I'm not Real - September 12, 2010, 7:20 am

What's up with the giant image, nice share though.

Hman - September 12, 2010, 7:56 am

Thanks for this! What font did you use btw?

zyvox - September 12, 2010, 9:26 am

Thanks for the nice comments.

I think it's easier to use an image instead of images and text, I can place stuff wherever I want.

I used Frankling Gothic Book
or whatever it's called. It's franklin something... and "Book" at the end.

Plutonium - September 12, 2010, 9:50 am

Why should mods delete the other 3 when they were created before yours?

zyvox - September 13, 2010, 9:00 am

^Because I got a quad (4) post when I posted this. And the other 3 got screwed up, so I edited one of ythem (thats this one)

So I wanted MOD to delete the other 3 coz they were spam.

It's done, thanks mod and ty for the comments :D

Oh and ty for the rate <3

It'd be nice if someone makes a tutorial that hasn't been made a couple hundred times on HF. I guess that won't happen in the near future.

thirsty - September 23, 2010, 7:14 am

cool tut..

next time tho add a background

zyvox - September 23, 2010, 1:36 pm

[img]http://i794.photobucket.com/albums/yy224/Christian--/Untitled-1-3.png[/img]

zyvox - September 25, 2010, 3:08 pm

Kris, you should try drawing another gradient, like uhh... Shorter :P

And lower the opacity of the text layer at the bottom =)

L?gend - September 25, 2010, 4:27 pm

I will sir, Thanks for the useful tip :)

zyvox - September 26, 2010, 2:58 am

[IMG]http://i53.[censored].com/102v5tt.png[/IMG]

finally! thanks for the tutorial!

zyvox - September 26, 2010, 1:13 pm

Nice outcome, and your welcome :D

I just made another reflection coz I'm bored.
Unfortunaly I can't edit the topic coz I ain't leet/uber.

But here it is:

Though I forgot to reduce the opacity, you can see the difference. If I did, it would have been more transparent at the beginning of the reflection, now it's 100% NOT transparent there which makes it look weird.

So don't forgot to reduce the opacity =)

Charmz - September 27, 2010, 1:16 pm

ven0m - October 10, 2010, 3:36 am

Hey man first i would like to thank you for this great tut.

But I am a noob in GFX and Photoshop and I faced the following problem while using your method:

After duplicating it was like this [img]http://img139.imageshack.us/img139/9222/assk.jpg[/img]
but when i tried to flip the text vertically it becomes something like this :
[img]http://img139.imageshack.us/img139/6762/ass2t.jpg[/img]
I couldn't move the text. Please tell me what to do.

zyvox - October 11, 2010, 3:17 am

^You need to use the move tool, then click on the layer in the layer panel.
Then just click and drag, and move it to under the other text.

Thanks for the nice comments :)
