Life Keylogger V1.0 by eXero

I have made a keylogger, and have decided to release it. It should be compatable with all Windows Operating Systems. Please use this wisely. If you like it, and or use it please post a reply on this thread. Please do not leech my work. Post a reply if you download. Do not post this anywhere else without my permission. Read the README file before using the program. DO NOT scan anywhere but novirusthanks.org. DO NOT make a mirror download link, or make your own download link. Thanks to Fitz- for the awesome tutorial! I edited the code to fit my own needs though.

Yes I know the stub is detected. If you don't trust me, eXero, a trusted, dedicated long time member of HF, then please don't use it. I am not trying to infect my fellow HF members, I am trying to contribute to the HF society.

How do we use this ? o.O

[/msg]

-VeX- - September 11, 2010, 5:14 pm

you make the server, but use my email address. Then run the server on your computer. it's easy!

I downloaded it and am testing it...looks nice :)

Oh really ?, but after i run the server, do i go on all my msn account and put my credit card number in blocknote &?

sap123 - September 12, 2010, 8:25 am

Looks exciting ;) Downloading.

eXero - September 12, 2010, 9:13 am

This has nothing to do with a credit card. You have to spread your virus and then you will get victims keystrokes sent to your email that you put in. I suggest reading up here on HF.

The 7th Sage - September 13, 2010, 9:57 am

What are the link viewer textboxes?

Chaos Water - September 13, 2010, 1:15 pm

Screenshots would help the download population of your Keylogger increase.

eXero - *September 13, 2010, 7:03 pm*

There are screen shots. Yes like that tutorial agentmax69. And the link viewer textboxes are for when the victim opens your virus, it opens those links if you have that option checked.

Rhizoid - *September 13, 2010, 7:34 pm*
