!

yyyy1313 - September 12, 2010, 10:37 am

Well I got different logins, but none seem to have worked for me =\ . How many different logs did you try until you guys got in?

EDIT: Ah, I see, another question C Froce, doesn't it automatically only put up the good links on the right hand side, or do I have to sift through each one to see which ones work?

Thanks for the assistance!

???™Hawk Eye™??? - September 12, 2010, 10:52 am

it depends of your wordlist if you have a good word list it can take 30sec only but if you have a very shitty word list you can have no good results

Personnaly i use Staph instead of athena

yyyy1313 - September 12, 2010, 3:56 pm

Reviewing the introduction in the C Force the OP provided, how would this work for say a site like Naughty America?

delta5 - September 13, 2010, 8:02 am

hahaha now i can find some pedo site username and password and then sell it . .
thnx for this edih3ro

End - September 13, 2010, 8:10 am

With Cforce I get all the time non-working passwords.

Arcarius - September 13, 2010, 2:34 pm

Same as what End said. I went through over 20,000 combinations, not a single working..

MagicMadders - September 13, 2010, 5:22 pm

Hey man nice tut. will this work on other websites or just porn ones? also should i always hide my ip while doing this?

thanks :)

ShadowForge - September 13, 2010, 5:24 pm

the links are not working some give 503 error :(

Grudgeeee - September 13, 2010, 5:30 pm

Nice tutorial, I guess this is why everyone want is giving out all theses logins everywhere.

yyyy1313 - September 13, 2010, 7:29 pm

Yea, I went through over 30,000 logs and pass, I only got like 3 or 4 legit ones (or so it said). When I tried them out, none of the ones that it said were legit worked. I'm guessing one of two things happening, either too many people are doing this or the combo compiler isn't very good. Anywho, any advice would be welcomed! On another note, I noticed that Cforce will sometimes say it hit the same user name and login multiple times.

Doggie! - September 14, 2010, 6:02 am

Yes i see what is the problem...

The bangbros is not a good example...Cuz the logins are working but you wont be able to login...

Its a shitty site...but if you wait a little like 5 mins or so...you might have working accounts...

I noticed many questions about which site this would work...

I believe that this may work only on sites that don't have captcha (you have to type a code when u login...). I'm not sure...

So that's it...sorry for late reply had some problem with this site (or the site had problem with me xD)...

Anyway enjoy guys...thanks for your replies and keeping this topic alive...i have seen that some are using staph...that is a good tool...i maybe make another tutorial on how to use that :D

for now this is it...when i get some time i will consider another tut...

Doggie! - September 15, 2010, 12:23 pm

lol...i have learned that i have the right to my thread 1 time a day xD

yyyy1313 - September 17, 2010, 7:13 pm

Quick update, I tried several different sites on this thing and I must say, none of the passes I attained worked. I went through 30,000 login's on some and on other between 10,000 to 20,000 and not a single one worked.

noid - September 17, 2010, 10:31 pm

Nice post man. Shits hard to find.

Doggie! - September 19, 2010, 8:55 am

Well this may not work cuz every1 is now using this method now :D

Yeah it sucks...i know...i will make another tut soon that might help you guys...

CD-R - September 19, 2010, 11:37 pm

so wait, this is like brute forcing or what? do you need a .txt file with user and password?

jamisoncrzy - September 20, 2010, 5:52 pm

Everything I try, it all comes up as "Access Forbidden" =[

fragSTAR - September 20, 2010, 6:56 pm

Enjoy guys...

AI² - September 23, 2010, 7:37 am

I have a problem with C-force... "Component 'MSCOMCTL.OCX' or one of its dependencies not

correctly registered: a file is missing or invalid"

For Proxy checker it was the same problem but a "Registrar" has resolved this problem...

The readme said that i must download visual basics libraries ... I did it but it still does not work. I'm on 64-bit.

Thx

Doggie! - September 23, 2010, 9:56 am

google download MSCOMCTL.OCX and then try that again with registrar...

TechnoLogixxx - September 23, 2010, 10:30 am

lol i did the proxy geter proggy and my av says when it done Detected trojan.backdoored ... its NOD32 so idk what i need to think about this

AI² - September 23, 2010, 10:58 am

Thx Ed1H3ro the file was missing from the folder...

Doggie! - September 23, 2010, 11:41 am

Hehe...yeah stupid file...where did he gone xD

Anyway its not a virus...i personally used all of them and they are working perfectly...

(Sep 25, 2010 11:48 PM)n0ob Wrote: [\[CITE\]](#) hmm i tried bangbros, and it works, but when i try barazzers or other sites it fails :(
This could mainly be for the fact that bangbros is a 'popup' site (i.e. when you go to log in by clicking the members tab, a window pops up requesting your login info) while sites like Brazzers uses a form instead (notice its actually requesting for your information on the page itself, not in a

popup window.) Im not 100% sure if this is the reason... But im really curious as to how you are supposed to crack passwords for this form of site if there is no popup? Anyone know?

frozeen - September 27, 2010, 10:02 pm

well ,i am gona try this out

Doggie! - September 28, 2010, 7:49 am

Hey guys...sorry for not realising new tutorial...had some probs lately...

- 1.My PC kinda crashed...had to fix that 1...took me whole weekend :S
- 2.Lost internet connection yesterday...some freak this hapened...all users in my region lost internet...they fixed it few moments ago :)
- 3.About the tut...I will realise this as soon as i can...cuz im going to school (traveling to school) so when i get home im tired...and cuz wana relaxe...I will probably do the tut on weekend so be patient guys...

Ace of Sp?des - September 28, 2010, 8:01 am

This will work for non-porn passwords too right?

mKn1ght - September 28, 2010, 9:34 am

Works flawlessly, thanks a bunch :)

blub123 - September 28, 2010, 12:50 pm

u guys think its safe enough to do it from home?

and the programm doesnt filters i did the options etc but it says 0 lines filtered

blub123 - September 29, 2010, 9:54 am

Push can someone help me? raptor 3 doesnt filter the login.txt !!

maximo0o - September 30, 2010, 2:33 am

I have followed The steps but c force tells me found no good proxies.

could some one tell me the probs

MartialLaw - October 1, 2010, 6:05 pm

Great tutorial, did everything step by step and it all worked perfectly!

Everyone that is getting nonworking logins is probably because they're all trying to get bangbros passes...

Do different sites and it should work perfectly. This tut is much appreciated!

Cheers!

APTO - October 2, 2010, 4:40 am

Great TuT when i get home defenitly going to try it out.
is is %100?

-Dj JoShZoR

smit - October 2, 2010, 10:53 am

Thanx for uploading nice work

Doggie! - October 2, 2010, 11:40 am

Enjoy guys...

See i told you that its working on other sites...

Bangbros is too popular, the passes are going away as soon as they are "public"...

Anyway I will make another tut (probably tomorrow) so you can get a working password anytime and it will be more noob friendly than this 1 (dont know if i will be able to keep this promise but will try...the noob friendly thing xD)...

Doggie! - October 3, 2010, 12:15 pm

Yes I had this prob. too...

This is because CForce logged in and that is where the problem is...

Youll have to wait a little before trying to login right after "cracking" this passwords...

Bangbros doesnt allow 2 ppl. at same time to be logged in on same account so "crack" passwords and then wait for like a half of hour (probably about 10 mins. or less but just to be sure :))...and then try to login it will work :)

AntiGuy - October 11, 2010, 10:24 pm

Thanks for the tutorial dude ;)

I've tried and but this happened to me, when I try to log in the site, after putting the username and pass nothing happened, the site always shows the pop up where I have to fil the things to log in; but it doesn't even say that the log in is failed! For example if I put something random invented from me it says log in failed! But when I put the things taken from Cforce it doesn't log in but not even say that the log in is failed, it just show the pop up where I have to fil the things, thats bit weird :/

Ryan™ - October 23, 2010, 12:33 pm

Proxy checker won't open for me..

gokulos - October 23, 2010, 11:52 pm

WOW ??

TFS ???

Doggie! - October 24, 2010, 3:53 am

:) It works for me perfectly, and also for many other guys...

sExY-boY - October 24, 2010, 10:51 am

thank you for the tutorial!

I tried to open C-Force but I get an error message.

"Component 'MSCOMCTL.OCX' or one of its dependencies not correctly registered: a file is missing or invalid."

Doggie! - October 24, 2010, 11:23 am

Download that OCX (google)

Register OCX (when you download youll get instructions how...)

Try runing it again :)

sExY-boY - October 24, 2010, 11:59 am

If I do that, I will get the next error message.

This time the file RICHCTL32xxx.OCX is missing.

What to do next?

ananui81 - October 24, 2010, 12:01 pm

Didn't work for me after 30 minutes of work .. :D Too bad

Imm?rtal - November 20, 2010, 1:05 am

Couldn't get it to work but thanks for putting time into making this tut ?

unknowntoall - November 20, 2010, 3:40 am

Subscribed 4 now, will try later ... Thanx

BuddyLee - December 2, 2010, 12:55 am

Atleast this guy provides noobs with screenshots instead of ripping my tut word for word

makedonia - December 2, 2010, 6:28 am

couldnt get it to work either

iDeX - December 2, 2010, 6:57 am

nice tut but i must say i love your sig :)

Salciccio - December 2, 2010, 9:30 am

Thanks man!

Great tutorial, i am able to crack some good passwords now :P

Anyway how about a method to crack anti-bot sites like brazzers, mofos and such?

hackz95 - December 2, 2010, 12:07 pm

Great Tutorial..

Thanks Man

Doggie! - December 2, 2010, 12:36 pm

"Atleast this guy provides noobs with screenshots instead of ripping my tut word for word." - >)

Noobs xD

"couldnt get it to work either" - Sorry dude, u should try my other tut (see my posts, its more simpler and noob friendly :P)

"nice tut but i must say i love your sig :)" - Thanks :)

"Great tutorial, i am able to crack some good passwords now :P

Anyway how about a method to crack anti-bot sites like brazzers, mofos and such?" - Try my other tut...I dont rally understand what do you mean by anti-bot :S

Enjoy guys and be sure to check my other tut, its more simpler (check my theards)... ? ?

Silent1ntruder - December 16, 2010, 12:55 pm

I downloaded the files and nod32 terminated the connection, proxychecker = infected

noobhacker911 - December 16, 2010, 6:46 pm

thx nice tut i will try this

Doggie! - December 17, 2010, 11:05 am

rocksteadyrocks1 - Do you seriously think that I would infect ppl. here...

Look at my rep and also there are 13 pages of positive replys on this theard...

Do you think no1 would notice -.-

N00bs, stop flaming this theard...

SmartyOwnage - December 17, 2010, 11:09 am

Wewt, sick lol. Tested this and cracked p0rnhub.
LOL?

Doggie! - December 18, 2010, 3:39 am

xD Owned...
You cracked a free site xD

Sage - December 18, 2010, 5:24 am

I will try it, but if it works, you might not see me on here because I will be in the hospital for cum loss.

PRIdEVisions - December 18, 2010, 8:17 am

great job man, bangbros is indeed hard to find some legit passwords.. Didn't really try any other websites tho.. how to change the search string for other sites ?

Zeon - December 18, 2010, 1:46 pm

Have you checked the tools? Are you sure they're clean? Where did you find them?

Ruzlier - December 18, 2010, 1:52 pm

(Dec 18, 2010 06:24 AM)Sage Wrote: [\[CITE\]](#) I will try it, but if it works, you might not see me on here because I will be in the hospital for cum loss.

Or be in the hospital to see why a massive cum lost would put you in the hospital.. kinda strange.

Zeon - December 18, 2010, 2:04 pm

The box which should contain the working accoutns only lists red usernames and passwords ,eg:

alsace:1294 -401- Access Denied

Ruzlier - December 18, 2010, 2:11 pm

Lol downloaded 1 file and it was like 30 minuets for the next, saw the download all just like fuucckk

raptor does not work for some reason.. disabled virus shit

demmert - December 18, 2010, 2:57 pm

gotta love that porn hehe

goinsurgency - December 18, 2010, 3:05 pm

thanks looks good, ill try it and see how it works

Fredr1k™ - December 18, 2010, 3:34 pm

don't be angry, but proxyfinder and checker has a trojan. I havn't read the whole topic but are this false positive? last time I tried proxyfinder i got a trojan. I'd rather not be infected again

Zeon - December 18, 2010, 3:51 pm

I honestly don't get how Cforce works... it just gives me this...

<http://david12:freebie@members.bangbros.com/> (Possible Fake - 19520)

<http://Snowski:washere@members.bangbros.com/> (Possible Fake - 19520)

<http://bpephin:dolphin@members.bangbros.com/> (HIT - 8973)

etc... none of them work...

justi2n1 - December 18, 2010, 7:51 pm

ok this is probably stupid but how do you copy logins from athena?

Crafty - December 18, 2010, 9:14 pm

iv tired this but finding proxies is a bitch and i even went to the sites you recommended

Doggie! - December 19, 2010, 3:12 am

wheelchair100 - You should find some unknown site or blog that provides proxy's not some popular site cuz they get banned almost emidiately...

justi2n1 - This is explained in the tut...Anyway theres a logins.txt in the same folder as Athena.exe

Zeon - Seems that you are trying a protected site...

Fredr1k™ - Virues alerts are false positive...You didnt got trojan from me...

Pakistani Hacker - December 19, 2010, 3:18 am

Nice tut but i already knew this

Zeon - December 19, 2010, 3:23 am

No, I'm trying bangbros, the site in the tutorial.

roni14 - December 19, 2010, 4:38 am

thanks man, I test !!! ^^

MickIsSick - December 19, 2010, 4:40 am

im gonna try but 30 min wait is pretty annoying :/

justi2n1 - December 19, 2010, 6:25 am

yea i figured that out last night lol

zombiehacker - December 19, 2010, 7:18 am

Someone know's where i can get Combolist?..

Zeon - December 19, 2010, 7:42 am

Looks like with the update of the new mybb, it broke the spoiler feature.
well for atleast this thread.

Doggie! - December 26, 2010, 5:15 am

Hahaha...Looks so...

I mean 16 pages xD

j3r3mY-M - December 27, 2010, 8:22 am

don't understand how this work's

acheyagami1 - December 27, 2010, 8:49 am

wow.. this cool thanks brada

End - January 17, 2011, 9:11 am

I have some problems with athena II

It leeches logins for a few seconds, then it stops :|

Doggie! - January 17, 2011, 11:13 am

Idk what the prob...

Try redownloading...

Methanity - January 17, 2011, 11:16 am

Might try this once i get some spare time left/when i get bored.

- Butterfly

provamails - March 30, 2016, 2:46 pm

nice thanks can u tell me how to hack amaland passwords

IHasBrains - March 30, 2016, 3:02 pm

Last post was 5 years ago... anyways. Look up a tool called sentry mba.

Nicco0000 - April 3, 2016, 7:09 am

m going to download and edit this back. and try to tell everyone how it works

Edit:: It woked Fine(: thanks so much

In case you don't understand,

Brute forcing accounts ISNT 100% ???

aswin123 - April 4, 2016, 8:24 am

lets see hope this works man

aocoder - April 5, 2016, 4:57 pm

this is still working ? i dont think So

jammy47 - April 6, 2016, 8:07 am

I dont think brute forcing works all that well. It has never worked for me.

selena1 - April 9, 2016, 7:17 am

i can't see anything what is this

Cokeboy - April 9, 2016, 10:13 am

Nice post man. Shits hard to find.

asdf1556 - April 11, 2016, 12:39 pm

this actually worked really great

L33tness - April 11, 2016, 10:38 pm

I click the link on the OP and nothing happens. Is this a troll or what?? lol

matatiaho - June 30, 2016, 4:53 pm

klkdjfsf it doesnt work omg

satryiasis23 - July 7, 2016, 8:27 am

thanks for this guy, i will try this soon

LetItShine - July 8, 2016, 10:21 am

this post is out of date!!!

SwitchUPSOLO - July 15, 2016, 2:51 am

no this doesnt work anymore

09-11-2010, 01:21 PM (This post was last modified: 09-11-2010, 01:30 PM by Doggie!.)

that might be the reason why

Thesilence123 - July 14, 2018, 11:46 pm

Thanks a lot for sharing!

roka12 - July 15, 2018, 1:13 am

Downloading Now... If its infected shit is going down... If it works. I <3 You.

Xavnounet - July 18, 2018, 4:42 am

It's always interesting! But deos it works only for porn passwords or other passwords sites too ?

retroposh - July 18, 2018, 11:38 pm

Thank you!!! I appreciate it.

98358533 - September 12, 2018, 11:35 am

I appreciate it, did some more research after seeing that thread .

Bood_dypai - September 14, 2018, 7:09 am

gonna try this ?? now i will post if works?

mana776 - September 17, 2018, 8:50 pm

nice man trying it now thx

gonna852 - September 18, 2018, 12:04 am
