Thread: Own'z Crypter v 1.9.6

c6p0 - *September 12, 2010, 8:40 am*
limit post reached,
i start another post .

Fdisk - *September 12, 2010, 8:52 am*
Error when i try to decrypt the pass.

c6p0 - *September 12, 2010, 8:58 am*
hmm yes !

run your brain !
noob proof ...

van1lle - *September 12, 2010, 9:00 am*
Looks very nice ;)

i got an error to .. i can read the first 2 words of the pass but the third one is "L¼`".. :S

zackry2 - *September 12, 2010, 9:03 am*
It looks very nice! Does it work for stuff that is packed with UPX?

Grudgeee - *September 12, 2010, 9:04 am*
As other people I am getting a error when I try to decrypt the pass.

c6p0 - *September 12, 2010, 9:05 am*
never use UPX all anti detected this .

Fdisk - *September 12, 2010, 9:06 am*
c6p0 -> I run my brain yes.

Noob encryptor pass.

-----._prince_.----- - *September 12, 2010, 9:20 am*
Bro anyone tell me how to check this very difficlult password plz tell me :(

ayteck - *September 12, 2010, 9:20 am*
??? i get **L¼`
what's wrong ?

thanks for this ?

SIM-307931 - *September 12, 2010, 9:27 am*
HAhaha, great password dude, it took me more than 5 mins to decrypt it and i failed 2 times :>, the idea with putting strange letters inside the password was really amazing ;)
I hope it ll stay FUD long ;D

Cheers

-----._prince_.----- - *September 12, 2010, 9:47 am*
Hello help me sir how can check this difficult password plz help me
how u all know this difficult password
and how to decrypt it tell me site which one u use??

bongchilla - *September 12, 2010, 9:49 am*
i only get compiledforL ... :(

Shkelqimi - *September 12, 2010, 9:58 am*
Which characters should I remove from this encrypted line
Code mff81kZz=bnkuIT4mleR1fD3=d%5 9kC14dklWR4466D+GpczBRDHfo=% 4DXXWell aint appearing all strange characters in forum copy and paste it in notepad !
Im stucked here ...

c6p0 - *September 12, 2010, 10:12 am*
my pm flood stop plz !

new password try first post.

ahsanciit - *September 12, 2010, 10:19 am*
i got compiledhackforum>>>>????bt nt executing???

Elyfean - *September 12, 2010, 10:20 am*
Nice, it works.
& it's FUD.
Thanxs, man (:

The Janitor - *September 12, 2010, 10:22 am*
Link is not working? It isnt for me x)

SIM-307931 - *September 12, 2010, 10:23 am*
Dude, i get error when I try to crypt my Cg server... version 1.0 works fine, what s wrong with that ;<

Cheers

The Janitor - *September 12, 2010, 10:25 am*
I cant even get to download it :x

?D?vi??c?t?™ - *September 12, 2010, 10:26 am*
Not working :S Getting error Base-64 lines bla bla bla error

The Janitor - *September 12, 2010, 10:28 am*
Devian? Ill help you decode if you send file trough email plox X)

(I already got pass)

ahsanciit - *September 12, 2010, 10:28 am*
man did ur crpter fud ma cybergate ???

and i get the pass...

Fdisk - *September 12, 2010, 10:29 am*
Error when i crypt me server blackshades

Base-64 error ....

c6p0 - *September 12, 2010, 10:31 am*
ok closed
look this

thanks

Fdisk - *September 12, 2010, 10:41 am*
The characters remove is ? and ?

c6p0 - *September 12, 2010, 11:45 am*
new version availiables .
new password

KingKj52 - *September 12, 2010, 11:59 am*
Haha, nice pass ;P..

Typo though, less purposeful. xD

Google can be your best friend for decrypting. C6p0, can we give them the password? <.<..

carl1Johnson - *September 12, 2010, 12:18 pm*
Lol'ed at the new password. Thanks for sharing and respect the author :)

paplo - *September 12, 2010, 12:21 pm*
Awesome crypter ! But why can't I disable notepad autorun ?

c6p0 - *September 12, 2010, 12:30 pm*
not allowed !

for moments, just notepad works.

and thanks you ;) .

sigi91 - *September 12, 2010, 12:31 pm*
what's zara key ?
mess too short

c6p0 - *September 12, 2010, 12:33 pm*
this is encrypt/decrypt

ZARA-128

sigi91 - *September 12, 2010, 12:40 pm*
sry, my bad xD
Thx dude again...nice work ;)

MX-5 - *September 12, 2010, 9:18 pm*
Is it any way possible to take off the open as notepad.exe? :S Becouse I wanted on rat setup open it

as winlogon.exe
Becouse I think I lose the victims when they close the notepad.exe...

axis10101 - *September 12, 2010, 9:19 pm*
works perfectly on cybergate,

only problem is the notepad.exe opens up on the victim everytime..

Can you make a way to disable this in the next update?

Thanks

raamee - *September 12, 2010, 10:14 pm*
when opened the crypted file, its showing unhandled exception error- MIcrosoft .net frame work,

I have .net 4.. should i need to install .net 3.5 too??

EDit: it also shows invalid code in a base 64 string..

c6p0 - *September 12, 2010, 10:36 pm*
plz paste your error here .
name server you use plz .

you use file pumper ?
after pump your file are no EOF .

works only with net 3.5 do not test with 4.0.

raamee - *September 12, 2010, 10:56 pm*
(Sep 12, 2010 10:36 PM)c6p0 Wrote: *[CITE]* plz paste your error here .

1. Im using istealer 6.3

2. filepumper--no

3. after pump your file are no EOF .--not applicable..

c6p0 - *September 12, 2010, 10:59 pm*
oh yes !

dont works with istealer !
wait for next update (next week-end) i try to make new custom inject in explorer.exe or svchost.exe for compatibilty with all serv .
after this certainely defaut browser.

for detail compatibility look my first topic (closed now)
https://hackforums.net/showthread.php?tid=669069

Thanks
this method bypass all anti/firwall startup .
no possible remove this for moment ...

iDecrypt - *September 12, 2010, 11:46 pm*
hey im testing this now. how are we meant to know if it run time fud :s

btw it worked :D
(didn't corrupt my cybergate) THANKS

skydude2008 - *September 13, 2010, 12:12 am*
haa it's 100% FUD
but...my server didn't work

c6p0 - *September 13, 2010, 12:13 am*
serveur name plz ?

too short

skydude2008 - *September 13, 2010, 12:25 am*
(Sep 13, 2010 12:13 AM)c6p0 Wrote: *[CITE]* serveur name plz ?

too short
Crybergate, no UPX and other

c6p0 - *September 13, 2010, 12:29 am*
version you use ?

try this

cybergate remove all antis, no icon,no injection.
use melt only crypter (if you use).

i have cybergate private 1.09 and fully tested with crypter
and all functions run for me .
the serv run great and remove perfect .
with pump file, melt .
i never use anti cybergate :p

skydude2008 - *September 13, 2010, 1:18 am*
nothing happen

omg too short again!?

c6p0 - *September 13, 2010, 3:10 am*
hmmm ok

i have detected little error code stub .

error base 64 fixed !

first page link updated same password download egain .

warwar - *September 13, 2010, 3:45 am*
i decrypted the pass it's very easy there's no error
trying The crypter right now

IVludKipz - *September 13, 2010, 3:53 am*
how do i decrypt the password?? please tell me

bb1ox1bb - *September 13, 2010, 4:02 am*
(Sep 13, 2010 03:42 AM)noseg Wrote: *[CITE]* working perfect for me, some mirrors for you, guys
http://www.multiupload.com/DWMA4VNXA4 respect for c6p0.
your miror is infected?????

Reverse18 - *September 13, 2010, 4:04 am*
not fud sanded a file and got like 25 %

MX-5 - *September 13, 2010, 9:44 am*
It made still my file FUD for me :P

T3cH.m0NkeY - *September 13, 2010, 10:06 am*
When is the update done?
Still waiting!

T3cH.m0NkeY

rapid00 - *September 13, 2010, 10:41 am*
hi ppl

and whats with eof?

c6p0 - *September 13, 2010, 11:33 am*
new update 1.2 availiables

try first post and download new !
same password .

SpriteZ - *September 13, 2010, 11:55 am*

same password .
Still you did not make possible to change inject progress? =(

WHY NOT?!?!

c6p0 - *September 13, 2010, 12:20 pm*

yes change this next week-end !
activate custom inject with explorer and svchost .
if I find a way not to be detected.

week me working i have no time to build :)

The Janitor - *September 13, 2010, 12:24 pm*

Very Nicely done, i am a big admirer of your work. I myself tried to make a crypter but keep getting a lame error care to help me? PM Me if you could help me ^^

kind regards

Gtaclick

c6p0 - *September 13, 2010, 12:28 pm*

(Sep 13, 2010 04:04 AM)the unknown18 Wrote: *[CITE]* not fud sanded a file and got like 25 %
really ?

plz name detection ,
detected by ?

i am curious :D

edit
sory my friend i have no time to help you now !
tommorow go to job 5:30 ...

gozzila123 - *September 13, 2010, 12:32 pm*

Nice Post mate

No Limitz - *September 13, 2010, 1:22 pm*

omg guys look at the way he encrypted it if he encrypted it in that order you do that in reverse so zara-128 then atom-128 so on and so on

Perc - *September 13, 2010, 1:26 pm*
Thank you so so so much :)

ave - *September 13, 2010, 1:40 pm*
so it really is a FUD

the only problem to me is that the victim has to have .NET installed right ?
for the crypter itself to run I had to install .NET 4, what about the victim ? do they also have to have 4.0 installed or 2.0 is enough ? :)

Dzoks1 - *September 13, 2010, 1:44 pm*
NICE..tnx for sharing
too short

Now its OK ? bad hosting i guess

zackry - *September 14, 2010, 12:44 am*
Took 5 min because I didn't realise I going for encrypt not decrypt XD this what in my mind ...comeon comeon I need my cybergate crypted...btw Thanks man

Shavor - *September 14, 2010, 1:19 am*
The password made me laugh.?
But back on topic- sexy GUI, Clean crypter & resulting files?
dont have the .net framework needed though, so im gonna get my friend to run it and check it for me to see if its working or corrupting my file... i suspect it to work though... good job

bittu - *September 14, 2010, 4:42 am*
Thanks a lot man....works liike a charm ..and undetetcted by the fuckin Avira....

Law4 - *September 14, 2010, 8:17 am*
It works greats for me, made my server 100% FUD!
Thanks.

c6p0 - *September 14, 2010, 9:55 am*
thanks a lot for your rep !

yes, hosting offshore free take here HF ...
nice hosting no log !
sorry for thats, url not working waiting few minute .

yep,its real 100% FUD file and startup file ...

edit:
do not post any mirror for download crypter please .

over 5000 download ffs !

Dumbo - *September 14, 2010, 10:55 am*
Thanks for the cryter , i wish i could rep u :(.

yes wont share the pass or link to help keep it Fud for longer :) .

-VeX- - *September 14, 2010, 11:12 am*
very nice release. My cybergate server went from 86% to 0%, fully FUD! If I could rep, I would ^^

mayank_predator - *September 14, 2010, 11:12 am*
Not working with DDOSER server , anyways thanks for the crypter.

c6p0 - *September 14, 2010, 11:27 am*
ok thanks first post updated !

thanks for feedback

waiting next week-end for update inject explorer and svchost .

Anonymous.7654 - *September 14, 2010, 11:28 am*
Perfect working with Metus Delphi 2.8 ! Thanks

gloomx - *September 14, 2010, 11:29 am*
WoW....Great share man, and great way to secure

c6p0 - *September 14, 2010, 11:39 am*
no pb ;)
thanks man

and thanks Anonymous.7654 for feedback !

xCocaine - *September 14, 2010, 11:40 am*
The password is fucking easy to decrypt :\

Anyway nice work ,

frankie69 - *September 14, 2010, 11:43 am*
where can i check that difficult password?

c6p0 - *September 14, 2010, 11:44 am*
yes easy i have make 1 password mid/hard my PM spam lol ...
mid to ...

easy relax lol :D

MX-5 - *September 14, 2010, 12:18 pm*
(Sep 14, 2010 11:44 AM)c6p0 Wrote: *[CITE]* yes easy i have make 1 password mid/hard my PM spam lol ...
mid to ...

easy relax lol :DWhen you make the new update with possiblity to change injext progress to svchost.exe or something like winlogon.exe :P

tvergov - *September 14, 2010, 12:38 pm*
good work ;) ?
it works with cybergate

bad thing is that the victim must have dotnet

but still good crypter ?

thx ?

Grudgeee - *September 14, 2010, 1:04 pm*
Nice there you go the pass works ^^. Thanks for the share tho.

c6p0 - *September 14, 2010, 1:21 pm*

but still good crypter ?

thx ?
dotnet only for run crypter.
crypted file dont use dotnet for run ;)
(Sep 14, 2010 12:18 PM)Topru Wrote: *[CITE]* When you make the new update with possiblity to change injext progress to svchost.exe or something like winlogon.exe :P
yes next update process inject to explorer or svchost or notepad
activated custom process .
if I find a way FUD .

cekmece - *September 14, 2010, 1:51 pm*
it gives this error in this version...

erreur: object reference not set to insntance of an object

c6p0 - *September 14, 2010, 2:33 pm*
forget to declare one object .

name server you use ? this erreur view:
making crypted file or startup crypted file ?

cekmece - *September 14, 2010, 2:50 pm*
(Sep 14, 2010 02:33 PM)c6p0 Wrote: *[CITE]* making crypted file or startup crypted file ?
yes i give a name for server...
this message shown when i finished to save

axis10101 - *September 14, 2010, 8:09 pm*
Downloaded the latest version, going to test now.

Thanks again for sharing your crypter.

van1lle - *September 14, 2010, 9:17 pm*
why doesn't it run in sandboxie ? :S

Baws - *September 14, 2010, 9:28 pm*
lol for sure i wont :P thanks for the share bro :)

Danger - *September 14, 2010, 9:45 pm*
-.- wow nice password..Try making it a little simpler?

Burn Notice - *September 14, 2010, 10:07 pm*
Pass is easy to decrypt, remember to do it backwards.

ZARA-128 -> ATOM-128 -> TRIPO-5 -> AER 256

Thanks for this =)

amlac09 - *September 14, 2010, 10:36 pm*
thanks a lot man i promise not to distribute the pass

thanks

amitsing3 - *September 14, 2010, 11:01 pm*
Thanx for sharing your great work with us :)

.-void-. - *September 15, 2010, 1:29 am*
this is fucking crypter nice jop bro

IDCUMF - *September 15, 2010, 2:34 am*
hmm you can upload it to another file hosting?

pslave - *September 15, 2010, 2:57 am*
haha noob proof, nice! Nice crypter.

xms - *September 15, 2010, 2:59 am*

???™Hawk Eye™??? - *September 15, 2010, 9:39 am*
thanks and nice pass !!!

Tu a une version fr en stock?

bui???uibu? ?s????? - *September 15, 2010, 9:57 am*
Been At This For 2 Hours .-. Still Dont Know How to get the pass. Tried Hex, and Tried Almost any other method i can think of. :C

karma_ - *September 15, 2010, 10:22 am*
Does this have built in Anti Virtual that can't be toggled off? It doesnt work in vmware - i tried darkcomet and cybergate.

axis10101 - *September 15, 2010, 10:22 am*
(Sep 15, 2010 09:57 AM)Raklatif Wrote: *[CITE]* Been At This For 2 Hours .-. Still Dont Know How to get the pass. Tried Hex, and Tried Almost any other method i can think of. :C
Hex?

the method needed is right above the code.

AER 256 -> TRIPO-5 -> ATOM-128 -> ZARA-128

really not very difficult.

bui???uibu? ?s????? - *September 15, 2010, 10:24 am*
I dont even know how to decrypt lol, so the first thing i thaught was "Hex Edit?" im stuck trying backwards, forwards, in half, twice, flipping, EVERYTHING D:

and i still dont understand "AER 256 -> TRIPO-5 -> ATOM-128 -> ZARA-128"

Edit: I looked above "the code" and found nothing ._.

another project im prolly gonna give up on :C

c6p0 - *September 15, 2010, 10:41 am*
thanks ;)

(Sep 15, 2010 10:24 AM)Raklatif Wrote: *[CITE]* I dont even know how to decrypt lol, so the first thing i thaught was "Hex Edit?" im stuck trying backwards, forwards, in half, twice, flipping, EVERYTHING D:

and i still dont understand "AER 256 -> TRIPO-5 -> ATOM-128 -> ZARA-128"

Edit: I looked above "the code" and found nothing ._.

another project im prolly gonna give up on :C
AER 256 -> TRIPO-5 -> ATOM-128 -> ZARA-128

is the method...

The password was encrypted in that order ^^

So it started "plain text > AER 256" > etc

So just do it backwards. If you still can't work it out do a search someone posted a guide.

Sour Nugz - *September 15, 2010, 11:52 am*

Ok i just downloaded but need the pass...
could any one give me a help full hint i could use to figure it out?

Thanks
Odd OnE

Pimbo - *September 15, 2010, 12:12 pm*

Odd OnEYou should check the forum (Cryptography, Encryption, and Decryption section). You can also use Google, I found a good tutorial on the forum by serching google.

c6p0 - *September 15, 2010, 12:25 pm*

thanks pimpo !

after pump your file select file pumped with below .exe "File Encrypt ..."

sorry its no clear !
the pumper file its no icluded in routine crypter .
these very useful for pumped a file
before binder.
and this way make no error with file bind.

like that you can use "before" or "after" encrypting the file the pumper.
you choice ...

you pump after crypting reduce detection rate but it does not work with all software.

d3xtaz - *September 15, 2010, 2:51 pm*
thanks for the crypter, would give it a try for sure.

Mattd - *September 15, 2010, 3:29 pm*
Downloading This Right Now Bro

westelko - *September 15, 2010, 4:13 pm*
Working fine for me...nice crypter tested with cbergate and it's FUD...keep up the good work bro...

Fly - *September 15, 2010, 5:02 pm*
Amazing crypter with noob protection. Love it. Only problem is the notepad.exe injection is locked, i guess for public version? But id rather it not be notepad

Obs3rv3r - *September 15, 2010, 5:07 pm*
Tested with CyberGate, and for me only work if I use Triple DES. (Windows XP Professional SP3) If I use RC4, my server doesn't work. Too bad notepad.exe injection is locked. But thank you for this nice crypter.

Fly - *September 15, 2010, 5:23 pm*
(Sep 15, 2010 05:07 PM)Obs3rv3r Wrote: *[CITE]* Tested with CyberGate, and for me only work if I use Triple DES. (Windows XP Professional SP3) If I use RC4, my server doesn't work. Too bad notepad.exe injection is locked. But thank you for this nice crypter.
Lol no wonder mine wasnt working

Barinade - *September 15, 2010, 6:21 pm*
I'm starting to think this changed the IP on the RAT to your IP, it was working yesterday and now it's not, I don't get it :/

It's installed on my friend's pc, i'm looking at it, but the connection isn't going thru.

It's also not working on a few other victims, and the mutex is different

Zmind - *September 15, 2010, 9:05 pm*
Its strange because i hade a server online for days and now its gone...but hey still the best crypter there :)

But there his no way to turn off the notepad?? because i test it and everytime you reboot it opens like 5 notepads...and thats very suspicious to the victim....

kakaka3 - *September 16, 2010, 2:08 am*
Tested~
Seems not working on
- Windows 7 x32 Chinese Language Pack
- Windows XP SP3 Chinese
- Cerberus
- Spy-Net

Perc - *September 16, 2010, 5:13 am*

(Sep 15, 2010 09:05 PM)Zmind Wrote: [CITE] everytime you reboot it opens like 5 notepads...and thats very suspicious to the victim....
Yeah, I've lost about 5-6 victims just because they freaked out at the notepads.

Perc - *September 16, 2010, 7:25 am*
Seems to have trouble reconnecting to a client after the pc has been restarted :/

Xored - *September 16, 2010, 7:33 am*
thanks nicae pass and crypter

c6p0 - *September 16, 2010, 9:51 am*
try settings you use with cybergate !!!
work great with cybergate !

dont use inject cybergate or defaut browser .
dont use melt in cybergate
no anti,upx

you add registre key if you want
mutex ok
install serveur ...
crypter "add to startup"

cekmece and othe
you view this error ?
[img]http://jmpasla-co.co.cc/wp-content/uploads/2010/09/23r2wss.jpg[/img]

after pump your file crypt this do not forget ...
with below .exe "file encrypt" .

yes cybergate start 4 notepad no my crypter its cybergate ...

(Sep 15, 2010 09:05 PM)Zmind Wrote: *[CITE]* Its strange because i hade a server online for days and now its gone...but hey still the best crypter there :)
thanks

server plz ?
with cybergate i dont know why this start 4 processus starting .
enables custom inject this week end dont worry .

cekmece - *September 16, 2010, 11:02 am*

@c6p0!!!!
yes i see that error... ..
(Sep 16, 2010 09:51 AM)c6p0 Wrote: *[CITE]* cekmece and othe

you view this error ?
must correct setting like this for cybergate ???
[IMG]http://img52.imageshack.us/img52/520/snap20100916205858002.png[/IMG]
[IMG]http://img256.imageshack.us/img256/4646/snap20100916210532005.png[/IMG]

@c6p0!!!!
do you mention about settings like this ?

c6p0 - *September 16, 2010, 11:05 am*

ok dont use file pumper cekmece if you dont know this.
it is not mandatory.

select your file with below .exe named "File Encrypt ..."
try this !

next update make new guy .

edit:
yes greatings settings cybergate .
just unselect hide file ,use hide file crypter.

cekmece - *September 16, 2010, 11:50 am*
what am i doing ?? thanks for attention i changed it :)

$W1TcH - *September 16, 2010, 11:58 am*
i keep getting error in password, can anyone help me?

cekmece - *September 16, 2010, 2:06 pm*
@c6p0
same error occured with new version... os is windows server 2000

c6p0 - *September 16, 2010, 2:23 pm*
you dont use file pumper ? :)

screenshoots plz error .

cekmece - *September 16, 2010, 2:28 pm*

c6p0 - *September 16, 2010, 3:04 pm*

:D ok lol remove the big screenshoots .
you wrong buttons sekmece .

correct usage for you (private screen :p) :

[img]http://jmpasla-co.co.cc/wp-content/uploads/2010/09/cekmece.jpg[/img]

forget select file binder !

cekmece - *September 16, 2010, 3:10 pm*
now i understand it... i used different window(file pump windows).. thanks... but i want to send screenshots with password what can you do it?:D

c6p0 - *September 16, 2010, 3:11 pm*
yes its Own'Z :D

up megaupload screenshots in .rar with password ?

good night .

cekmece - *September 16, 2010, 3:29 pm*
:D good idea thanks man....

in version 1.3 if you want you can put file pump window under the server windows... thanks for cryter... it is really nice and fud cryter...

$W1TcH - *September 16, 2010, 6:45 pm*
hey pm me again i had a question, if the victim doesn't have .net frame work do they a receive a message. I tried on a test PC, using Prorat and Poison ivy and both came up with an error " cannot find mscoree.dll "
I know the pc doesnt have .net frame work atm.

and thanks again buddy this is an awesome crypter still fud :)

c6p0 - *September 17, 2010, 7:43 am*
yes mini version 2.0 net framworks .
95% machine give this.

yes FUD man ;)

J1nx - *September 17, 2010, 7:43 am*
Thx for the awsome crypter! Still FUD.

And my cybergate server seems to work.

I will try it on another pc this afternoon.

?

My server after crypting :
[v] Do not distribute sample.

new version availiables !

try this new ownz inject !!!

feedback plz !

The Janitor - *September 18, 2010, 2:43 am*
Really nice :] I love your work, But i have one ltitle question. Could you help me with my crypter? I keep getting an annoying error , THanks in advance ^^

Perc - *September 18, 2010, 3:28 am*
Thankyou for changing the inject process ?

saudakur - *September 18, 2010, 3:43 am*
Someone PM me the pass for this. I dont have encrypt/decrypt tool :/

axis10101 - *September 18, 2010, 4:18 am*
ooh, thanks been waiting for the new release, thanks for fixing the notepad :D

just downloaded now, going for a test run

(Sep 18, 2010 03:43 AM)saudakur Wrote: *[CITE]* Someone PM me the pass for this. I dont have encrypt/decrypt tool :/

Google dude

c6p0 - *September 18, 2010, 6:43 am*
oh yes dont forget feedback lol :)

axis10101 - *September 18, 2010, 7:12 am*
Well it seems to inject with winlogon just fine, certainly an improvement over notepad.

Although I do have one question, this could be totally unrelated but when I crypt and bind to another file, when the file is executed regardless of where it is, could be desktop for example. It drops a file named Program files(servername).exe for example Program Filesserver.exe into the root of C:\

Noticed this with the last version too, now is this my settings? possibly my Cybergate settings?

Unsure where it is coming from as the actual server goes into the directory I chose in Cybergate and of course injects as a winlogon process.

flipzic - *September 18, 2010, 8:30 am*
For somehow i scan it with my avast and it detects it a virus and the name of the file is Dc70.exe whats the that?
(anyway no longer fud :()

ovelayer - *September 18, 2010, 8:32 am*
nice release and everything works ... nice change of injection..BUT..not fud.. =(avira smacks it

T?chnology - *September 18, 2010, 8:34 am*
hmm...looks legit..let me give it a try...
~Thanks for sharing it publicly.

blksith0 - *September 18, 2010, 8:46 am*
Ill test if this is still FUD...
And it is!

Some people have 3 or 4 antiviruses detect it.

c6p0, I think you have the best crypter around so far! Promise me you'll keep on updating when it gets detected to make it reFUD?
:D

axis10101 - *September 18, 2010, 12:36 pm*

(Sep 18, 2010 12:29 PM)Zerpkiller Wrote: *[CITE]* Strange, for me only two antiviruses detect it:

:D
I get the same result, with both 1.2 and 1.3 both crypting the same cybergate server.

Ethics - *September 18, 2010, 4:07 pm*

Nice pwd bro.. will keep that... testing now..

c6p0 - *September 18, 2010, 4:11 pm*

yep its FUD now wait few hours release new update, just try nice protection for my code source !

ruko - *September 18, 2010, 4:30 pm*

very nice piece of tool...your the best :)=

Zmind - *September 18, 2010, 8:26 pm*
Huumm guys...i just test it (crypt 1.3) with cybergate in no virus thanks and its no longer 100% FUD...

Avast - win32:malware-gen
Avira - tr/atraps.gen

Noo....

scrawls - *September 18, 2010, 9:56 pm*
waiting>edge of seat

love this crypter

i've been cutting my teeth and learning the ropes with it

c6p0 is da man

?

c6p0 - *September 19, 2010, 4:33 am*
its no easy to find good protect for my code source stub !
with crypter no pb .
my stub fucked by any protection try .

learn now for drop this in memory with codedom.

new stub 26 ko :p

I'm using your old crypter and the stub since it has 2/16 detection

punpunyok - *September 19, 2010, 7:19 am*
Tested it with cybergate but after restarting the victim's pc the server doesn't connect anymore...

c6p0 - *September 19, 2010, 11:51 am*
update

new password :X

too short

The Janitor - *September 19, 2010, 12:19 pm*
Dear god this password is uncrackable ;p

alibaba5 - *September 19, 2010, 12:40 pm*
Got error with decoding,...Gila7

Pass is okay??

c6p0 - *September 19, 2010, 12:46 pm*
copy password first page and paste in

easy:
"wordpad" remove strange caractere

hard:
"notepad" look caracterer non ascii remove this .

tips :
reassembles ascii continous chain

decrypt the result .

obilisko - *September 19, 2010, 12:48 pm*
man i cant decrypt this password....any hint pls

c6p0 - *September 19, 2010, 12:55 pm*
its easy my friends you run your brain 5 min .

ovelayer - *September 19, 2010, 12:55 pm*
ahh very nice update bro.. 1.4 for some reason DOES NOTwork with cybergate and i tried every possible config in the bot and your crypter gonna test on darkcomet 2.1 and spy-net 2.7 after my football game GO CHARGERS!!!

c6p0 - *September 19, 2010, 1:03 pm*
thanks man ;)

too short

The Janitor - *September 19, 2010, 1:06 pm*
What is this, i dont even?

I did with Ascii, than copyd into wordpad, pasted , recopyd it etc etc and i failed -.- PM meh da pass? xD

Edit:

Dude i did all, and came up with pleas

it was final asnwer "pleas" oh wow..

alibaba5 - *September 19, 2010, 1:10 pm*
(Sep 19, 2010 12:46 PM)c6p0 Wrote: *[CITE]* copy password first page and paste in

Got it now!

Thanks bro ?

The Janitor - *September 19, 2010, 1:16 pm*
Urgh, still havent got it o.o this is not working D;

yassine_hell - *September 19, 2010, 1:33 pm*
ok trying it now
but the victim need .net 3.5 too?

pcdoktor - *September 19, 2010, 1:36 pm*
finally.
pleas
but dont work this password.

The Janitor - *September 19, 2010, 1:43 pm*
nope the pass doesnt work lol it fails D:

yassine_hell - *September 19, 2010, 1:50 pm*
didnt works with cybergate ... but as u said detected by avira
hope u find a solution soon

axis10101 - *September 19, 2010, 2:49 pm*
lol took me 3 attempts to get the password haha.

Nice to upgrade the noob protection, might last longer this time. Testing now.

Thanks for the regular updates, really took a liking to this crypter.

sanakin - *September 19, 2010, 3:14 pm*
I found the pass well done working :)) haha

The Civilian - *September 19, 2010, 5:53 pm*
Lol. Nice job with this crypter! I hope it works with Cybergate soon :(

Edit: Everytime I try to crpyt a file I get this:

"Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt"

Er..what does this mean?

Mytchh - *September 19, 2010, 7:55 pm*
lolz. fun password. very easy to decrypt.

Perc - *September 19, 2010, 8:21 pm*
Doesn't seem to be loading Darkcomet or Cybergate servers.

Zmind - *September 19, 2010, 8:39 pm*
huum lets go check the password...

trezx - *September 19, 2010, 8:41 pm*
there must be something wrong or i'm doing something wrong here.
doesn't it start with [spoiler]pleasefe[/spolier]...?

edit: i just reversed the process and got the code from the main page. Password is not working

???™Hawk Eye™??? - *September 19, 2010, 10:08 pm*
I've got This when i try to crypt cybergate
Quote:Erreur : Tentative de lecture ou d'écriture de mémoire protégée. Cela indique souvent qu'une autre mémoire est endommagée. - 07:09:42

The Janitor - *September 20, 2010, 1:13 am*
Hmm... Still bussy decrypting the pass, tried it 5 times now still didnt get it decrypted x) tutorials not helping :x Someone can explain it to me? I dont come any further than Pleas

axis10101 - *September 20, 2010, 1:26 am*
Try notepad, for some reason in Wordpad I couldn't see all of the problem.

after you fix the ASCII string its just like normal.

The Janitor - *September 20, 2010, 1:32 am*
Hmm, Hitman Pro Says the stub is a . Cybergate Backdoor.. No good.

Someone can run it in sandbox? XD

c6p0 - *September 20, 2010, 1:51 am*
ok sorry wrong borlo !
redownload this and try !

forget to add write ressource in memory sorry !

thanks for feedback !

The Janitor - *September 20, 2010, 1:54 am*
Lol you trying to infect us? With your rat ? Someone run stub in sandbox btw edit password! I cant effig crack

c6p0 - *September 20, 2010, 2:02 am*
password its easy man !

look ascii chain and remove code non ascii in the chain reform the chain and good .

Code
%33%72%66%75%67%4C%71%59%41%4E%31%4B%74%46%43%63%66%67%4B%6C%67%65%66%4E%77%7A%4
F%4A%77%57%33%49%33%72%41%78%77%4C%33%4E%66%4E%6E%78%42%38%43%57%66%75%31%38%7A%
78%77%4E%76%65%6E%78%77%4B%77%30%33%72%66%68%30%75%79%59%33%57%31%65%42%41%77%43
%33%72%66%68%67%4C%33%32%66%4E%4F%4A%74%46%43%43%66%75%31%4F%42%65%79%64%33%65%6
E%4B%58%57%33%49%33%72%41%78%77%4C%33%4E%66%4E%6E%78%77%57%33%67%66%54%42%34%30%
75%77%4E%43%7A%33%4B%58%4A%77%73%66%67%4B%4F%30%75%33%4E%76%46%2F%47
copy and past this chain in your wordpad .
look the chain paste . the chain are broken ...
remove caracterer strange,reforme continous chain .
and devrypt this .
the strange caractere do not appears in the php forum .
1 min

no i try with another borlo !
make 6 borlo bro, wrong borlo in .rar sorry for thats .

obilisko - *September 20, 2010, 2:32 am*
cant get the pass to work...fk this shit....

c6p0 - *September 20, 2010, 2:37 am*
hmm yes sorry man !

my next version 1.3 download by 12000 people FUD 4 week .
this password increase detection rate .its for you ! .

edit:
avira bypass ;)
net update include full code in borlo .
borlo in crypter, execute in memory with codedom.

thanks t0fx

flipzic - *September 20, 2010, 2:41 am*

dude a just run the 1.4 and it didn't work and I was late to hear it is backdoored
thats no good man!.. I admired your work.. :(

c6p0 - *September 20, 2010, 2:58 am*

redownload plz added works borlo .
its not backdored bro .

why you said that?

trezx - *September 20, 2010, 2:58 am*

thanks dude. it took only 4 seconds to decrypt

c6p0 - *September 20, 2010, 3:04 am*

download new update dude this borlo 26 ko are old .
hmm yep detected by avira .

winlogon error with a lot!
much less with notepad.

the runpe do not works with winlogon ...
finally i release new borlo with notepad ...

sorry for others people rat dont works with notepad i find another way .

westelko - *September 20, 2010, 4:37 am*

Well people here's something i've tried...i have been testing c6p0 crypter long time....if you ask me it's the best crypter out there...
The only issue is the Startup option...everything else works perfectly in the new release....

Many thanks to c6p0 and i hope and i think you hope too that he will keep the crypter FUD for a long long time.

So let's cut the introduction...and let's go to the main thing....

I am using Cybergate and i have been losing my victims everyday
Why ????Because they restarted the PC and the server was lost forever after restart.

Here's why i'm writing on this thread...cause i'm using this crypter with the new release with cybergate.

So this is what i've tried...and got my victims...not BACK but KEEP the new ones...here's how.

I crypt my server.exe with the OwnZ crypter...after that i infect my victims...nevermind how...

Make your server injection in several ways...here's how:

1.Install Server > Installation directory > System

2.Directory:Choose something by you---my recommendation is:WinDir,Windows,System or System32 --- you choose.

3.File name:Again you can choose...My recommendation is sys32.dll svchost.exe winlogon.exe

4.THE IMPORTANT PART:---INJECT INTO---
First select Default Browser
then OTHER:
Explorer.exe
Winlogon.exe
Svchost.exe

5.Boot:Make sure you check everything

6.Check - Persistance
Check - Hide file
Check - Change creation date
Uncheck - Melt file

7.AND THE MOST IMPORTANT PART:
WITH THESE OPTIONS MAKE SEVERAL SERVERS...SEPARATE SERVERS..NOT THE SAME SERVER AGAIN AND AGAIN...
Actually you're making many server's which you will keep them on some separate folder on your PC so when you infect someone with the original server.exe you do this:

8.When they come online got to the victims name...right mouse click...and select:

Net Tools > Send file and..RUN HIDDEN ---- That's the important part...!!!

Chose your servers one by one and upload it to the victim's PC...after sometime in the cybergate main windows there will be many servers online with the same victim...

The next step to this is:Again click on the right mouse button on the victim's server----anyone you like---

Go to: Extras > Extra options > Miscellaneous > Restart > Execute

Your victim now is gone from the main window...don't panic...he's PC is restarting...

So here's the thing...When he come back online...From ex:10 servers that you install there will be 2-3 max...

If you want to check up your servers look in his process files and active ports...and you will see your server which are working...

You'll see that there's Svchost.exe explorer.exe online...

To test again just restart his PC again...you're up again :)

P.S. Now i'm going to rest my hands cause i got tired from writing :)

P.P.S. Again many thanks to c6p0 for the great crypter...ALL of this credit goes to him.

yassine_hell - *September 20, 2010, 4:47 am*
downloaded the new one ...
works only with triple DES on cybergate and detected by avira ^^
not bad though

-mothered- - *September 20, 2010, 4:55 am*
Looks very Impressive mate. I like the range of checkbox options and the status report on the bottom.
Downloaded and shall check It out thereon after.

Appreciated.

c6p0 - *September 20, 2010, 5:47 am*
plz waiting another sorry .

people find another bug recode this update few hours .
i have bug with my base 64 .
many thanks for feedback .

axis10101 - *September 20, 2010, 6:42 am*
c6p0 quick question, do just the builder need .net 3.5 or the crypted file too?

rolandhd - *September 20, 2010, 8:23 am*
I got an error when i try to decrypt the pass...

Python` - *September 20, 2010, 11:05 am*
Great job, glad you got the bugs worked ouot

Zmind - *September 20, 2010, 12:57 pm*

Where the hell its the link of the download?? i cant find it!!!!

axis10101 - *September 20, 2010, 1:05 pm*
he's removed it while he fixes the error.

Zmind - *September 20, 2010, 1:19 pm*
Ah ok lol but then i am goind to have the password problem...c6p0 why dont u encrypt with the normal mode man....

c6p0 - *September 20, 2010, 2:12 pm*
thanks westelko for this bro !
nice to .

new crypter 1.5 availiables (check first page) !
new stub 25 ko
disables startup for rewrite this FUD ,check this in your serveur .
winlogon inject .

thanks you so much for feedback !

charlie - *September 20, 2010, 2:22 pm*
It looks very nice, i will try out later

axis10101 - *September 20, 2010, 2:33 pm*
Hope this works with the new Dark Comet 2.2,

I'll test on that and Cybergate and let you know how I get on.

gozzila123 - *September 20, 2010, 2:37 pm*
whats the password?

its blank

axis10101 - *September 20, 2010, 2:49 pm*
its in the spoiler tag at the bottom of the post

fuck_VAC - *September 20, 2010, 2:51 pm*
password doesnt work. have you checked it after reuploading?

godtodie4 - *September 20, 2010, 2:59 pm*
Looks very nice i must say c6po..nice and eassy password too..dunno why most people have a problem with it..well still probably better they did nt get the pass right..stay FUD longer that way..keep up the good work bro , ill give it a shot when i get the chance!!!

trezx - *September 20, 2010, 3:01 pm*
password is working, i checked it right now. come on guys, it's super easy.
not working with cernobyl and darkcomet 2.1. However it crypts ok after filepump, but the file ain't working no more

The Civilian - *September 20, 2010, 3:05 pm*
Wow. I just redownloaded the updated version and it's amazing. Again, great job and keep up the good work!

Skuller - *September 20, 2010, 3:10 pm*
i hate you c6p0, i hate u !

gozzila123 - *September 20, 2010, 3:12 pm*
ok testing it now will give feed back soon
very good thank you very much!!!

but how come the one you did before this update (the one that injected into notepad) it was 0 /16

but this one is 1 / 16?

Deja-Vu - *September 20, 2010, 3:23 pm*

gozzila123 - *September 20, 2010, 3:31 pm*
I get this error when I try to Bind.
[IMG]http://i55.[censored].com/357ez4l.jpg[/IMG]
I'm running in VM Virtual Box. Is that why? and I would I fix this?

sohailirfan - *September 20, 2010, 3:47 pm*
password please :(im unable to find it out...
please pm me the pass ill be thankful to you Gozzila.

westelko - *September 20, 2010, 3:53 pm*
Here's the STARTUP solution for the new version----tested and working properly with Cybergate on victim's pc...

Make your server.exe in this way:

1.Install server:Root
2.directory:System
3.File name:Svchost.exe
4.Inject into:Other - Svchost.exe
5.Boot-All checked up
Persistance - checked
Hide file - checked
Change creation date - checked
Melt file - Unchecked

P.S. I haven't tested with spy-net yet...if i do before someone does i will posted here

ovelayer - *September 20, 2010, 3:59 pm*
aww detected by avira lol avira catches the runpe doh

Zerpkiller - *September 20, 2010, 4:53 pm*
when I try to decrypt the first text string from AER-256, it comes up empty.
Could you PM me the pass please?

Pklocus - *September 20, 2010, 4:58 pm*
having troubles with password also, do you mind pming me the password? thanks~!

trezx - *September 20, 2010, 5:18 pm*
(Sep 20, 2010 04:53 PM)Zerpkiller Wrote: *[CITE]* when I try to decrypt the first text string from AER-256, it comes up empty.
Could you PM me the pass please?
are you guys insane? he showed you the arrows of the way he encrypted it...now this is a major spoiler. if you can't decrypt a simple pass then you don't need this program. it doesn't get any simpler than this

axis10101 - *September 20, 2010, 5:33 pm*
Tested Cybergate 1.07.5 and DarkComet 2.2

Both detected by only Avira, which is no surprise

And both function as they should after crypting, not checked if they start back up ok, but they both definately run.

Obs3rv3r - *September 20, 2010, 5:40 pm*
Tested with CyberGate 1.07.5 and it is working :) Thank you for this crypter.

Zerpkiller - *September 20, 2010, 6:04 pm*
(Sep 20, 2010 05:18 PM)trezx Wrote: *[CITE]* are you guys insane? he showed you the arrows of the

Don't talk when you don't know what I'm talking about.
I'm using CRYPO's service, and when I put the encrypted password in the Decrypt AER-256 and hit Decrypt, the field goes blank. Nothing's there.

ap1007 - *September 20, 2010, 6:17 pm*

^^^ my favorite post of all time, maybe

Zerpkiller - *September 20, 2010, 7:35 pm*
Maybe I'm just high on sleep deprivation today...

I've successfully decrypted the passwords for many different programs, but not this one...
maybe I just can't understand the imperfect English :/

trezx - *September 20, 2010, 8:05 pm*
copy the code from the spoiler not the one where it says password and do the decryption in reverse. that's all i'm gonna say cause it's already too much.

phillybiker1022 - *September 20, 2010, 8:21 pm*
i keep getting 'pleas' jesus. im terrible at this.

haxxor:) - *September 20, 2010, 8:28 pm*
lol nice password

and to all the ppl that is having a hard time decrypting the password

COPY AND PASTE THE CODE AT NOTEPAD..thats all im gonna say

EDIT:why am i getting this error
[img]http://i54.[censored].com/nwdps.jpg[/img]

dancefloor4 - *September 20, 2010, 10:16 pm*
What key i must use on aer decrypt??

scrawls - *September 20, 2010, 11:03 pm*
1.5 is checking out so far. no crash in old 32-bit XP. very nice. LOVE the speed of the new encodes and updates. keep up the great work, c6p0

sohailirfan - *September 21, 2010, 4:58 am*
im unable to decrypt, please pm me the pass :(
I tried all AER TIGO ZARA ASCII and rest... difficult characters ...

trull - *September 21, 2010, 6:47 am*
Thanks for the update.
Here you are my results:

OS: windows XP sp3 32bit
RAT: Spy-Net 2.6, CyberGate v1.07.5
RAT settings: No Antis, No icon, No UPX
Crypter settings: server runtime 64bit on, run process 32 bit on, auto EOF on, icon change on, RC4 on,

The crypted server works fine but after restarting the victim's pc it was not connecting anymore.

$W1TcH - *September 21, 2010, 6:52 am*
hey man , do both the victim and the creator need dot net frame work? because when i run the encrypted cybergate server on my other oc it just says missing a mscoree.dll

dancefloor4 - *September 21, 2010, 7:07 am*
thannks nice pass decrypted

The Janitor - *September 21, 2010, 7:26 am*
Now now, Look what i found :]. I started the crypter and my firewall creeped out, it said the crypter tried to act like a server and accept incoming connections, Also its trying to use Microsoft .Net error reporting shim... I dont know if this is good but i guess not x) Someone run it in anubis (Sandbox doesnt show anything)

dancefloor4 - *September 21, 2010, 7:34 am*
i have an error when I try to Crypt cybergate serveur : "erreur:look statut..."
Server setting: no melt and no anti
Crypter settings: all checked except kill task manager,use rc4, no binding
whats the problem??

T3O - *September 21, 2010, 7:38 am*
(Sep 21, 2010 06:52 AM)Fr0stasd3LL Wrote: *[CITE]* hey man , do both the victim and the creator need dot net frame work?
I have the same question, victim need net frame work too? did someone crypt working server for Vista, 7?

Big thx

The Janitor - *September 21, 2010, 7:43 am*
Ok so because of security reasons, i ran the borlo.exe in anubis, this is the report:

Spoiler (Click to View)Quote:1. General Information

- Information about Anubis' invocation
Time needed: 21 s
Report created: 09/21/10, 14:34:17 UTC
Termination reason: All tracked processes have exited
Program version: 1.74.3110

- Popups
Process Window Name Window Text Screenshot Number of Displayed Times
csrss.exe borlo.exe - Application Error OK The application failed to initialize properly (0xc0000135). Click on OK to terminate the application. 1

2. borlo.exe

- General information about this executable
Analysis Reason: Primary Analysis Subject
Filename: borlo.exe
MD5: 3dad36ac2a27907de5b72e02c3d59648
SHA-1: 16e620bbbc9bf0a9a32298368f22fa66c3fd4e13
File Size: 25088 Bytes
Process-status at analysis end: dead
Exit Code: -1073741515

- Load-time Dlls
Module Name Base Address Size
C:\WINDOWS\system32\ntdll.dll 0x7C900 0x000AF000

2.a) borlo.exe - Other Activities

- Windows SEH exceptions:
Description Times
Exception 0xc0000135 at 0x7c96478e
The DLL File it ran, i checked it . I found this on the internet about NTdll.dll

Spoiler (Click to View) Quote:Description: File ntdll.exe is located in the folder C:\Windows\System32. Known file sizes on Windows XP are 138,760 bytes (75% of all occurrence), 216,064 bytes, 241,664 bytes.
The program has a visible window. There is no information about the maker of the file. The file is not a Windows system file. The application is loaded during the Windows boot process (see Registry key: HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Run). Therefore the technical security rating is 42% dangerous, however also read the users reviews.
Recommended: Identify ntdll.exe related errors
External information from Paul Collins:
"ntdll" definitely not required. Added by the BIONET.404 TROJAN!
Important: Some malware camouflage themselves as ntdll.exe, particularly if they are located in c:\windows or c:\windows\system32 folder. Thus check the ntdll.exe process on your pc whether it is pest. We recommend Security Task Manager for verifying your computer's security. It is one of the Top Download Picks of 2005 of The Washington Post and PC World.

Than i scanned the crypter, same results.

Spoiler (Click to View) Quote:Analysis Report for Crypter.exe

Comment on this report

2.a) Crypter.ex.exe - Other Activities

- Windows SEH exceptions:

Description Times
Exception 0xc0000135 at 0x7c96478e 1

I found the Description Times
Exception 0xc0000135 at 0x7c96478e 1

Odd so i researched it.

It seems to be an anti anubis.

Now tell me why does the crypter+the Borlo have an anti-anubis build in?

ALSO. My firewall said that the crypter is trying to act like a server and accept incoming connections, It was also trying to do something with .net error thing. So yeah thats what i found about it .

Explain it to me :]
Further information posted on here:

is 2 times that I told you that my crypter does not work with VMware and antidebugger sandboxie included ...
and is 2 times that you detected the loopback anti debugger.

i repeat egain dont run with any debugger !!!!
protect my crypter code .
remove this next day all private crypt copy my code ...

you what you're looking for?
my crypter deranged you ?

bro delete the crypter now !
and try another thanks .

you have n00b no incoming detection its loopback.
and dont buy crypter private same protect, its all backdored for you.

dancefloor4 - *September 21, 2010, 9:40 am*

c6p0 thanks for this crypter its working for a lot of people they are all happy cause they can infect people easly AND i want to be like these guys BUT i cant!! ive tried all crypter setting and same message!!!!

c6p0 - *September 21, 2010, 9:48 am*

trull check startup in your serveur man .
and check reg or active x startup in your server .

thanks a lot for feedback.

I did it.
The server works well before crypting. After crypting the startup doesn't work.

dancefloor4 - *September 21, 2010, 10:00 am*

lol i dont use it ive tested a lot of setting and always the same message i PMed you more info

c6p0 - *September 21, 2010, 10:03 am*
dancefloor look this ???

ps
copy and paste error you look in the status please .
the fact that .

[img]http://jmpasla-co.co.cc/wp-content/uploads/2010/09/23r2wss.jpg[/img]

trul try this !

"Here's the STARTUP solution for the new version----tested and working properly with Cybergate on victim's pc...

Make your server.exe in this way:

1.Install server:Root
2.directory:System
3.File name:Svchost.exe
4.Inject into:Other - Svchost.exe
5.Boot-All checked up
Persistance - checked
Hide file - checked
Change creation date - checked
Melt file - Unchecked

P.S. I haven't tested with spy-net yet...if i do before someone does i will posted here "

thanks westelko for this great help !

godtodie4 - *September 21, 2010, 1:04 pm*
ok just crypted my spy-net server..only detected by avira.good crypter there mate,job well done..Anyone know a way to bypass avira???iv tried a good few public crypters but they dont stay FUD for long anyways..think i might have to start coding myself..read abit into it but after a bout ten minutes my head just hurts..what language would you suggest is the easiest to learn other than visual basic??

lordnooby - *September 21, 2010, 1:12 pm*
need pw :|
i try to geht the pw for more than 1 hour but nothing works

c6p0 - *September 21, 2010, 1:32 pm*
(Sep 21, 2010 01:04 PM)godtodie4 Wrote: *[CITE]* ok just crypted my spy-net server..only detected by avira.good crypter there mate,job well done..Anyone know a way to bypass avira???iv tried a good few public crypters but they dont stay FUD for long anyways..think i might have to start coding myself..read abit into it but after a bout ten minutes my head just hurts..what language would you suggest is the easiest to learn other than visual basic??

delphi my next language ;) .

avira detected 2 line in the runpe . the runpe its pointeless ...
i dont understand all fonction on this, learn all day .
i find to bypass this just learn to hide my API res or eof.
me code for fun ! work week no time .
only wek-end .

godtodie4 - *September 21, 2010, 1:33 pm*

copy and paste in notebook and follow the instructions on the first page.itz not really too hard at all.if you cant do this simple task then you probably wont know much about the crypter anyway..sorry but thats just the way it is.i did nt understand how to decrypt stuff either when i first started..google is your best friend buddy followed by crypo.com

T3O - *September 21, 2010, 1:52 pm*

Everything work fine on win xp, but when I try install crypted server (DarkComet 2.2, CyberGate v1.07.5) on vista (premium) I got error 'Application stop working' if I set "Run in compability mode for: XP SP 2" servers start normally. Any idea? thx

lordnooby - *September 21, 2010, 1:55 pm*

works the crypter with bifrost?
when i crypt my server the server is dead :s

blksith0 - *September 21, 2010, 4:41 pm*

Well since you asked for feedback, it needs an option as to inject to winlogin.exe. Because you make it do that by default and thats a really stupid thing to do.

> (Sep 21, 2010 01:12 PM)lordnooby Wrote: *[CITE]* need pw :|
> i try to geht the pw for more than 1 hour but nothing works

St33z - *September 22, 2010, 9:15 pm*
i used it for 3 days and it started getting detected.

c6p0 - *September 22, 2010, 9:26 pm*
(Sep 22, 2010 09:15 PM)St33z Wrote: *[CITE]* i used it for 3 days and it started getting detected.
you have v 1.5 its detected by avira .
1.6 its FUD .

redownload this !

ps:
i agree for autoupdate ;)

westelko - *September 22, 2010, 9:34 pm*
hahaha i haven't noticed...you've made another one...very nice bro...and the 1.5 brought to me around 30 victims :) RIP-1.5

hcinou - *September 22, 2010, 9:40 pm*
it's a good crypter i like it

phillybiker1022 - *September 22, 2010, 9:53 pm*
OP, my problem on windows 7 still exists. Random box comes up and server doesnt start. :(. Anyways, good work kid

!

c6p0 - *September 22, 2010, 9:57 pm*
yes i know this problem .
no time last night to recode this .
update this day .

(Sep 22, 2010 09:34 PM)westelko Wrote: *[CITE]* hahaha i haven't noticed...you've made another one...very nice bro...and the 1.5 brought to me around 30 victims :) RIP-1.5
hey :)

yep another one.
one par day lol its a joke :) .

marcfd - *September 22, 2010, 10:07 pm*
do you can help me for the passewords i havce try to decrypt so..

665 - *September 22, 2010, 10:38 pm*
c6p0, I have decripted you password thanks for the update. But as i crypt my cg server, things do go undetectable, But the server doesn't start. An error message. Would you happen to know the fix to this?

Yeno - *September 22, 2010, 11:52 pm*
c3p0 can you help me decrypt the password, or anybody else? Im still new to this, and i really want

to learn it. ?

665 - *September 23, 2010, 1:09 am*
The password is on the first post.. Just decrypt it, Google is your friend, kinda like that first friend you made on the first day of school, yadadamean?

Yeno - *September 23, 2010, 1:21 am*
I have tried to decrypt it, but i fail every time i try. I took the numbers and tried to decrypt it with T-ASCII decode, but the numbers didnt change, it just came out same way. So im kinda stuck here. Kinda like you can be the first day of school, yadadamean? ?

Obs3rv3r - *September 23, 2010, 1:55 am*
Thank you for the new version. :)

westelko - *September 23, 2010, 3:35 am*

Many thanks !
hey unflamed or whoever tested this crypter i am getting 1 problem... can u plz solve my prob ???

while crypting i m getting status error plz tell me y this is happening man -.- its so frustrating after decrypting the code i am not able to crypt my cybergate server plz Help me !!

JasperHope - *September 23, 2010, 12:27 pm*
I'm getting this error:
Code Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 20:27:40
I'm running 64bit Windows 7. Any suggestions?

commander.spy - *September 23, 2010, 12:28 pm*
hey me also getting the same problem !! m also running 64bit windows 7 !!

scrawls - *September 23, 2010, 1:02 pm*
(Sep 20, 2010 04:37 AM)westelko Wrote: *[CITE]* Well people here's something i've tried...i have been testing c6p0 crypter long time....if you ask me it's the best crypter out there...
The only issue is the Startup option...everything else works perfectly in the new release....

Many thanks to c6p0 and i hope and i think you hope too that he will keep the crypter FUD for a long long time.

So let's cut the introduction...and let's go to the main thing....

I am using Cybergate and i have been losing my victims everyday
Why ????Because they restarted the PC and the server was lost forever after restart.

Here's why i'm writing on this thread...cause i'm using this crypter with the new release with cybergate.

So this is what i've tried...and got my victims...not BACK but KEEP the new ones...here's how.

I crypt my server.exe with the OwnZ crypter...after that i infect my victims...nevermind how...

Make your server injection in several ways...here's how:

1.Install Server > Installation directory > System

2.Directory:Choose something by you---my recommendation is:WinDir,Windows,System or System32 --- you choose.

3.File name:Again you can choose...My recommendation is sys32.dll svchost.exe winlogon.exe

4.THE IMPORTANT PART:---INJECT INTO---
First select Default Browser
then OTHER:
Explorer.exe
Winlogon.exe
Svchost.exe

5.Boot:Make sure you check everything

6.Check - Persistance
Check - Hide file
Check - Change creation date
Uncheck - Melt file

7.AND THE MOST IMPORTANT PART:
WITH THESE OPTIONS MAKE SEVERAL SERVERS...SEPARATE SERVERS..NOT THE SAME SERVER AGAIN AND AGAIN...
Actually you're making many server's which you will keep them on some separate folder on your PC so when you infect someone with the original server.exe you do this:

8.When they come online got to the victims name...right mouse click...and select:

Net Tools > Send file and..RUN HIDDEN ---- That's the important part...!!!

Chose your servers one by one and upload it to the victim's PC...after sometime in the cybergate main windows there will be many servers online with the same victim...

The next step to this is:Again click on the right mouse button on the victim's server----anyone you like---

Go to: Extras > Extra options > Miscellaneous > Restart > Execute

Your victim now is gone from the main window...don't panic...he's PC is restarting...

So here's the thing...When he come back online...From ex:10 servers that you install there will be 2-3 max...

If you want to check up your servers look in his process files and active ports...and you will see your server which are working...

You'll see that there's Svchost.exe explorer.exe online...

To test again just restart his PC again...you're up again :)

P.S. Now i'm going to rest my hands cause i got tired from writing :)

P.P.S. Again many thanks to c6p0 for the great crypter...ALL of this credit goes to him.
This has helped me A LOT. I don't have many vics as my spreading skills are still crapola BUT the vics I get I can keep thanks to this method. ?

THANK YOU

_**T**_ - *September 23, 2010, 1:37 pm*
I have read all 40 pages of this thread and tried every suggestion along the way.

THERE IS SOMETHING WRONG WITH THE PASSWORD. EDIT: I was wrong: After successful decryption it turns out it's the way Windows 7 (and possibly vista's) notepad/wordpad renders invalid characters.

It may be that some users have language packs that others do not have installed.

I'll go from the first step:
I copy the code from page 1 and paste it into notepad AND wordpad. Neither show any strange characters or spaces, or anything else:
[img]http://img580.imageshack.us/img580/4112/capture1ql.png[/img]

So I take the code from either one and paste into crypo T-ASCII Decode and hit decode. Both show the same result:
[img]http://img530.imageshack.us/img530/3153/capture2f.png[/img]

So I take the result and paste it into GILA7 Decrypt and get:
[img]http://img831.imageshack.us/img831/4618/capture3up.png[/img]

Which shows an error. I click OK on the error dialog and crypo spits out:
[img]http://img831.imageshack.us/img831/5449/capture4oe.png[/img]

So I put the result in TIGO-3FX Decrypt and get another error dialog, so I click OK and get:
[img]http://img827.imageshack.us/img827/3649/capture5n.png[/img]

At which point I paste the result into AER-256 Decrypt and get:
[img]http://img842.imageshack.us/img842/1871/capture6y.png[/img]

Which throughout the previous 40 pages, other users have ended up at, but which we all know is the incorrect password.

So I am asking, could we PLEASE get an upload that does NOT have invalid characters that we are supposed to filter out in notepad or wordpad, as there are many versions of notepad, and wordpad, all using different language/character packs that obviously some do not have?

If anyone see where I took a wrong step please feel free to call me a noob, then post the correct way.

Edit:

Oh and even most of us "noobs" know not to upload to vt... This is alot of BS to go through before we even know if it will work on a given server...

axis10101 - *September 23, 2010, 2:07 pm*
I have just checked the code and it still works.

Question: If the code in notepad is one continuous string, then why is on 7 lines and not 1?

Try turning word wrap off, looks like you have it on, this is probably adding unneccessary spaces where its doing a carraige return to wrap the text.

arielvw - *September 23, 2010, 2:24 pm*
Hahaha finally i got the password :D

haxxor:) - *September 23, 2010, 2:24 pm*
the code still works

this is happening to me too.

Zmind - *September 23, 2010, 2:36 pm*
yeah the prob its word wrap for sure,turn of to get one line and u will se some spaces and some little strange squares lol

Man i got the password but the f*cking Avira still detects it..i hate avira lol

Man try to bypass Avira and whe will praise you hehehe Ownz Crypter the best cypter ever!! Yeah!

_T_ - *September 23, 2010, 2:53 pm*
I booted into XP and pasted the original code from page 1 into notepad and wordpad and the blank spaces and "invalid" characters appeared in both.
I had already tried with and without word wrap on, it's the win7 (and possibly vista) versions of notepad/wordpad changing the way the text is rendered, due to the invalid characters.

Thanks for the suggestions guys.

For the other users having trouble, there ya go. Find some way to get that first part of the password into a XP version of notepad or wordpad. Do it in a VM, get a friend to do it for ya.. Something.

Password successfully decrypted.

c6p0 - *September 23, 2010, 4:21 pm*
lol shit instant release 1.7 avira detected this :)

hello avira boy 2/1 :)

seven/vista user please try this new crypter and feedback.

good night

665 - *September 23, 2010, 4:45 pm*
I would like to, But once again the code is broken ? I have checked it on notepad without word warp and still.

ovelayer - *September 23, 2010, 5:20 pm*
ahh seems to be working good bro!
wish there was some work around for the RunPE that avira detects..

ap1007 - *September 23, 2010, 5:29 pm*
it still gives me errors

.

_T_ - *September 23, 2010, 5:35 pm*
Darkcomet 2.2
OwnZ 1.6
NVT=1/16 (sample not distributed)

Windows Xp SP3 host:
Runs correctly if DC server is set to create winlogon.exe in system32 using RES. All options in DC work.
Server does not re-run if the OS is rebooted.

Windows 7 Ultimate host:
Server does not run.
winlogon.exe - Application Error
--
The application was unable to start correctly (0xc000010a). Click OK to close the application.
--

Will post back with 1.7 results.

665 - *September 23, 2010, 6:01 pm*
Could anyone confirm if its still currupting(giving errors) ?

_T_ - *September 23, 2010, 6:40 pm*
Darkcomet 2.2
OwnZ 1.7 Using ONLY the startup option. ALL other options turned off, no binding, no icon.
NVT=1/16 (sample not distributed)

Windows Xp SP3 host:
Same as my previous post. I should also add to get it to run on XP I had to turn off Server Runtime 64 bit, and Run process 32 bit.

Windows 7 Ultimate host:
Server now runs as winlogon.exe. Does not connect. Creates Run entry under HKLM pointing to C:\Program Files\cry.exe (my encrypted .exe filename) File is not copied to Program Files though. It is copied to the root of C: under the name "Program Filescry.exe" Persistence is broken, process can be killed in task manager.

Zmind - *September 23, 2010, 7:58 pm*
This his the best one ok, u get only Avira, but i tried every option and it just doesnt run at startup, the victim cant reset the pc..

And with 1.7 now everytime i reset it opens the program file window at startup..

Man try at least to fix the reset problem...like this the rat becomes useless..

665 - *September 23, 2010, 8:02 pm*
I haven't tried it yet, at least this 1.7 version. I'll give it a try once these errors gets fixed

Cryptography - *September 23, 2010, 8:04 pm*
Looks cool and epic I hope I can get this :P

tehdon - *September 23, 2010, 10:52 pm*
Got the pw no problem. Crypted cybergate server on my xp machine and all worked fine.

The server won't run on my vista x64 machine, and I get an error when trying to use the crypter as well, which would lead me to believe this crypter, and the files crypted by it, won't work on x64.

(edit: just read back through the thread a little and noticed it's a known issue on vista/win7)

MoonWalker - *September 23, 2010, 11:05 pm*
wow! thanks, this is awesome stuff ;)

T3O - *September 24, 2010, 12:21 am*
Still doesn't work on vista same error "application stop working"

Pasi65 - *September 24, 2010, 12:39 am*
/close pleas still doesnt work on vista and win 7 same error application stop working

c6p0 - *September 24, 2010, 1:15 am*

I dont understand why you keep updating the crypter but it still have the same bug...

It doesnt work after you reset the pc!!!!

Man cant u fix this? because with this bug the server becomes useless....

665 - *September 24, 2010, 10:12 pm*
c6p0, It would be great if you could spend less time with daily updates(not that there's anything wrong with it), and work on the problem with it not working on vistas and having it from corrupting servers.

c6p0 - *September 25, 2010, 3:26 am*
run great on my vista pro 32 bits !
i dont understand error you have but I is not 64-bit these very hard to fix!
do not run with chinesse pc .

T3O - *September 25, 2010, 3:46 am*
Error CG 1.07.5 + 1.7.1 crypter on Vista home premium x86 I try a lot of settings but nothing help

c6p0 - *September 25, 2010, 3:53 am*
I am inquiring about the forum to find the proper settings for x86 compilation.

NEW KID ON THE BLOCK - *September 25, 2010, 3:56 am*
Mate your crypter corrupted my Cybergate V1.07.5 can you check why?

c6p0 - *September 25, 2010, 3:58 am*
run great with another version crypter ?

JasperHope - *September 25, 2010, 4:06 am*
I'm still getting this error when I Crypt.
Code Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt.
I'm running W7 64bit.

I also get a message telling me to update .NET Framework 4.0. I have updated it and the message is still there.

c6p0 - *September 25, 2010, 4:09 am*
serveur crypted its ?

this error its runpe do not compatibles with your serv or 64 bits OS i am not shure now .
new kid try this borlo and feedback please
http://jmpasla-co.co.cc/wp-content/uploads/2010/09/borlo.rar

hrefman - *September 25, 2010, 4:11 am*
Hi bro! I have win 7 x86 I try to binding random files with istealer 6.3, but don't have a result(if i run before crypting all is good) can you help me please (maybe size of files is too large 50mb??). And can you tell when you update stub if it possible. Sorry for my bad english thanks

c6p0 - *September 25, 2010, 4:13 am*
you have seven x86 and your serv run without binds after crypting ?

try this borlo and feedback please
http://jmpasla-co.co.cc/wp-content/uploads/2010/09/borlo.rar

hrefman - *September 25, 2010, 4:26 am*
no its normaly run before crypting and binding. but it dont works after. I am test it on my pc

c6p0 - *September 25, 2010, 4:36 am*

(Sep 25, 2010 04:26 AM)hrefman Wrote: [CITE] no its normaly run before crypting and binding. but it dont works after. I am test it on my pc
you have error appear in the screen ?
please past here .
crypter run,you crypt your serv with "success!" but dont run after crypting .
correct ?

same error ?
Code Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt.this is the runpe .

but if you have time try this with your x86
http://darkcomet-rat.com/index.php?page=downloads
This free rat server works very well with runpe.

hrefman - *September 25, 2010, 4:40 am*
no error but server dosnt work correctly server not writing logs after crypting on my pc and i have upload it on torrent and have only 1 log from 300 downloads (using istealer 6.3) sorry it my log 0 from 300

JasperHope - *September 25, 2010, 4:44 am*

do not run with chinesse pc .
it is okay if not work on chinese windows ?
I just help to test it.
keep on going ?

commander.spy - *September 25, 2010, 6:23 am*

HEy i have just crypted my server on win 7 x64bit ..

but when m opening my crypted server nthing is happening !! server is working b4 d crypting but afTer d crypting its not WOrking !!

m using cybergate v1.07.5 !!

c6p0 - *September 25, 2010, 7:17 am*

updated !

do not run with anubis for test your serv !
all vb.net dont run with this !.

recode crypter and borlo same code to version 1.6 .

hrefman - *September 25, 2010, 7:58 am*

Thanks bro now its working better! Waiting for new stub pm me)))) Realy thank you for your job

c6p0 - *September 25, 2010, 9:01 am*

no pb !
i have fucked my code withs this problem x86 .
reup old code rewrite new functions and finnally run !!!

thanks all for feedback ! .

colinf - *September 25, 2010, 9:03 am*

Is this still FUD? c6p0 answer back please.

c6p0 - *September 25, 2010, 9:05 am*

last night avira detected this now its 1/32 .
now crypter run ! .

start to find whats avira detected certainely EOF ...

cybergate crypted

Password cracked :)
thanks for the crypter...

c6p0 - *September 27, 2010, 11:37 pm*
avira detected 4 bits ! embedded filesplit and EOF 2 ligne runpe .
i know whats this detected !
just pointless to change this routine ...
i find to use another method .

currentely srv cybergate is detected 1/32 scan4you .
its no bad for a free crypter !,after 25000 download and 2 re-fud ....
withs another srv you get 0/32 sure ....
look buying crypter !
its no easy to FUD crypter with options ...

dont worry bro avira bypass for shure !
just waiting i learn all day.
its my first crypter !!!

and thanks you help and feedback .

Yes, this time, use some other password.

Guiguiche - *September 29, 2010, 12:50 pm*
It works perfectly
Ever 1/16 av, perfect :)

Thank you so much,

Binded files work good, didn't try all the options

c6p0 - *September 29, 2010, 3:17 pm*
1.7.3 the stub (borlo) ...

stub 33ko
new method inject x86 (feedback please)
recode 30% runtime
re-fud borlo
add kill firwall/anti "outpost,nod32,zone alarm,norman,bitdefender"
add borlo "call api by name" this re-fud stub (3 day for learn this lol ...)
hide file

please user x86 feedback ! thanks

yep with 1.7.4 to ;)

week-end i have time for coding :D
add time to time options (relax me lol)
work for bypass avira ;)

recode runtime :/ :)

Sinisterzane - *October 1, 2010, 4:14 pm*
Hi all,

Im used to using galaxy crypter but its dead...If anyone can help me with this cool looking crypter please add me to MSN bowlingo2@yahoo.co.uk

Thanks

The Jase - *October 1, 2010, 5:42 pm*
Hey man, whenever I go to open the 1.7.4 version I get an error. I never got it with the 1.7.3 version. I've tried running it in compatibility mode and no luck yet. I'm running Win 7 64bit if that helps at all. Thanks!

The Jase - *October 1, 2010, 8:38 pm*
(Oct 1, 2010 05:42 PM)TheJase92 Wrote: *[CITE]* Hey man, whenever I go to open the 1.7.4 version I get an error. I never got it with the 1.7.3 version. I've tried running it in compatibility mode and no luck yet. I'm running Win 7 64bit if that helps at all. Thanks!
Never mind this post. I found my error and fixed it. It's working perfect. Great work!

jimbo- - *October 1, 2010, 9:56 pm*
For some reason it doesn't work for me. I try to test the crypted program and it doesn't run. It's just corrupted. Any ideas?

the jester - *October 1, 2010, 10:45 pm*
I know I'm a noob but if I do get the program how would I fuck it up and make it not FUD anymore? I know when to scan it to see if it's FUD and stuff to not give the site a sample of it.. And I always end up with the password being "pleas" - No quotes -
But clearly that's not right.. :\

The Jase - *October 1, 2010, 10:56 pm*
The password seriously is not hard to get at all. Just follow his instructions. He doesn't steer you down the wrong path at all.

c6p0 - *October 2, 2010, 3:38 am*
!

users cybergate your server run but no connections ?
you are wrong settings !
look this
https://hackforums.net/showthread.php?tid=628913

correct usages cybergate and crypter .

seyyarüye - *October 2, 2010, 3:54 am*
Bro anyone tell me how to check this very difficlult password plz tell me :(

Sinisterzane - *October 2, 2010, 6:45 am*
anyone any idea why im getting a error pop up at crypt?

Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 14:46:17

yep !
multi downloader used C:\WINDOWS\Microsoft.NET\Framework\v2.0.50727\vbc.exe for crypte server donwloader !
included in all OS net 2.0 .
this is the compiler for framworks ...
server downloader make by this is fully undetectables for long ...

server downloader startup use vbc.exe egain for run .

thanks you so much for feedback !

fr332play - *October 3, 2010, 4:20 am*

help how i infect my self ad cure is not working

c6p0 - *October 3, 2010, 4:26 am*

you write correct process run in cure ?

if you add startup in your bot/rat/keylogge
dont work man .
use only options crypter for test your server himself .

remove manually the key added in registre by your rat.

fr332play - *October 3, 2010, 4:30 am*

is there any other way i just want to unblock download.microsoft.com thats all

c6p0 - *October 3, 2010, 4:36 am*

yep cure clear host !
cure blocked by windows ? shure !

go to C:\WINDOWS\system32\drivers\etc
edit your files named host .

Bacardi - *October 3, 2010, 4:39 am*

Still. Nice crypter ;)

fr332play - *October 3, 2010, 4:49 am*
(Oct 3, 2010 04:36 AM)c6p0 Wrote: *[CITE]* yep cure clear host !
cure blocked by windows ? shure !

go to C:\WINDOWS\system32\drivers\etc
edit your files named host .
tried that one but nothing is wrong on hosts file

c6p0 - *October 3, 2010, 4:56 am*
remove all !

just only one not removed this

127.0.0.1 localhost

lemondragon - *October 3, 2010, 4:56 am*

OMG I need this xD
But I'm stuck on decrypting it...

A Honey Badger - *October 3, 2010, 7:21 am*

(Oct 2, 2010 03:01 PM)Sinisterzane Wrote: *[CITE]* Im having the same problem with the form 1 pop up..thats when someone elses crypts for me as I get "rreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 22:26:45" when i try to crypt myselfthe file is clean and i havent had any1 else try to crypt for me. I think the memory is corrupt as my wow often crashes due to this how can i fix that?

Also is there any other possibility to the form1 to fix it

c6p0 - *October 3, 2010, 8:16 am*

with seven/x64 little buggy with some server .
run great with other .

its no perfect shure !
debug this when I have a 64bit pc seven.
now bypass avira after this fix 64bits .
one par one lol

U MAD CUZ I RUN XBL? - *October 3, 2010, 8:18 am*

c6po est meme pas cool est ma fais de l'arcement sexuelle.

daffi23 - *October 3, 2010, 8:41 am*

Holyshit, took me 2 days to figure this one out... Yes yes yes, I AM the noob this needs protection from, ha!
Nice pw ;)

c6p0 - *October 3, 2010, 10:36 am*

new version 1.7.6

usb spread activated .

Tortenmann - *October 3, 2010, 10:48 am*

You are so awesome.I love your program.It works very good.I love all the functions.

EDIT: But I have one question.How does the Usb Spread work?

A Honey Badger - *October 3, 2010, 11:18 am*

good work. I dont think it cryps in win7 64 bit tho. Non of the different rat programs im using work they all open form1

Dumbo - *October 3, 2010, 11:27 am*

(Oct 3, 2010 11:18 AM)zack2145 Wrote: *[CITE]* good work. I dont think it cryps in win7 64 bit tho. Non of the different rat programs im using work they all open form1
Bind later using the bind option in the crypter not on the rat/keylogger/stealer

it will work fine

A Honey Badger - *October 3, 2010, 11:45 am*

c6p0 - *October 3, 2010, 12:27 pm*

thanks ;)

(Oct 3, 2010 11:45 AM)zack2145 Wrote: *[CITE]* im not using a binder at all.
try this, crypt your server with startup activated.
upload server hosting you choice direct .exe download .
examples "http://localhostr.com/"
use downloader for droop your server .
if you want insert direct link .jpg first,and your server second and make downloader server .

Blackfall - *October 3, 2010, 3:00 pm*

Win 7 x64 still same probs with Form1
I have created a Server without anything (no installation,no antis, no bind, no melt,hide and so on)
same at your crypter... only 64bit support and run 32bit
I hope u can help me if its my fault or if not plz try to fix it.
I use Cybergate

jonathan3698 - *October 3, 2010, 3:02 pm*

im using windows vista x64 and blackshades and this doesnt work..But anyways its a free crypter so idc XD

yes i know !
for moments fix detection with avira .
with seven 64bits problem starts with some server .
else works fine .
fix this its hard so I do not have PC 64bits with seven for debug this .
just waiting find this .
here is nobody seems to want me i was throwing stones:)
so i must learn everything from A to Z myself.

DarkKoopa - *October 4, 2010, 10:13 am*
Any tip where I can remove the strange characters of the password? I can't find the option for it in the notepad/wordpad in Windows 7 :(
It's pity that Avira still detects it but keep up your good work

lanutellamipiace - *October 4, 2010, 10:26 am*

There is only no-ip one, my IP isn't there)

Anyway, with this config darkcomet works well, when i crypt it it gets unusable :\ I tried different settings and it never work...

c6p0 - *October 5, 2010, 2:39 pm*
new update !

1.7.7
new login form (from aeonhack thanks bro),
no time to complete remake gui.

fix little bug in code,rename api and functions ,re-add native call dll.
added multibinder (de-activated)
check username password
added autoupdate not workings now (de-activated)

new password

chootka - *October 5, 2010, 3:46 pm*

Link dead brother... Can you please re up it somewhere else :(

haxxor:) - *October 5, 2010, 4:21 pm*
FINALLY a hard password to decrypt

nd nice crypter

scrawls - *October 5, 2010, 5:52 pm*
I like where Own'z is going. Keep up the good work. The new password makes my noob brain work a bit. I don't mind. The protection is worth it.

jimbo- - *October 5, 2010, 7:39 pm*
Can anyone tell me the settings I have to use for this crypter to work on metus servers? It works or me with cybergate but not metus

scrawls - *October 5, 2010, 11:19 pm*
hey i'm noobing hard right now. i know how passwords decrypt...or i THOUGHT i did. just want someone to confirm that i'm using the right rc4 key is it

(/-^}+(|@#(;?>+/)"]

beginning with the parenthesis and ending in the bracket, no spaces?

i'm just getting slammed right out of the gate trying to decrypt and starting to wonder if i'm reading it wrong.

chootka - *October 6, 2010, 1:43 am*
can somebody give me a mirror please ? i can't download it :(

Same here, damn! I want newest version too. :(

The Dane - *October 6, 2010, 8:14 am*
It just gives me an Error when i try to decrypt the pass :S

c6p0 - *October 6, 2010, 9:49 am*
hmm ok to hard !

moment renew password and version crypter .
waiting .

The Dane - *October 6, 2010, 9:54 am*
Ohh okay, you go do that :)

kaleman_68 - *October 6, 2010, 10:22 am*
(C6p0)

You Crypter works with Cerberus RAT.
Good work.

c6p0 - *October 6, 2010, 10:53 am*
ok thanks for ceberus updated first post !

ok new password added with ascii dont forget remove strange symbol ;)
redownload this, re-activated Own'Z Tool'Z .

arielvw - *October 6, 2010, 11:32 am*
thanks, best free crypter i found 'till now!!

c6p0 - *October 6, 2010, 2:27 pm*
thanks you ?

new update 1.7.8

fixed bug crypter with .exe buttons .
other bug with new form .
activated check update .
download update (no finish)

thanks you

hammer8847 - *October 6, 2010, 2:53 pm*
What do you mean by strange character? are you talking about the %?

c6p0 - *October 6, 2010, 2:58 pm*
no,
look chain ascii and find the character that have nothing to do the ascii ...

continous chain .

axis10101 - *October 6, 2010, 3:14 pm*

is this FUD at the moment c6p0 or still detected by Avira?

Not sure if the novirusthanks scans are updated on the 1st page.

c6p0 - *October 6, 2010, 3:25 pm*

detection its same
server crypted 1/32 scan4you
no detection for borlo and crypter.
no find for moments good way FUD longer to bypass avira.

new crypter :

before, there are errors in the code posted in the spoiler in post #1.

Fix it 1st then decrypt.

`P R O D I G Y™ - *October 6, 2010, 4:42 pm*
Epic release is epic, good work OP.

Obs3rv3r - *October 6, 2010, 4:42 pm*
Why did you put this login form?
I cant crypt if my Internet connection is down or your site is down.
It was better without it in my opinion.

hammer8847 - *October 6, 2010, 4:47 pm*
"Attempted to read or write protected memory. This is often an indication that other memory is corrupt" happens with my cybergate server, running win 7 64 bit

Any fix?

r3s3t - *October 6, 2010, 5:23 pm*
didnt work for me with blackshades, testing on win 32bit win 7. anyone else have this problem? the last edition seemed to work fine. thx for all your hard work!!

s00ky - *October 6, 2010, 6:52 pm*
whet I decode t-ascii, i get this code
Code
vzAiODvevDUgNDwlvjvgvTLjuj%4CkNT5eNzApOD5hODwgvjUhujqkO%7AwnuT5lvjvmvD0lvjUiNyGmNDLiuT0gOzwnvTqiNz5jujqgvjAguT%41nNzLjvDUpvz5mviGhvDqmviomN%548jNTAovD0pvz8fvzwpNDweNjAjvj8lODvpNDvkujqhvT0huTwovz%51jvjLivT0oOw//
When I try decode to ESAB-46, i get new window... Say: error in decoding

please help

flipzic - *October 6, 2010, 8:45 pm*
you got some misspelled words in your crypter like for example kill firwall

shafi - *October 7, 2010, 12:40 am*
blackshades server does not get work on win xp sp2 32bit

any advise?

fr332play - *October 7, 2010, 2:26 am*
ca you please tell what is the best server option in cybergate when using our crypter thanks

SyntheZ - *October 7, 2010, 2:39 am*

Bro, where i can register to login ur cripter?

BTW little bug with login form, when i put on the "show password" option, it shows thelogin instead of pass)

prajulm - *October 7, 2010, 6:17 am*
dude the login info is on the first page itself!!! look properly!!
BTW hey wen i try to crypt my server, it gives me an error telling me that - attempted to read/write protected memory and that the memory is corrupt...any idea y?

bongchilla - *October 7, 2010, 6:58 am*
after many trys i get only donéÌ?ÈÄ) why you fail so hard in encrypting? :(

or me fail in decrypting? =D

r3s3t - *October 7, 2010, 7:27 am*
I asked earlier but has anyone had luck using this with the newest version of blackshades? It didn't work for me using both encryption types. Everything looks fine and says it's crypted but I get errors (two different ones, depending on the encryption used) when attempting to run the resulting executable.

Also to answer the question how do you register for the user name, I logged in using the image on the first page, where it says Public 1.8.3 or whatever version it is. That and the "encrypted" password. Also, I'd assume he's testing out this logging in process because maybe he's close to making this a pay to use service?

bittu - *October 7, 2010, 7:38 am*
what is the keypass for ezip64 decoding. ??

c6p0 - *October 7, 2010, 8:15 am*
login :

Public 1.7.8

password you decrypt this its easy same method last password .
look chain ascii remove space and caractereres no ascii .

look this
https://hackforums.net/showthread.php?tid=628913

settings for crypt server correctely .
yes for cybergate ! its same for all RAT .

(Oct 6, 2010 04:42 PM)`P R O D I G Y™ Wrote: *[CITE]* Epic release is epic, good work OP.

you use seven 64 bits.

crypted server run/not run with this windows, it depends on the server using.

i say this 100x .

waiting for update this .

time to take home seven x64 .

(Oct 6, 2010 04:42 PM)Obs3rv3r Wrote: *[CITE]* Why did you put this login form?

I cant crypt if my Internet connection is down or your site is down.

It was better without it in my opinion.

Own'z Crypter is a victim of its success

I am forced to like that.

sorry !

just for garantee FUD longer and desactivate old version .

hf user use this crypter 15000/20000

i have 51300 user ...

35000 leecher .

The Janitor - *October 7, 2010, 8:33 am*

Hmm, after doing everything you said, i still couldnt decode it. As you may know, i am still trying to scan your files, the previous ONE Was clean,

Im sorry but it's just for security, you know where the topic is :]. Still having hard time decrypting this tho..

c6p0 - *October 7, 2010, 8:36 am*

not of course you're right!

post your scanner to put the first post updated!

thank you

edit :

login connection to santrex hosting (co.cc)

same domaine you download crypter .

The Janitor - *October 7, 2010, 8:37 am*

Ehm thats the point, i failed at decrypting the pass, if you could PM It to me, this way i will do anubis scans, sandboxie scan it with AVG, hitman pro,malware bytes and test if there are any outgoing connections ^^

c6p0 - *October 7, 2010, 8:41 am*

i send you pm !

feedback your result thanks .

(Oct 7, 2010 02:39 AM)SyntheZ Wrote: *[CITE]* Bro, where i can register to login ur cripter?

Now starting the program:

[IMG]http://img227.imageshack.us/img227/654/proofedyproof.jpg[/IMG]

Uploaded with ImageShack.us

Translation:

Crypter.exe Could not be recognized and is trying to connect with the internet. If this is one of your daily used programs you can accept it.

Port 80 , could be the following things:

RAT
Keylogger

OR Because of his Log - In Thing

Could be safe, not sure tho

Use at own risk

c6p0 - *October 7, 2010, 9:07 am*
you forget to try multi downloader,new engine !
yep port 80 for auth/and check update .

this ip --> niglo-land.co.cc

thnaks, you find new detection for my borlo !
great !

The Janitor - *October 7, 2010, 9:14 am*
i did a whois on the IP it's connected to RIPE company or something, 3 german guys.

c6p0 - *October 7, 2010, 9:15 am*
lol its offshore hosting .
you are n00b ?

please past scann downloader !!!

pawnedbro - *October 7, 2010, 9:19 am*

I am only getting Avira. ?
It's all good ? ?

[-True-] - *October 7, 2010, 2:28 pm*
when i try to crypt cybergate it gives me an error.

running windows 7 64bit.

- ... Start Encryptions ... - 5:26:50 PM
Insert Code Antis ... - 5:26:50 PM
Check File Bind : C:\Users\Anton\Desktop\1.7.8\1.7.8\Raw.exe ok 5:26:50 PM
Encrypt Files ... - Ok 5:26:50 PM
Make : C:\Users\Anton\Desktop\1.7.8\1.7.8\server.exe Ok 5:26:50 PM
Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 5:26:50 PM

my server injects into services.exe so idk if thats the problem.

Royac - *October 7, 2010, 2:36 pm*
I have the same problem... it says "Attempted to read or write protected memory. This is often an indication that other memory is corrupt"

c6p0 - *October 7, 2010, 4:26 pm*

I've the same problem than you
But my server perfectly working
just ignore it

Ps : test the new borlo now only avira detect it again and again lol
but i don't care 1/16 is a really good result for a free crypter updated nearly every 3 days
thanks c6p0 you're doing a very good work

new update new borlo
My antivirus ESET NOD32 detects new borlo.exe as MSIL/Injector.AT Trojan

SIM-474498 - *October 7, 2010, 7:11 pm*

Everytime i try to Crypt my Dark Comet server it always corrupts my server =/

medo234 - *October 7, 2010, 8:18 pm*

TY, LOOK NICE :)
I WILL TRY LATER.

Hypnox - *October 8, 2010, 2:32 am*

It looks very nice but when I crypt my server the "Auto startup" doesn't work anymore if it's ticked or not. (I have auto startup from cybergate in the server already).
Anyway thanks for such a great job and nice pass btw ;-)

c6p0 - *October 8, 2010, 2:39 am*
startup run great !

look this
https://hackforums.net/showthread.php?tid=628913
correct settings with cybergate and crypter.

(Oct 7, 2010 07:11 PM)Darkslyde11 Wrote: *[CITE]* Everytime i try to Crypt my Dark Comet server it always corrupts my server =/
OS ? bug with seven 64 bits .
another os darkomet last version run great .
look
https://hackforums.net/showthread.php?tid=628913

same settings for all rat with crypter .

(Oct 7, 2010 05:32 PM)Obs3rv3r Wrote: *[CITE]* My antivirus ESET NOD32 detects new borlo.exe as MSIL/Injector.AT Trojan
yes i view this morning .
wait for update .
please post your scann .

crypted server same detection 1/16

xms - *October 8, 2010, 3:17 am*
Are there any news about working with the actual blackshades version?

trull - *October 8, 2010, 7:55 am*

Same results here. My cybergate server works well without crypting or crypted with another crypter but if I am using "Own'z Crypter" the startup doesn't work.

#Daniel - *October 8, 2010, 7:58 am*
Thank you for sharing with as!
I will download it later and tell you what I think about that.

Quote:little world tour with your Own'Z crypter
http://www.google.lu/search?hl=fr&source...che+Google Wau! So many leechers!

p.s. This new password was hard. So many non ASCII characters but I managed to decrypt it.
I tested this new version with CyberGate and everything is working nice and my antivirus eset nod32 don't detect this :) Good job!

shadow - *October 8, 2010, 5:06 pm*
The decrypting part i understand on the password. Its the removing the ascii characters im stuck on. Sorry to be such a noob xD

Zmind - *October 8, 2010, 5:42 pm*
Hey ppl i have a question to make, i have several servers runing...and before the crypted server (by Own´z Crypter Power!)
was almost FUD, but now several antivirus detected it...

and my question his : Does the antivirus detect the server after its installed on the pc??

Because i am afraid of updating the server...and some bug appear and lose the victim..

And to update on cybergate its just right click - server tools - update server - local file or url

Just that?

tvergov - *October 8, 2010, 10:52 pm*
its fud, except avira again :)
thx dude ;) great job again ;)
Works on cybergate ;)

Ice313 - *October 8, 2010, 11:27 pm*
Thanks c6p0 have my babies :D

Garrelf - *October 9, 2010, 12:27 am*
Thanks a lot for your work !!!

Because i am afraid of updating the server...and some bug appear and lose the slave..

And to update on cybergate its just right click - server tools - update server - local file or url

Just that?i update everytime i get a undetected virus still i didnt lost any of my victims so dont think you will lose them ;) just update them
and yes the AV detects your server after its installed ;)

pawnedbro - *October 9, 2010, 1:56 am*
what is meaning of this "copy and past password in your notepad,remove space and caracter no ascii ...
continous uniques chain."

c6p0 - *October 9, 2010, 3:03 am*
one bug with autoupdate .
i make download buttons with .exe
the file download its .rar .

save login/password run just my home.
i forget add my.settings.reload

if you have bug with login or autoupdate go to
C:\Documents and Settings\\Local Settings\Application Data\\
delete settings.xml

i forget to activate link (update) to this post in auto updater

Is that right ?
for use crypter you need to install net 3.5 .
your server crypted run with all version net 2.0,3.0,3.5,4.0

shadow - *October 9, 2010, 8:01 am*

I have tried decrypting the password starting at ATOM-128. Doesn't work. Tried the other way starting with T-ASCII. Didn't work. That means i have to get rid of the % or ascii characters first then try decrypting, right?

EDIT: Ok I just understood something. Tell me this though, is % an ASCII character?

Trial - *October 9, 2010, 8:07 am*

(Oct 9, 2010 08:01 AM)shadow Wrote: *[CITE]* I have tried decrypting the password starting at ATOM-128. Doesn't work. Tried the other way starting with T-ASCII. Didn't work. That means i have to get rid of the % or ascii characters first then try decrypting, right?

Yeah, and so is ?, I don't really get anything here.

Guiguiche - *October 9, 2010, 8:09 am*

You just need to delete character ,? spacebarr

Then you decrypt ;)

shadow - *October 9, 2010, 8:09 am*

I got really close, but i must have got rid of something. SO CLOSE!

FINALLY! Thanks so much dude, I was foolish because I didn't read your instructions xD

Trial - *October 9, 2010, 8:11 am*

(Oct 9, 2010 08:09 AM)shadow Wrote: *[CITE]* I got really close, but i must have got rid of something. SO CLOSE!
I deleted the ?'s then I decrypt this way <- starting with T-ASCII

I got the final result of:

coded-by- *Õ

So I'm working on it! (Maybe remove all ?'s in each section of decryption)

c6p0 - *October 9, 2010, 8:12 am*

very nice crypter, i recommend you sell this! this is very nice and easy to use so far!

keep up the good work!

misscute - *October 10, 2010, 7:25 pm*
what is the pass word of the crypter
can any body gave password

jimbo- - *October 10, 2010, 7:29 pm*
(Oct 10, 2010 07:25 PM)misscute Wrote: *[CITE]* what is the pass word of the crypter
can any body gave password
Give me one good reason why anyone should give u the pass? Oh and the crypter doesn't work with dc or metus

misscute - *October 10, 2010, 7:32 pm*
iam new one user of hacking lobby

Pklocus - *October 10, 2010, 7:51 pm*

Learn how to decrypt, or get more post and rep. :D then maybe the owner of this thread will be nice enough to give you. but with 10 post and 0 rep everyone knows your going to upload to virustotal.

zyancow - *October 10, 2010, 8:57 pm*
Amazing tool, thanks so much for sharing your work.

Tbird253 - *October 10, 2010, 9:17 pm*
im receiving an error im running as admin and running x64 vista trying to crypt cybergate server
Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt

any help? tips/suggestions
and no im not a douche'e little kiddie thats going to upload to virustotal ive been on this site for a year just reading not posting

Ebonics - *October 10, 2010, 9:27 pm*
i have decrypted the password for the most part but can i pm someone to see how close i am? there are clear words but i'm not sure what im missing

Tbird253 - *October 10, 2010, 9:29 pm*
its easy just take out ? and space's

clovis - *October 10, 2010, 10:16 pm*
omg that pass -__- xD took me years to get it

axis10101 - *October 10, 2010, 10:48 pm*
I see you finally managed to bypass Avira,

well done :)

Ruffa - *October 10, 2010, 11:06 pm*

Doesn't work with Dark-comet.
Could you fix this please?

zyancow - *October 10, 2010, 11:44 pm*
Tbird ignore error, it will work just fine.

rocketmac - *October 11, 2010, 12:27 am*
Thank you, man! It is FUD! Hope stays this way for long!

c6p0 - *October 11, 2010, 1:53 am*
if you have bug startup crypter .

go to C:\Documents and Settings****\Local Settings\Application Data**

delete settings files own'z crypter (remember password/user)

ProfoundZeus™ - *October 11, 2010, 3:39 am*

** JIT Debugging **
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

I am Running Windows Server 2008 SP2 Build 6002, 64bit version.

c6p0 - *October 11, 2010, 4:03 am*
delete rep, settings.xml !!!

(Oct 11, 2010 08:35 AM)XxTheGenocidexX Wrote: [CITE] lost all my bots -.,-' updated my server lost like 50 bots awsome -,-'
Are you a moron?

Never update always download and execute.

XxTheGenocidexX - *October 11, 2010, 8:51 am*
it always worked with update when you download and execute you get 2 times the same bot -,-'

Ruffa - *October 11, 2010, 8:52 am*
Then uninstall the old server.

Edit: Still doesnt work with D-C!

XxTheGenocidexX - *October 11, 2010, 8:53 am*

hmm well will do that then :/ but still with all the other crypters it worked :/

JAMy - *October 11, 2010, 9:17 am*
first i have to thank you fopr this good software you made...

But i have a Problem when i am crypting my Cybergate 1.075 Server. The server is FUD on NVT BUT when i execute it on some of my victims avira still gives a message back that it found a virus. Maybe i have to change sth. in the config? Could you tell eme please? :)

KEEP UP THE GOOD WORK! :-DDD

-JAMy

c6p0 - *October 11, 2010, 9:25 am*
annyone for test this new borlo ?
with darkcomet,cybergate please
me tested with cybergate works
no options crypter activated (only pre-activated)
crypt rc4 no bind .

[img]http://niglo-land.co.cc/cyb.jpg[/img]

same password crypter
http://niglo-land.co.cc/borlo.rar
warning this borlo works only with crypter 1.8.1

waiting result .

thanks

screenshoots error please
or past here complete ! error you have .
i dont know all os ! i know local settings xp !
another OS its possible another rep/name ?

you 1.8.1 ?.
old version its desactivated !

SIM-307931 - *October 11, 2010, 9:45 am*
(Oct 11, 2010 09:29 AM)c6p0 Wrote: *[CITE]* you try new borlo ?
name RAT you used
Well, what do you mean? I don t use borlo, sorry for noobish statement, but I even don t know what it is ^^ (You didn t write about it in 1st post, did you?) I ve just tried new version of your crypter, it works fine, but in next update it d be really nice if you gave some icons pack ;>
I use XP and Cybergate 1,07.5, well now it works fine, no errors occured, it must have been soething with my comp ;/

@edit. Well I suppose borlo is just a stub right? :)
Anyways, thanks

XxTheGenocidexX - *October 11, 2010, 9:48 am*
borlo.exe is the stub the crypter auto runs it dano thats why you dont need to use it ^^

c6p0 - *October 11, 2010, 9:48 am*
(Oct 11, 2010 09:43 AM)Ruffa Wrote: *[CITE]* It doesn't work with dark-comet 2.2 it opens a form ;)
ok hmm strange .
new runpe no works with darkcomet !
me download now darkcomet and search for find solutions .

Always - *October 11, 2010, 8:34 pm*

im using cybergate latest public version and when the slave computer is restarted it loses connection and never connects again unless you open the server again. Are there specific settings I should put in cybergate or the crypter, please be descriptive on which ones, and also which keygen/encryption do I use? Triple DES or RC4. Also does it matter if I bind a file because I have tried binding one and not binding, but restarted the computer still loses connection from slave and never reconnects.

Has anyone else tested the restart? Also is it possible, that I have tested too many servers on that one computer so when I restart it doesn't connect?

And what directory should the server be saved and injected to?

Thank You, please help!

The updated version of crypter said the restart bug was fixed but still not working for me, please test and/or send screenshot of cybergate and crypter settings used when making and crypting the server.

Thanks!

lots of people are having this problem losing bots and such just wait it out for more info

c6p0 - *October 11, 2010, 9:15 pm*

i have personnaly tested darckomet 2.2 and cybergate 1.7.5 yesterday .
darcomet full works/restart with defaut settings .
defaut settings !!!

cybergate to defaut settings !!! works/restart all time,with upx works,with options cybergate works (no anti) .
checked all options cybergates all options crypter works !
[img]http://niglo-land.co.cc/cyb.jpg[/img]

you are wrong settings !
or you are fuck seven 64bits .
with this works/dont works .
just bind server use triples des and works .

and read post !
i say new runpe ! new runpe = new settings for your rat !
old settings = old runpe ...

a lot user confirm no pb with cybergate/darcomet ! .
its not my fault if you dont know how to config RAT with crypter.

Always - *October 11, 2010, 9:25 pm*

(Oct 11, 2010 09:15 PM)c6p0 Wrote: *[CITE]* i have personnaly tested darckomet 2.2 and cybergate 1.7.5 yesterday .

you are wrong settings !
or you are fuck seven 64bits .
with this works/dont works .
just bind server use triples des and works .
by (no anti) do you mean I should disable everything in the anti-debug tab, and do I have to use upx? I was using RC4 before maybe that was the problem...also it doesn't matter what directory-filename I use, and also the Boot fields where you put Windefender, I can put anything?

Thanks a lot for helping me!

I will be trying again with the settings you have soon, but also waiting for reply on this.

Thanks!

c6p0 - *October 11, 2010, 9:27 pm*

this settings its no important !
use this yesterday for test my server cybergate before update 1.8.2 .
use another if you want ! works .

evanejk - *October 11, 2010, 9:39 pm*
that was a pain
thank god for crypo.com
lol i right clicked to run in sandbox, and accidentally ran it as administrator. Hope it's clean.

Garrelf - *October 12, 2010, 12:30 am*
Hi, again me ...
I tried many things and it still does not work!
I'm under Seven 32bits and i try too on XP SP3.
I have reproduced exactly the same configuration as your image.
I started from a fresh install of CyberGate.
I use your last release of crypter.
I bind with an other soft, put an icon, check all options and encrypt Triple DES.

I Try my binded server localy, and doesn't restart after restart my PC.
I Try too on my XP and it's the same ...

What is wrong ?
I'm so lame as that ?

Thx^^

XxTheGenocidexX - *October 12, 2010, 12:51 am*
it seems that it corrupts the server of cybergate :/ (yes i have the normal settings! and it still corrupts it)
could you please take a look whats wrong :/

Always - *October 12, 2010, 12:56 am*
im thinking there might have been a slight difference in the crypter that was tested and the one that was released or the restart bug wasn't completely fixed, I haven't tried yet but this is based on others' posts.

Although I could be wrong so don't take my word for it.

Thanks for your continuous support and making this great crypter c6p0, hope it will be working for me tomorrow or very soon!

zyancow - *October 12, 2010, 1:00 am*
Works fine for cybergate on my Windows7 64bit. You will get and error but if you go test it, it will work just fine.

Braco Asshole - *October 12, 2010, 2:37 am*
Good crypter, Looks perfect.
Thanks.

Vincenzo? - *October 12, 2010, 2:37 am*
Thanks for releasing this free also sexy gui !

yep me dont test all rat bro !
user say this in this topic .
update first page .

hey man, i have changed my runpe in my crypter its no perfect now for sure .
but its FUD .the settings you used with old runpe its obsolete .
use defaut settings your rat or remove all options !!! create server.
remove all options crypter crypt this and test this .
you have 64bits seven ?

jimbo- - *October 12, 2010, 10:23 am*

no i have 32 bit XP OS

too short
its running on SP3 so it should be fine

c6p0 - *October 12, 2010, 10:24 am*

this is a bot ?
keylogger ?
RAT ?

jimbo- - *October 12, 2010, 10:26 am*

i guess metus is considered a bot. It's used for infecting other people in order to DDoS

c6p0 - *October 12, 2010, 10:31 am*

delete your config server all settings defaut just check localhost i crypt this.
send me pm
you view error starting your crypted bot ?
form1 ?

jimbo- - *October 12, 2010, 10:36 am*

there is no error. it just doesn't run. i check system process after i click it and it doesn't show

anything. Nor does it show anything in Metus
ill try again

too short..

c6p0 - *October 12, 2010, 10:43 am*
ok ok try
send me link to metus client free ?

jimbo- - *October 12, 2010, 10:45 am*
just go to my ddosing tutorial. its in my sig. i have a free dl there

c6p0 - *October 12, 2010, 10:47 am*
shitcash lol
no bro thanks

Ruffa - *October 12, 2010, 10:49 am*
Lol.

I can download from Shitcash for you c6p0.

Could you send me the pass then?

Rishabh - *October 12, 2010, 10:50 am*
I hope your server is back soon. Need your crypter ASAP.

c6p0 - *October 12, 2010, 10:53 am*
no thanks ruffa !
explicit give me $ now for debug this :p
(Oct 12, 2010 10:50 AM)Rishabh Wrote: *[CITE]* I hope your server is back soon. Need your crypter ASAP.
waitings rep owner hosting for me i dont know local time this guy .

bursk61 - *October 12, 2010, 10:57 am*
can you pls upload on mediafire

c6p0 - *October 12, 2010, 11:00 am*
read first page dude without auth crypter dont works .

Ace of Spades - *October 12, 2010, 11:08 am*
That pass is deff n00b proof xD

jimbo- - *October 12, 2010, 11:09 am*
hey c6p0 srry i got a direct dl link for u to test with metus. srry bout tht:

http://www.mediafire.com/?jbkf2o523offtjx

c6p0 - *October 12, 2010, 11:09 am*

i have no javascript .
good drops I'll try it myself your bot.
this a strange bot lol i try later .

jimbo- - *October 12, 2010, 11:12 am*

ok thanks for the help...i cant dl ur crypter cause server is down...is there a certain time range or window until ur server will be up again?

c6p0 - *October 12, 2010, 11:52 am*

yep nice bot man .
this bot dont works with inject to winlogon .
this running with another process like notepad for sure (added first page long time,me used inject notepad first release) .
inject its ok .
but no connection outgoing .
no time to fully tested this now .

you have tested this binded to notepad ?

Rishabh - *October 12, 2010, 11:57 am*

I found this crypter really one of the best. I hope your hosting is back up soon. I am looking for some victims now.

P.S. - 1000th post :D

c6p0 - *October 12, 2010, 11:59 am*
Dragon Hawk no online now :(

this is the best offshore hosting on HF just waiting little time dragon hawk wake up :)

https://hackforums.net/showthread.php?tid=490788&page=1

???™Hawk Eye™??? - *October 12, 2010, 12:00 pm*
Oo 1000 replies yeah good job c6p0 !!

c6p0 - *October 12, 2010, 12:13 pm*
yes nutella :)
damn seven 64 bits :)
this is fully backdored like vista .
you know ?

lot user say, ignore error message, and/or bind applications with server use triple des . you try ?

wait bro no find friends with this !
I must have one day to myself not easy to find these

and its talking!!!

Al3x - *October 12, 2010, 4:17 pm*
I don't understand, is there a bug with this and Windows 7 64bit? I keep getting some fucking "Attempted to read or write protected memory. This is often an indication that other memory is corrupt" bug.

Always - *October 12, 2010, 4:33 pm*
I tried the settings you used in cybergate and still when slave restart's no connection, maybe the settings I am using in the crypter are wrong?

Can you post screenshot of what settings I should use in the crypter, and am I supposed to click the "random" button under the Triple DES and RC4, because I click it a couple of times, and is it ok that I bind to picture?

Please post screenshot showing exactly what settings to use in the crypter so it will work for cybergate even after restart.

Thank You for your continuous support!

jimbo- - *October 12, 2010, 4:36 pm*

(Oct 12, 2010 04:36 PM)eXpLiiCiT sG Wrote: *[CITE]* i don't think that u can bind with a picture
do you mean that the restart function wouldn't work if you did, because I binded with a picture, could that be why when slave restarts it loses connection?

And, if I shouldn't bind to picture, what do you suggest binding to?

Robert Nesta Marley - *October 12, 2010, 6:21 pm*
never even knew this thread existed till now :O looks real good bro, i sent you a pm :)

xFeaRx - *October 12, 2010, 6:54 pm*
i get an error on the new pass.

guys...pass is easy to decrypt...don't be lazy ?

c6p0 - *October 12, 2010, 10:00 pm*
before crypt your server .
dont forget make new server with new mutex or your server running/pc killed .
dont flame me you lost your bot ! but you used same server with new crypter ...

Always - *October 12, 2010, 10:46 pm*
sorry i don't mean to sound like im flaming, i've made a lot of different cybergate servers to use with your crypter all with different mutex and changed settings around but still after restart, connection is lost, could you please tell which settings to put in crypter?

I keep server runtime 64 bit and run process 32 bit, select triple DES and click random a couple of times, do I have to change icon?

please tell what setting are best with crypter, I appreciate all your help ?

Your probably running on a 64 bit machine, which apparently this isnt supported on.

alkaboos - *October 13, 2010, 7:54 am*

I think even the server does not work without Formork

ipixelatedx - *October 13, 2010, 7:55 am*

(Oct 13, 2010 07:54 AM)alkaboos Wrote: *[CITE]* I think even the server does not work without Formork
Thats also true, This requires .NET framework installed on the target system to work.

mute1122 - *October 13, 2010, 8:46 am*

guys Still fud or . not???

Guiguiche - *October 13, 2010, 9:16 am*

It's still fud,
waiting for the new pass, mp ;)

c6p0 - *October 13, 2010, 10:26 am*

(Oct 12, 2010 03:47 AM)ipixelatedx Wrote: *[CITE]* Nice release here mate. Glad to see you contributing :)
thanks my friend !

its you and sweet give me wish coding :)

you for your sexy gui appli and your options :)

and sweet
this is come in my pc with its source galaxy. debug encrypt his home several times on my os.

thnaks anyway my friend .

yes the damn seven x64 bits dont works with new crypter/runpe.
i search another for free its no easy to find this ! .
if you have FUD runpe works with 64 bits OS for free send me pm .
i know all runpe for free dont send me link to runpe public .

only version 1.8.1 and version 1.8.2 works now !
all other version its de-activated but you view error startup .

kyra123 - *October 13, 2010, 1:03 pm*
ty c6p0, crackin stuff, sweet gui works a treat great crypter, cybergate server fud.

daffi23 - *October 13, 2010, 1:38 pm*
Absolutely wonderfull :-) Thanks a lot!!
Crypted and binded (bound??) my server, and was 0/16....totally CLEAN!!!!

Awesome...:-)

Mint - *October 13, 2010, 1:58 pm*
Other threads cryptions with crypo.com is so easy to get the pass, but this one i somehow can't find out. But now the pass is changed, before that i did found the first two words and the third was "corrupted" with non ascii characters. Can someone give me a hint or something, i want to find it out by myself, but obviously i am still to noob'ish. So do i have to manually edit the password between each cryption maybe?
i just want to learn, that's all

Al3x - *October 13, 2010, 2:45 pm*
Even if I crypt my file under Virtual PC with 32 bit Windows XP installed my server is still corrupt.

Mindfucked.

fefantom - *October 13, 2010, 3:06 pm*

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
    <system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

PS: I don't have .NET Framework in my PC, If .NET Framework is the problem, How crypter started at first ?

scrawls - *October 14, 2010, 9:59 pm*
Bumping this by way of quote to illustrate a GREAT way to get your server to stick on a computer and KEEP the connection after restart. Still using this method along with c6p0's epic crypter to enjoy my vic's a lot longer. I've had some for over three weeks now and counting.

(Sep 20, 2010 04:37 AM)westelko Wrote: *[CITE]* Well people here's something i've tried...i have been testing c6p0 crypter long time....if you ask me it's the best crypter out there...
The only issue is the Startup option...everything else works perfectly in the new release....

Many thanks to c6p0 and i hope and i think you hope too that he will keep the crypter FUD for a long long time.

So let's cut the introduction...and let's go to the main thing....

I am using Cybergate and i have been losing my victims everyday
Why ????Because they restarted the PC and the server was lost forever after restart.

Here's why i'm writing on this thread...cause i'm using this crypter with the new release with cybergate.

So this is what i've tried...and got my victims...not BACK but KEEP the new ones...here's how.

I crypt my server.exe with the OwnZ crypter...after that i infect my victims...nevermind how...

Make your server injection in several ways...here's how:

1.Install Server > Installation directory > System

2.Directory:Choose something by you---my recommendation is:WinDir,Windows,System or System32 --- you choose.

3.File name:Again you can choose...My recommendation is sys32.dll svchost.exe winlogon.exe

4.THE IMPORTANT PART:---INJECT INTO---
First select Default Browser
then OTHER:
Explorer.exe
Winlogon.exe

Svchost.exe

5.Boot:Make sure you check everything

6.Check - Persistance
Check - Hide file
Check - Change creation date
Uncheck - Melt file

7.AND THE MOST IMPORTANT PART:
WITH THESE OPTIONS MAKE SEVERAL SERVERS...SEPARATE SERVERS..NOT THE SAME SERVER AGAIN AND AGAIN...
Actually you're making many server's which you will keep them on some separate folder on your PC so when you infect someone with the original server.exe you do this:

8.When they come online got to the victims name...right mouse click...and select:

Net Tools > Send file and..RUN HIDDEN ---- That's the important part...!!!

Chose your servers one by one and upload it to the slave's PC...after sometime in the cybergate main windows there will be many servers online with the same slave...

The next step to this is:Again click on the right mouse button on the slave's server----anyone you like---

Go to: Extras > Extra options > Miscellaneous > Restart > Execute

Your slave now is gone from the main window...don't panic...he's PC is restarting...

So here's the thing...When he come back online...From ex:10 servers that you install there will be 2-3 max...

If you want to check up your servers look in his process files and active ports...and you will see your server which are working...

You'll see that there's Svchost.exe explorer.exe online...

To test again just restart his PC again...you're up again :)

P.S. Now i'm going to rest my hands cause i got tired from writing :)

P.P.S. Again many thanks to c6p0 for the great crypter...ALL of this credit goes to him.

Pklocus - *October 14, 2010, 10:15 pm*
Is this require .net framework when you crypt?

-Mr Mesmer - *October 14, 2010, 10:43 pm*
Everyone who has the password in quotes edit the post.

boispro - *October 14, 2010, 11:01 pm*
Damn I got no clue how to do thisss:/

Al3x - *October 15, 2010, 3:00 am*

Really love that this bypasses Avira detection but is there ANY CHANCE of Windows 7 64bit support?

c6p0 - *October 15, 2010, 4:57 am*
yes you have chance to me find runpe free fully works with seven ;) .
its no easy ! for take runpe give $.
thanks you for feedbacks !

service - *October 15, 2010, 6:17 am*
hello everyone can someone help me find the password
I can not thank you

aries57316 - *October 15, 2010, 7:24 am*
why step decrypt the pass. please help me

Zmind - *October 15, 2010, 7:33 am*
Hey c6p0, i thik that the crypter it isnt a 100% on vista 32bits...i have lost some victims with vista32, and also tested on one of my machines..

To run it i had to run the server twice,then its ok..after i restarted i lost my server :/

Its just for help c6p0 :) You have THE best crypter

hrefman - *October 15, 2010, 7:42 am*
It's fud but istealer 6.3 don't working ? i have win7 x86
slave have win xp anyway ty

doubtofalex - *October 15, 2010, 8:02 am*
THIS IS MAGIC, got it working.

<3

c6p0 you got a great crypter but... my cybergate keeps getting corrupted i used new server new mutex new name new place everything changed everything totally and still it doesnt work! the problem came after you added the Login stuff since then my server got korrupted

c6p0 - *October 15, 2010, 10:43 am*
you used seven 64bits ?

read this
Quote:westelko Wrote: Well people here's something i've tried...i have been testing c6p0 crypter long time....if you ask me it's the best crypter out there...
The only issue is the Startup option...everything else works perfectly in the new release....

Many thanks to c6p0 and i hope and i think you hope too that he will keep the crypter FUD for a long long time.

So let's cut the introduction...and let's go to the main thing....

I am using Cybergate and i have been losing my victims everyday
Why ????Because they restarted the PC and the server was lost forever after restart.

Here's why i'm writing on this thread...cause i'm using this crypter with the new release with cybergate.

So this is what i've tried...and got my victims...not BACK but KEEP the new ones...here's how.

I crypt my server.exe with the OwnZ crypter...after that i infect my victims...nevermind how...

Make your server injection in several ways...here's how:

1.Install Server > Installation directory > System

2.Directory:Choose something by you---my recommendation is:WinDir,Windows,System or System32 --- you choose.

3.File name:Again you can choose...My recommendation is sys32.dll svchost.exe winlogon.exe

4.THE IMPORTANT PART:---INJECT INTO---
First select Default Browser
then OTHER:
Explorer.exe
Winlogon.exe
Svchost.exe

5.Boot:Make sure you check everything

6.Check - Persistance
Check - Hide file
Check - Change creation date
Uncheck - Melt file

7.AND THE MOST IMPORTANT PART:
WITH THESE OPTIONS MAKE SEVERAL SERVERS...SEPARATE SERVERS..NOT THE SAME SERVER AGAIN AND AGAIN...
Actually you're making many server's which you will keep them on some separate folder on your PC so when you infect someone with the original server.exe you do this:

8.When they come online got to the victims name...right mouse click...and select:

no dont works with my code .

XxTheGenocidexX - *October 15, 2010, 10:46 am*
windows vista home premium 32 bits

c6p0 - *October 15, 2010, 10:47 am*
edit my post look for correct settings with cybergate .
or used defaut settings with cybergate 1.7.5 public works great .

ovelayer - *October 15, 2010, 11:01 am*
For people saying it corrupts their cybergate servers make sure you uncheck ALL the anti's and the startup in the server then crypt works like a charm

goku - *October 15, 2010, 11:55 am*

i cudnt figure out wtz d pass...

plz somebdy show me d way...

XxTheGenocidexX - *October 15, 2010, 12:12 pm*
ok i did some tests with the settings you guys gave me! i used Cybergate 1.7.5
this were the results:

on a XP sp3 32 bit it did this: when i started the server it worked i did get him in my cybergate and stuff but then when i restart his pc when the pc is restarted it pops a window and asks if the pc wants me to run the virus again or not since its not a trusted programma blabla so if i click run i got myself in the list again if i click Cancel then i dont got him anymore! so it needs some auto startup thing for Xp or so!

Now for my pc i got Windows Vista Home Premium 32 bits!: when i start it works fine just like XP but when i restart my pc its gone again! it doesnt give me a popup or anything the victim is just gone from my server so its not even on startup there :/

and as last! my laptop: Windows 7 32 bits: when i run it it is the same as vista and when i restart its also the same as vista so it doesnt work for me :/

c6p0 - *October 15, 2010, 12:49 pm*
little explanation functions startup crypter .

this make 2 key.
and i have added special persistance .
first inject instant run !
this inject your server into winlogon and + add 1 key winlogon and another key in startup/run machine like services ...

XxTheGenocidexX - *October 15, 2010, 1:02 pm*
well how comes it doesnt work for me on 3 different computers and OS?

c6p0 - *October 15, 2010, 1:04 pm*
try with darkcomet 2.2 its free rat like cybergates .
all defaut settings dont touch !
just your no-ip
just add startup crypter
http://darkcomet-rat.com/index.php?page=downloads

feedbacks

eXpLoD - *October 15, 2010, 1:27 pm*
I still don;t get how to decrypt the pass...i have to remove the spaces from each code or how...and what are the non-ascii characters..i'm struggling to decrypt it 3 days from now....i still don't get it

XxTheGenocidexX - *October 15, 2010, 1:37 pm*
c6p0 i dont get darkcomet to wrok:/ and i preffer Cybergate :/ could you try to find the problem? thnx for this ;)

IvyMongrain - *October 15, 2010, 1:56 pm*
NVT doesn't show it yet but AVG detects now on scantime (got the unpleasant surprise when I just moved it between two VMs)

btw. love the work! best public around.. wished I would have a private one

axis10101 - *October 15, 2010, 2:00 pm*

(Oct 15, 2010 01:37 PM)XxTheGenocidexX Wrote: [CITE] c6p0 i dont get darkcomet to wrok:/ and i preffer Cybergate :/ could you try to find the problem? thnx for this ;)

I find the "open file security warning" on XP (which I am assuming is whats popping up for you) is often related to the file name & process name you choose, also which directory you chose to install to. And or a combination of the three.

Also, possibly the meta data, which you should be able to alter in ownz with the clone file feature.

Try changing these settings in cybergate.

For example, I named a file update.exe and got the security warning in XP, also this file name arouses suspicion in 7.

So try installing to appdata or temp instead of system, also try using different process names & file names. See if this helps at all.

Just suggestions not guaranteed to work but may help.

c6p0 - *October 15, 2010, 2:02 pm*

AVG ? past your scann,name detection name AV.

(Oct 15, 2010 01:56 PM)IvyMongrain Wrote: [CITE] NVT doesn't show it yet but AVG detects now on scantime (got the unpleasant surprise when I just moved it between two VMs)

  JIT Debugging
 To enable just-in-time (JIT) debugging, the .config file for this
 application or computer (machine.config) must have the
 jitDebugging value set in the system.windows.forms section.
 The application must also be compiled with debugging
 enabled.

 For example:

 <configuration>
    <system.windows.forms jitDebugging="true" />
 </configuration>

 When JIT debugging is enabled, any unhandled exception
 will be sent to the JIT debugger registered on the computer

rather than be handled by this dialog box.

sup you're best awesome fast, will try asap and feedback

c6p0 - *October 15, 2010, 4:29 pm*
for some strange reason after send my server crypted with new user connection dont appear in cybergate.
restart my cybergates and ok new user here strange .

applaunch works with cybergates 1.9.0 and darkcomet 2.2
try blackshades now.

lanutellamipiace - *October 15, 2010, 4:29 pm*
i will try it tomorrow
thanks for sharing bro

IvyMongrain - *October 15, 2010, 4:58 pm*
First impression...Might be too agressive...
Tested Vista 32 Bit.. each server with own startup, without startup... each with crypter startup and

without crypter startup (so each server in 4 versions total)
Regardless of the setting:
Cybergate .. heavy impact on the client performance and explorer.exe crash
Poison Ivy ... noticable impact but no crash
Cerberus .. crashing hell... about every app running on the client crashes (explorer, desktop, update, taskmanager etc.)
So far none came back after restart (used the settings working with last version just other mutex and installation)
I'll keep trying after I got some sleep

c6p0 - *October 15, 2010, 5:14 pm*
ok added new borlo instant please re-download first page
me wait user confirm this works with 64 bits seven please
look into archive .rar borlo make 16/10/2010 02:06 its last borlo

thanks

IvyMongrain - *October 15, 2010, 5:24 pm*
Hope someone else can test the 7 - 64bits soon... got only a few myself and don't want to make those suspecious with their system screwing up, sorry

versx - *October 15, 2010, 8:39 pm*
Anyone know what settings to use for blackshades so it doesn't corrupt the server? I would really appreciate it.

Al3x - *October 15, 2010, 8:55 pm*
Attempted to read or write protected memory. This is often an indication that other memory is corrupt.

Keep getting this error, don't really understand it.

Obs3rv3r - *October 15, 2010, 9:38 pm*
Downloaded new version, testing ....

Edit:

Tested, and it is working with CyberGate. Nice injection method.

Kobe Bryant - *October 15, 2010, 9:45 pm*
Anyone get the new password?

Cryptography - *October 15, 2010, 11:01 pm*
You l33ts and ub3rs can just pm him for the password lol... ._. I am not too good with decrypting.. He has a nice chain of decryption :/

XxTheGenocidexX - *October 15, 2010, 11:35 pm*
Ok i tested it on 1 of my "victims" he has Windows XP proffesional sp 3.0:
he came back :D
so now lets see for windows 7 32 bit:
He didnt come back :/

and now windows vista home premium 32 bit:
this is my own pc what i used for this! when i run it it crashes my explorer.exe and i have to restart

the explorer.exe
and when i open it then then it works but if i dont reopen it i dont got myself in Cybergate but im in the list now so
now when i restart my pc and open cybergate again im not there anymore :/

so it still doesnt work :/

2 Cents - *October 15, 2010, 11:41 pm*
I'm going to PM you for a password. I've used your crytper before and I love it.

pafke - *October 16, 2010, 12:14 am*
Good Job! Thanks for share.

yummy. - *October 16, 2010, 2:30 am*
Oh noes

Can anyone PM password? ?

Jamster480IsGay - *October 16, 2010, 2:46 am*
How do these password chains even work? I want to learn lol but I have no clue :P

Lassy - *October 16, 2010, 2:57 am*
Thanks for this, I will be using it. :D
Btw noone share the password, they call it noob proof for a reason.

zarkocg68 - *October 16, 2010, 3:01 am*
Thxs mate for your BEST CRYPTER EVEN FINDING ..

Can anyone tell me if this crypter work with Zeus ???

pik1pik1 - *October 16, 2010, 5:21 am*
can someone tell me the password pls sent me in message
if someone knows the pass pm me pls,i rly want this one
anyone has the pass guys i rly need it pls help me

03storic - *October 16, 2010, 6:11 am*
Thanks for this mate, i'm trying to understand what you mean here though.

all space non granted
symbol no ascii non granted

WTF does this mean?

c6p0 - *October 16, 2010, 9:48 am*
new version

1.8.4

return to inject winlogon
improves startup 64bits
add reshack in the crypter

team61 - *October 16, 2010, 10:07 am*

what is the pass rar ???

c6p0 - *October 16, 2010, 10:15 am*
first page
the same password for statup crypter

team61 - *October 16, 2010, 10:18 am*
can you pls pm me my english isnt good THX

algmar - *October 16, 2010, 10:29 am*
Thank you

--

Thank you

santoruis - *October 16, 2010, 10:50 am*
question if you crypt ur server with it do people need netframework 4.0? also great work keep going on!

c6p0 - *October 16, 2010, 10:52 am*
server crypted run with first version2.0 all OS have this and all other version 3.0 3.5 4.0

santoruis - *October 16, 2010, 11:00 am*
also i tryed to run it with sandboxie and without it doesn't give an option on my cybergate that i am infected i tryed to figure out so i made a new server not crypted... and i did get infected of it but if i use ur crypter i dont? and yes i have all netframeworks./

c6p0 - *October 16, 2010, 11:04 am*
no all version netframworks needed for run server crypted.
server crypted no works with sandboxie .

Al3x - *October 16, 2010, 11:34 am*
Seems to actually work on Windows 7 64 bit though it's not runtime FUD, Avira picks up "Win.exe"

I've found a 64 bit RunPE too c6p0, if you wanna try it out.

Sublime. - *October 16, 2010, 11:39 am*
Lol. I can't decrypt this ascii on crypo.com. I feel like a fucking noob :/

c6p0 - *October 16, 2010, 11:41 am*
thanks for feedbacks !
you have the first feedbacks with 64 bits .

avira detected propably the droop in temp i use this only for test 64bits .
with another os the droop/execute its FUD .
I will improve it now as I am that it works with 64bit.

send me your runpe bro !
thanks anyway for feedbacks is crucial

chootka - *October 16, 2010, 11:44 am*
Is it possible to make this crypter without .NET Framework ? no many ppl has got .NET on their

machines :(

snoopcool - *October 16, 2010, 11:56 am*
whats the pass pls say it

santoruis - *October 16, 2010, 12:06 pm*
people dont got all VERSIONS of .NET TBH kinda hard to spread

FEL1X. - *October 16, 2010, 12:47 pm*
is this still fud ???

Spoiler (Click to View) too short

IvyMongrain - *October 16, 2010, 1:53 pm*
No crashing this time on vista 32... servers worked on xp, vista 32 and 64, seven 32 (don't have a seven 64 online atm) But I can't get the startup to work on anything else than XP again.. server works > restart > server gone (tried same settings which worked in version 1.8.2, of course other mutex and installation folder & filename) It's the UAC catching it, I tried disabling UAC while victim wasn't watching then startup works just fine. How about putting the startup outside the system32 folder to one less UAC protected?

@ chootka & santoruis: afaik the victim only needs net 2.0, and most have that atleast.
@ fel1x: New version is just released, yes 0/16
@ snoopcool: With a minimum of effort and looking around to get the knowledge how to this pass is so easy to decrypt compared to others, guess why it's called noob protection

XxTheGenocidexX - *October 16, 2010, 1:56 pm*
i got the same problem ivymongrain just xp comes back others are gone forever :/

IvyMongrain - *October 16, 2010, 2:09 pm*
@XxTheGenocidexX: That's why I always hook with a tested different crypted rat before trying anything new (Poison Ivy is just perfect for that, 7kb so damn small and stable and always gets me my victims back. Dedication to it in my nick)

but anyways... c6p0 I love your work. If possible give us users a choice where to install the startup to or get it out of sys32 please. I think it would solve all startup problems

Fo0xy.0ne - *October 16, 2010, 2:12 pm*
I wish i'm leet/ub3r :(

asdasdasdasdasdads

Al3x - *October 16, 2010, 4:09 pm*
Any updates on the 64 bit compatibility/RunPE bro?

itmoney22 - *October 16, 2010, 4:25 pm*
looks like your doing a nice job on helping the community (:

nice crypter

c6p0 - *October 16, 2010, 4:39 pm*
ok recode 64bits
fixed startup 32 bits

add custom injection

Al3x - *October 16, 2010, 4:48 pm*
The program is telling me there's an update but where's the link bro?

c6p0 - *October 16, 2010, 4:51 pm*
i have tested your runpe rockeralex
and yes new update few minutes

Al3x - *October 16, 2010, 4:54 pm*
Amazing bro, glad I could help.

c6p0 - *October 16, 2010, 5:55 pm*
update !

1.8.5
recode 64bits
fix startup 32 bits with 1.8.4
re-activated custom injections (just tape name process inject)
new stub 34ko

Al3x - *October 16, 2010, 6:03 pm*
Testing now ... saying there's another update when I'm on 1.8.5 lol.

Crypts my CyberGate on Windows 7 64 bit without corrupting! But ... there's still an error saying "Attempted to read or write protected memory. This is often an indication that other memory is corrupt" and the file "Winz.exe" is detected by Avira.

IvyMongrain - *October 16, 2010, 6:26 pm*
Tested 4 different servers with each 2 - 3 settings for the server (including the settings working on precious versions) and several settings in the crypter (custom injection or not... RC4 and T Des... start up enabled and not...crypt and test on vista 32) servers didn't start and didn't add to registry either. The custom inject worked fine though.. can see the process injected to iexplore explorer etc... but servers working perfect with other versions seem to be corrupt now (?)

c6p0 - *October 16, 2010, 7:00 pm*
ok i find my error !
next update few hours

thanks you bro ;)

IvyMongrain - *October 16, 2010, 7:05 pm*
it's sis ;) can't wait to test the next version after I wake up. You're doing an awesome job!

Al3x - *October 16, 2010, 7:11 pm*
Appreciate your awesome work too bro ... Windows 7 64 bit now definitely works.

03storic - *October 16, 2010, 8:07 pm*
Wow two updates since last night, your awesome bro!!

SIM-299095 - *October 16, 2010, 9:16 pm*
(Sep 12, 2010 08:40 AM)c6p0 Wrote: *[CITE]* update in progress
availiables few hours .

i'm waiting to test this crypter ..
appreciate your efforts and the great job ..
will check on the thread later on ..

:)

Cr4zy Kr0n1x - *October 16, 2010, 10:33 pm*
very very very... nice mate... msg2Shoort ;) just like that <3

Garrelf - *October 16, 2010, 10:34 pm*
You are the best !

Thx a lot for you great work !

zyancow - *October 16, 2010, 10:38 pm*
1.8.4 was working great for me, updated 50 servers with it. What was wrong with 1.8.4 and should I update my victims when new one comes out? BTW thanks so much for the amazing crypter and speedy updates.

Sublime. - *October 16, 2010, 11:29 pm*
c6po you are a very dedicated man haha. I like it.

Always - *October 16, 2010, 11:36 pm*
omg i'll be so happy if this fixes all the restart bugs for cybergate!

thanks for the great work!

zarkocg68 - *October 17, 2010, 12:48 am*
From today i get an error when i start the crypter :

See the end of this message for details on invoking
just-in-time (JIT) debugging instead of this dialog box.

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

IvyMongrain - *October 17, 2010, 1:12 am*
@zarkocg68: Disabled version 1.8.2, error means can't auth anymore

Garrelf - *October 17, 2010, 1:36 am*
Just w8 the new release i think ^^

zarkocg68 - *October 17, 2010, 1:38 am*
thks for answer. And anything more, crypter in RC4 DO NOT WORKING WITH ZEUS. Now i cannot to test with TRIPLE DES, did anyone know if i will crypt Zeus bot with TRIPLE DES it will working ?

Al3x - *October 17, 2010, 4:56 am*
What's the status report c6p0?

c6p0 - *October 17, 2010, 6:48 am*
update

1.8.6

remove compatibility seven 64bits (recode)
fix bug startup

new methods startup
fix bug custom inject fully activated.

feedbacks ? ?

Gustavo Gaviria - *October 17, 2010, 7:06 am*
Wow mate very nice! I swear to the one who leaks the password i will fucking feed him to my dogs and btw c6p0 why didnt you post it in vip section?

send pass

i know i have full leecher Worldwide with 80000 user .

http://www.google.ie/search?hl=fr&source=hp&biw=&bih=&q=own%27z+crypter&btnG=Recherche+Google

nice iddea 2 link one normal, another fuckcash :) .
for stop leecher .

SIM-307931 - *October 17, 2010, 8:48 am*

Nice to see another update :)
Works perfectly with my Cybergate server 1.07.5

Thanks dude

Cheers

c6p0 - *October 17, 2010, 8:52 am*

thanks for your feedbacks dude !
injection used ?

cybergate works fine with svchost and explorer

SIM-307931 - *October 17, 2010, 9:02 am*

@up

Well I use default browser in Cybergate, and you suggested to use winlogon in your crypter, I let it be and it works ;)
Should I use svchost instead of winlogon?

Cheers

twister37 - *October 17, 2010, 9:03 am*

Super crypter apparement, mais je ne trouve pas le mot de passe. Complètement novice. Si quelqu'un pouvait m'aider. Merci

supersurfer - *October 17, 2010, 9:07 am*

ohoo... its not gonna b fud for long time..

c6p0 - *October 17, 2010, 9:09 am*

i have tested winlogon,explorer,notepad,svchost with cybergate all works fine ;)
with startup crypter .

your server run with winlogon now if you dont touch custom inject.

just replace winlogon by svchost and your server injected to svchost all name run ...
instant try with msnmsgr "msn" works :) .

twister37 - *October 17, 2010, 9:18 am*

Can you help me? I'd like to try your encryptor.
I already create my server but when I encrypt with another encrypting it no longer works. I'm lost.

c6p0 can you send me the password? I can not send private messages. Thank you

SIM-307931 - *October 17, 2010, 9:33 am*

(Oct 17, 2010 09:09 AM)c6p0 Wrote: *[CITE]* i have tested winlogon,explorer,notepad,svchost with cybergate all works fine ;)

Thanks for your answer! :)
I send it to Polish ppl, in Poland not many people use msn so it s not a wise idea but thanks for suggestion :)

Hope it ll stay FUD for long. Just don t send password to anyone hehe

Have a nice day everyone

Obs3rv3r - *October 17, 2010, 9:38 am*

You are releasing new versions daily, I have no time to test them so fast!

Good job :)

Souldeleted - *October 17, 2010, 10:03 am*

Decrompession work even with 7-zip latest version!

Always - *October 17, 2010, 10:08 am*

wait so should i disable injection in cybergate? and just use injection in the crypter?

and should it be explorer or explorer.exe that i type into the custom injection?

c6p0 - *October 17, 2010, 10:10 am*

yep dont use inject in cybergate
just tape name without extension .
for explorer write : explorer

:)

Always - *October 17, 2010, 10:11 am*

Also, do I have to use the startup in the crypter, if I do, do I disable the startup when building cybergate server?

c6p0 - *October 17, 2010, 10:16 am*

i test all time my server cybergate with this settings .
no anti
no upx

startup checked crypter

[quote='c6p0' pid='6408269' dateline='1284306023']
* use only winrar for decompress
the password dont works with another archiver.

Decompress work with 7-zip ;)
Last version of your crypter 1.8.6
gonna try now
Thanks ;)

c6p0 - *October 17, 2010, 10:27 am*

ok bro run 7-zip !
thanks

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

PS: i was using 1.8.2 ... Let me try the newer version

c6p0 - *October 17, 2010, 11:37 am*
chootka you used old version crypter or you dont give access online auth .
only 1.8.6 activated now

--OWNER--
works fine with cybergate you wrong settings !

corruptxfatal - *October 17, 2010, 12:03 pm*
My darkcomet victims are not coming up even if i infect them. I have turned off all settings for dark comet and used kill firewall, startup, inject into svchost (not svchost.exe) and hide file for the crypter. I also binded and added an icon. See any problems anyone?

chootka - *October 17, 2010, 12:15 pm*
(Oct 17, 2010 11:37 AM)c6p0 Wrote: *[CITE]* chootka you used old version crypter or you dont give access online auth .

Using 1.8.6 bro... I m nt sure whats wrong.. i have delted the files from LOCAL FOLDER before starting this one :(.. can you help ?

corruptxfatal - *October 17, 2010, 2:53 pm*

hey im getting this error for some files Erreur : The process cannot access the file 'C:\Users\xx\Desktop\1.8.6\res.log' because it is being used by another process.

JAMy - *October 17, 2010, 3:05 pm*

Cybergate 1.075 is detected by Avira when crypted with 1.8.6. Server from 1.8.4 is still undetected?! Is that correct?

B0T - *October 17, 2010, 3:06 pm*

Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 5:05:19 PM

lol wtf?

c6p0 - *October 17, 2010, 3:29 pm*

(Oct 17, 2010 02:53 PM)corruptxfatal Wrote: [CITE] hey im getting this error for some files Erreur : The process cannot access the file 'C:\Users\xx\Desktop\1.8.6\res.log' because it is being used by another process.
screenshots error .
what you used in the crypter ?
(Oct 17, 2010 03:06 PM)B0T Wrote: [CITE] Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 5:05:19 PM

lol wtf?
you wrong buttons bro
screenshots !

Al3x - *October 17, 2010, 3:35 pm*

I mean when I crypt Notepad.exe it comes up as a Trojan in Avira. How is that possible lol? Notepad isn't a trojan.

c6p0 - *October 17, 2010, 3:40 pm*

yep avira detected your trojan in your notapd if you inject notepad .
this is base of detection .

JAMy - *October 17, 2010, 3:44 pm*

c6p0: why you changed the routine? The Servers crypted with 1.8.4 are still undetected... :-/ I would rather use 1.8.4, but it´s deactivated... ;-) Could you reactivate it for the ppl who want to use this version??

greetz

c6p0 - *October 17, 2010, 3:46 pm*

dont worry new update FUD few HOURS with x64bits compatibility activated.
now go to my bed .

Works, try Winlogon whit add start up check, thats working for me.

Al3x - *October 17, 2010, 6:21 pm*
Has 64 bit compatibility been removed? Or did I misunderstand you? :S

Always - *October 17, 2010, 10:31 pm*
the crypted file doesn't work on computers without .net

is that true?

axis10101 - *October 17, 2010, 10:59 pm*

Yes the crypted file requires .net 2.0 as far as I know.

Kobe Bryant - *October 17, 2010, 11:21 pm*
Doesn't work for Cerberus or Cybergate

All it does is some gui comes up >.>

unstopabl3 - *October 17, 2010, 11:27 pm*
Hi, I've used the latest version and I'd like give you my feedback.

1) It would be better if you could make a "Remember Password" feature on the login screen and remove the "Show Password" option.

2) Don't mind this but there are a few English/Grammatical/Punctuation related mistakes:

It's "Disable" not "Disables"
It's "Kill Firewall" not "Firwall"
It's "Block Anti Sites" not "Block Anti Site"
It's "Add to Startup" not "Add Startup"
It's "Runtime 32 Bit" not "Runt Process 32 Bit"
It's "Please Upgrade to .NET Framework 4.0" not "Please Upgrade .NET Framework 4.0"
It's "Original >>> Changed" not "Original >>> Change"
In the small description window, it's "Last SCan" not "last scann"
In the small descrition window, it's "Try the Latest Version at hackforums.net" not "Try Original hackforums.net"

3) When you select the "Change Icon" it says Activated, but when you deselect this option, it still says "Activated" rather than saying "De-Activated"

4) It would be better if you could make the crypter window "Moveable" and make it so that we could select ourselves whether it should be "Always on Top" of other windows or not.

This is a great piece of work, so it would look more professional with the above things implemented :D

I'll add more later :)

zalikich - *October 18, 2010, 2:12 am*
wor me this not working. darkcomet, cerberus,cybergate. when i send it people they cant open this file. and if i open it in my pc, it working. what problem?

c6p0 - *October 18, 2010, 2:20 am*
(Oct 17, 2010 04:17 PM)corruptxfatal Wrote: *[CITE]* here c6p0 [IMG]http://img215.imageshack.us/img215/4678/errorkez.jpg[/IMG] are the setting correct for darkcomet?
your file bind ? i look name file with /Crates/1.8.6/log.res .
you bind /log.res ? lol
in status bar the file bind named /photoshop ????
strange ...
you forget random key for crypt this !
click random below keygen encrypt .
without key dont works .

works with cybergate and darkcomet !

haha..cool man... one step ahead than avira

Al3x - *October 18, 2010, 11:01 am*
Is this still working with Windows 7 64 bit or ... ?

Guess not then, I get "Invalid character in a Base-64 string."

Would you ever release a 32 and 64 bit version of your crypter dude?

Ethics - *October 18, 2010, 11:05 am*
still fails with istealer ... its crypts the server fud but unable to get logs ...any one else having the same problem???

Obs3rv3r - *October 18, 2010, 11:32 am*
Good job in bypassing Avira :)

Kobe Bryant - *October 18, 2010, 11:59 am*
Can you Make it work with cerberus and cybergate or tell me how please?

pawnedbro - *October 18, 2010, 12:33 pm*
Cant madafaking get it work with darkcomet 2.2 :S !

Al3x - *October 18, 2010, 12:41 pm*
Bring back the old version bro! It was working with Windows 7 64 bit and was 100% FUD with an icon.

c6p0 - *October 18, 2010, 12:42 pm*
sorry this is works only with document.txt
crypt your .txt easy withs this :D

say "hello" its FUD

pawnedbro - *October 18, 2010, 12:47 pm*

Wait , is this version works or not ?

Zmind - *October 18, 2010, 1:38 pm*
Man i dont understand i had no problems with old versions...now i encrypt the cybergate server with no injection or with injection (cybergate own injection) and simply doesnt work, man the oldest versions where better, dont know why :/

I cant simply cant put this to work...man u could do a post like this

Working settigs:

Cybergate for xp - use no server injection - Crypter use injection svchost.exe etc etc
Darkcomet xp - use etc etc etc etc

Because its a big mess in the forum, and as u update your server whe have more options...option that are good but if they are wrong the server doesnt work.

And more, i have an old pc with vista 32 that i use only to having a runing server just to know that the cybergate client (my master pc) are fully working, and i had to paste the server in the startup folder (beucase after restart i lose the server) and it workd for days. but know the server doesnt connect and i havent donne annything, it looks like it get corrupted by itself man...

Moraki - *October 18, 2010, 1:41 pm*
LOL I would of never guessed the password ;)

GetScraped - *October 18, 2010, 1:43 pm*
FOR THE LOVE OF GOD, HELP ME PLEASE.

iStealer 6.0, Every crypter I try fails.

What settings should I do?

[img]http://i54.[censored].com/345mzyp.png[/img]

Now, what settings should I do?

[img]http://i51.[censored].com/334i7fc.png[/img]

Zmind - *October 18, 2010, 2:08 pm*
now i only get my server running after i restart the machine..please c6p0 try to relase an "old new version" but with FUD borlo, beucause older version where paradise :)

c6p0 - *October 18, 2010, 2:09 pm*
ok new release 1.8.7(2) !
fix this bug thanks man ;)

workss with istealer and all other !
feedback !!!

Obs3rv3r - *October 18, 2010, 2:14 pm*
(Oct 18, 2010 11:59 AM)Taylor Gang Wrote: *[CITE]* Can you Make it work with cerberus and cybergate or tell me how please?
Use Triple DES, don't use RC4 for CyberGate.

Zmind - *October 18, 2010, 2:16 pm*
and what bug u ara talking about? lol

The istealer or other?

So just to see if i am right....To fully work with Cybergate :

Install directory : system
boot : all checked (HKLM/HKCU/policies) + random
directory : WindowsUpdate
Filename : Sys32dll
Injection into: No injection
Check : Persistance / Change creation date + random Mutex

Anti-Debug : Uncheck all

Create server : check on use icon / delayed execution

Ownz Crypter 1.8.7 (2)

Add to startup
Check runtime 64bits/32bits
check Custom injection : explorer
Triple DES encryption + random

Its this ok? iy should work right?

c6p0 - *October 18, 2010, 2:18 pm*

mistake with runtime .
readprocess and writeprocess the call dll with 1.8.2 its srambled .
fix that 1.8.7(2)

GetScraped - *October 18, 2010, 2:26 pm*

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
    <system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

Yeah c6p0 i have tested right now the 1.8.7(2) with the settings that i posted and its working a 100%

And now an idea..whe know that that vista "like" some startup methods, XP like another one and 7 another one lol

So it could be possible an option with several startup methods all included in the crypted server? :) like if the server recognize the Operating system and injects the best way to that OS :)

I'm going to try these settings out and see if they work, and if when restarted the slave remains on

windows 7 and xp. I'll try to get back soon with results!

BTW 1.8.6 worked after restart on windows xp but not windows 7, don't know about vista, just results of my testing yesturday. ?

Impurity - *October 18, 2010, 6:53 pm*
Everytime I try to crypt I get an error message saying:

"Erreur : Look status ... - "

Not sure why..

amitsing3 - *October 18, 2010, 11:28 pm*
Thanx again for this crypter buddy.

zarkocg68 - *October 18, 2010, 11:58 pm*
can anyone to tell me if it work with Zeus 1.3.x.x. I have testing in Rc4 and Triple DES but no work

chootka - *October 19, 2010, 12:32 am*
You are getting better and better everytime C6p0.... Keep up the good work... the basic reason y this crypter is FUD fr a long time is u used really good noob protection since beginning:D .... And Ur awesome coding skills...Thanks man :D

Zmind - *October 19, 2010, 12:46 am*
c6p0 i dont know how you have done this, but after i install the server the trojan remover cant detect it :)

I unninstall it in the cybergate client like i normally do, restart the pc, open the cybergate do start and there he his again, the server never go away?!

Lol i dont know if this its a good thing, but maybe later when whe have to update the server may bring some problems i dont know...

Annybody try to unnistall the server and it connects anny way?

domination1001 - *October 19, 2010, 12:56 am*
GOT IT. THANKS awesome job on this thing!!!

Zmind - *October 19, 2010, 1:13 am*
And i tried again the server on vista 32 and still have the same problem...it works when installed, really quick connection, but after the restart i lose the server..

To work on XP in the crypter i use Explorer injection and works fine, but to work on vista what injection mode should i use c6p0 ?

Or maybe the problem isnt on the injection mode but some difrent setting crypter/server that i am missing...

Lassy - *October 19, 2010, 1:21 am*
Great thanks, made my server 100% FUD

Zmind - *October 19, 2010, 1:56 am*
I found the problem c6p0, even if i unnistall the server after i restart, i go to windows/system32 folder

and there his the server..

I delete the server on system32, restart the pc and there he his again on system32..how the hell with the unninstall and delete file it comes again and again?

c6p0 - *October 19, 2010, 2:18 am*
hmm yes egain and egain !
use cure bro !

new release 1.8.8 !
compatibility 64 bits activated

few minutes .

zarkocg68 - *October 19, 2010, 2:19 am*
Yes FUD thanks for that but even not working with ZEUS. Can you correct this ?

Zmind - *October 19, 2010, 2:21 am*
1.8.8 already? man u are a machine...

Use cure? whats cure...?

c6p0 - *October 19, 2010, 2:29 am*
new update !!!

detect rate: 0/16

1.8.8
recode injection
new method runtime
activated new code for 64bits (feedbacks)
64 bits dont use temp ... (100% FUD)
same password

moment new release new compatibility (new release works with metus)
(Oct 19, 2010 02:21 AM)Zmind Wrote: *[CITE]* 1.8.8 already? man u are a machine...

Use cure? whats cure...?
own'z tool'z !
enter the name server you up in your machine click cure ;)

Zmind - *October 19, 2010, 2:39 am*
Lol first time i use Own´z tool´z..never need it but i use the cure get an error...the file its gonne, the firewall gets one etc

But after the restart the server its on system32 again..strongest injection method ever lol

But i dont know how am i gonna remove this to test 1.8.8

c6p0 - *October 19, 2010, 2:42 am*
yep cure dont use crypter for bypass your UAC !
allow it and this clean your pc .
or go to your regedit and search key make by your server (name your server)

or start your client and right click name pc uninstall ?
no sure this works with new inject :p
(Oct 19, 2010 02:39 AM)Zmind Wrote: [CITE] Lol first time i use Own´z tool´z..never need it but i use the cure get an error...the file its gonne, the firewall gets one etc

sorry for password man !
now me code assembly changer and icon change for ownz tools.
useful for downloader or your server .
multiples files binder

IvyMongrain - *October 19, 2010, 4:51 am*

Alright after hours and hours of excessive testing and dozens combinations of server and crypter settings I think I know what's the deal with not restarting servers (for me anyways).
After running the crypted server it gets good injected and executed and runs. But the installation of the server is corrupt.

You can easy test yourself if that's your problem too:
Run your crypted server
Disconnect / Close it with your client (not uninstall!)
Browse to your servers installation
Try to run it manually from there

For me nothing happens. So of course if the startup of the server runs this file nothing happens too.
If I try same thing uncrypted or with one of my other used crypters it will run te server again.

Means:
If the crypter startup is enabled and works servers will restart.
If only startup is servers corrupted install it won't work.

Would be good if some can test this so I know if just me.
(me tested on vista-32 home premium all framework up to 4.0 installed)

oh and c6p0 keep up the good work!

Al3x - *October 19, 2010, 6:14 am*
Still 64 bit problems eh cp60 ... didn't even get a chance to test it! You updated too quick.

jimbo- - *October 19, 2010, 12:28 pm*
the login is down...when will the server be back up?

Gustavo Gaviria - *October 19, 2010, 12:37 pm*
Can you make in next update so you can embed exe in like mp3 or jpg please thanks =)

Impurity - *October 19, 2010, 1:21 pm*
Still getting the Erreur Look Status...

deadseth - *October 19, 2010, 2:10 pm*
First of all thanks for your offer.
I decrypt it and i open it, i found two exe the crypter and the "borlo" what is that?
I crypt my server and bind it with a gif image(still see the Erreur: Look statu...-) but when i open it open the image and "Form1" what is that and how can i disable to open?
And the most important how can i change the .exe to .jpeg or .mp3 or smt else??

c6p0 - *October 19, 2010, 2:18 pm*
1.8.9
re-activated 64bits comptability.
added multi files binder condom,bind any files you want /packers/icone change/assembly change/timer/ and many others options . RE-FUD this (Credits: Areon)
remake the gui (no finish)
new api
new strings

Al3x - *October 19, 2010, 2:29 pm*
Awesome work dude, gonna test it for you now. (Windows 7 64 bit)

Impurity - *October 19, 2010, 2:36 pm*
Code Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 5:35:22 PM
Any ideas o.O

c6p0 - *October 19, 2010, 2:40 pm*
screenshots bro !
version you have ?
os ?
you have administrator ?

Impurity - *October 19, 2010, 2:44 pm*
Yes I have admin, latest version here's a screen shot.

Vista 64 bit.

[IMG]http://i51.[censored].com/6jkigo.jpg[/IMG]

c6p0 - *October 19, 2010, 2:46 pm*

(Oct 19, 2010 02:44 PM)Impurity Wrote: *[CITE]* Yes I have admin, latest version here's a screen shot.

Vista 64 bit.

[IMG]http://i51.[censored].com/6jkigo.jpg[/IMG]
yes you forget to write name to injection custom !!!
you dont inject ...
dont uncheck this if you dont know lol !

this is checked by defaut bro.

Impurity - *October 19, 2010, 2:51 pm*

I understand what injection is. I'm simply testing the crypter to see if it's working with my stuff. Essentially a "safe" version. Injecting into stuff on a safe version makes more work for me.

I deleted what was there, and as you can see in the screen shot, it's unchecked.

I've tried it WITH injection as well, didn't work.

c6p0 - *October 19, 2010, 2:53 pm*

bro if you uncheck this you view this error ...
whats your problem ?

Impurity - *October 19, 2010, 3:00 pm*

With it checked it gives the same error, doing it again and getting a screen shot sec.

c6p0 - *October 19, 2010, 3:07 pm*

ok bro i waiting dont use photoshop for remake this i know all pixel dude .

Impurity - *October 19, 2010, 3:15 pm*

[IMG]http://i53.[censored].com/zjuy3t.png[/IMG]

There ya go I apologize for the huge size, only way I could get all three pictures in one >.<

I also apologize for the terrible spelling >.< I was moving fast :D

Al3x - *October 19, 2010, 3:15 pm*

64 bit working perfectly from what I can see, even with that error the other guy above me is getting.

c6p0 - *October 19, 2010, 3:18 pm*

for me you dont check egain custom injections bro .
(Oct 19, 2010 03:15 PM)RockerAlex Wrote: *[CITE]* 64 bit working perfectly from what I can see, even with that error the other guy above me is getting.
thanks you rockeralex !
i glad to enjoy you

Impurity - *October 19, 2010, 3:20 pm*

I'm looking at it checked in that screen shot. The third one, below the others, is the same,j ust with the error box

c6p0 - *October 19, 2010, 3:21 pm*
no your last screenshoot radiobuttons injections custom is hide !
 hey man i have no time to play with you !

Impurity - *October 19, 2010, 3:25 pm*
The bottom screen shot is the SAME as the top two....just with the error box. The check box for custom injection is checked.

 I'm not "playing" with you, simply trying to find a crypter for my RAT. I've been searching for....a week.

c6p0 - *October 19, 2010, 3:27 pm*
send me correct screenshots with the real error no hide buttons .
 wait 5 min .

Al3x - *October 19, 2010, 3:36 pm*
c6p0, I get the same error message. Could never work out what it meant but my crypted file still works 100%.

c6p0 - *October 19, 2010, 3:37 pm*
right click borlo run as administrator crypter same

Impurity - *October 19, 2010, 3:40 pm*
I tired that, also sent you a pm of the picture.

 Thanks for your help btw :)

 Bbl going out to eat.

zyancow - *October 19, 2010, 3:41 pm*
Absolutely amazing update, been binding files one by one and changing icons with reshack one by one. Once again thanks for making my life easier, by far best free crypter.

c6p0 - *October 19, 2010, 3:42 pm*
appetite good lad bro !

 rocker alex you used version crypter dont view this error ?

fanana5 - *October 19, 2010, 3:48 pm*
how do you uninstall the server from the victim's machine if you check "Add To Startup"?

c6p0 - *October 19, 2010, 3:48 pm*
 (Oct 19, 2010 03:41 PM)weetree Wrote: *[CITE]* Absolutely amazing update, been binding files one by one and changing icons with reshack one by one. Once again thanks for making my life easier, by far best free crypter.
 thanks you so much ?
  (Oct 19, 2010 03:48 PM)fanana5 Wrote: *[CITE]* how do you uninstall the server from the slave's machine if you check "Add To Startup"?
 if your own pc dont use startup crypter and cybergates .
 for complete remove use only startup cybergates .
 for agressive settings use startup cybergate and crypter server indelible .

Al3x - *October 19, 2010, 4:56 pm*

I'm using 1.8.9 and get that memory error ... not sure why.

Everything works perfectly, though.

trojan_horse - *October 19, 2010, 5:15 pm*
just wanna ask if this requires .net framework on victim's machine for it work! thanks!

c6p0 - *October 19, 2010, 5:57 pm*
for running crypter and crypt server this use net 3.5 .
crypted server need mini net 2.0 for running,it is installed 90% os xp.
100% new os .

Al3x - *October 19, 2010, 6:04 pm*
I believe Vista and up have .net 2.0 installed by default straight from the disc.

Zmind - *October 19, 2010, 7:49 pm*
The only thing that this update "corrupts" its the password recovery on cybergate c6p0.

If you fixed this it would be so nice..whe didnt have to bind isteal and stuff like that :)

By the way..if i crypt the server with a fake message error, when restart i always get the fake error msg...

His there anny way to bypass this? because its very suspicious to the slaves....

But hey...private or public this his the best crypter always :D

Always - *October 19, 2010, 8:21 pm*
(Oct 19, 2010 06:04 PM)RockerAlex Wrote: *[CITE]* I believe Vista and up have .net 2.0 installed by default straight from the disc.
Yup, I confirm that my windows 7 and vista already had it even when I reinstalled from the CD ?

Hacked Data - *October 19, 2010, 8:46 pm*
this crypter is awesome i wish i could +rep this guy

superactive - *October 19, 2010, 8:58 pm*
how does the unlimited binder works..and how to use the assembly in the options

ToLeGiT - *October 19, 2010, 9:35 pm*
This crypter is amazing, thanks alot man! ?

Ice313 - *October 19, 2010, 9:44 pm*
Omg that took me forever to figure out the password, those characters were completley invisible on my computer and i went through it a hundred times trying to find them all. Finaly did it :D

And FUCK YEAH FUD!!!

You rule dude, thanks so much for the continued updates and support would give you a thousand rep if i could. Best crypter out atm

unstopabl3 - *October 19, 2010, 9:45 pm*
(Sep 12, 2010 08:40 AM)c6p0 Wrote: *[CITE]* 1.8.9
re-activated 64bits comptability.

new gui,remake the gui (no finish 60%)
added multi files binder condom,bind any files you want /packers/icone
This made me laugh so hard lol :D

Great new GUI and features, keep up the good work :D

c6p0 do you make this crypter on XP?
because when i make my server on my notebook and i do solve compatible problems or how its called and then i check that and stuff and click on finish then i start and reboot my laptop it works for windows 7 32 bits but for all the Other OSes it doesnt work:/ because i cant fix compatible problems for other OSes :/ but dont know if this is the real prob but could you check?

c6p0 - *October 20, 2010, 3:39 am*

thanks you for feedbacks !
yep the binder its amazing easy for use .

password chrome dont works with cybergate ?
my crypted server with password (no chrome) run great.

fully tested on my pc xp pro,and my vista 32 bits pro .
another user this night test this, OS seven 64 bits server/crypter works .

little error"corrupt memory" with seven 32 bits to create server,bypass this error your server works.

thanks you if you like the new gui ;)

XxTheGenocidexX - *October 20, 2010, 3:55 am*

i loved it but.. i found a little thing what you could maybe fix with the "File Binder" when you bind a file and you run it the server is just called to where you injected it but the file you binded is called like this:
[img]http://img143.imageshack.us/img143/900/maybefix.jpg[/img]
and i think that people arnt that retarded to see that that is wrong :P

Guiguiche - *October 20, 2010, 4:00 am*

Here is my 99's feedback x')

So, a lot of ideas :
It could be great to be able to move the window of the crypted (just like the window of "Own'Z tool"
Explaination of what are the new features

Bye :p

ça serait bien de pouvoir bouger la fenêtre du crypted, comme la fenêtre own'z tool, c'est un peu chiant de pas pouvoir la bouger :/
Expliquer à quoi servent toutes les nouvelles options dans le changelog par exemple ;)

Bye

pawnedbro - *October 20, 2010, 4:01 am*

hey , c6p0 , i ralized what is problem with DarkComet 2.2 ! , when building server in DarkComet 2.2 and you leave default settings (nothing checked) it will work , but when you enable "Server Startup" while building server than crypting wount work , Please Fix that ! :D

DarkZero - *October 20, 2010, 4:06 am*

This doesn't work with my cybergate server =\

c6p0 - *October 20, 2010, 4:09 am*

yes nice idee not time to complete write how to for use this .
added 1 new buttons in the crypter for lower window.

(Oct 20, 2010 04:01 AM)pawnedbro Wrote: [CITE] hey , c6p0 , i ralized what is problem with DarkComet 2.2 ! , when building server in DarkComet 2.2 and you leave default settings (nothing checked) it will work , but when you enable "Server Startup" while building server than crypting wount work , Please Fix that ! :D
yes i know ! dont use options darkcomet !
check startup crypter and this restart and works fine no pb .
(Oct 20, 2010 04:06 AM)DarkZero Wrote: [CITE] This doesn't work with my cybergate server =\
dont use chrome password
no injections cybergate .
no upx
no melt

works fine with explorer,winlogon,svchost.

DarkZero - *October 20, 2010, 4:17 am*
Hmm I did all that. I'm trying it on sandboxie and it still won't work.

In cybergate I done:
No injection
No chrome passwords
No upx compression
No melt.

In crypter I did:
USB Spread
Runtimes 32/64 Bit
Custom injection: explorer

c6p0 - *October 20, 2010, 4:18 am*
hmm yes all vb.net appli dont run with debugger like anubis or sandboxie man .

DarkZero - *October 20, 2010, 4:24 am*
Oh ok. It's working now. I got my friend to test it and Norton picked it up.

c6p0 - *October 20, 2010, 4:25 am*
whats norton picked ?
norton lol .

DarkZero - *October 20, 2010, 4:27 am*
When he downloaded the file. Norton anti-virus picked it up as a threat and deleted it automatically =\

c6p0 - *October 20, 2010, 4:29 am*
whats file ?
norton its useless !
no possibles this take server crypted .
you wrong buttons you dont crypt this .

DarkZero - *October 20, 2010, 4:38 am*
I crypted my server and checked it on NoVirusThanks. It showed up 0/16. But when I sent the crypted server to him Norton deleted it straight away.

c6p0 - *October 20, 2010, 4:40 am*
please screenshoots ?
name detection ?
(Oct 20, 2010 04:38 AM)DarkZero Wrote: *[CITE]* I crypted my server and checked it on NoVirusThanks. It showed up 0/16. But when I sent the crypted server to him Norton deleted it straight away.
after crypted your server use binder with condom and feedbacks :)
the binder condom is for that.

DarkZero - *October 20, 2010, 4:49 am*
It just has a small box on the bottom right corner saying "Threat Detected" and then it shows the name of my server.

[img]http://img812.imageshack.us/img812/4016/69054033.png[/img]

c6p0 - *October 20, 2010, 4:52 am*
this is not detection just warning !!!
but use assembly change and make fake name publisher bro ...

thanks bro !!

[img]http://niglo-land.co.cc/option.JPG[/img]

DarkZero - *October 20, 2010, 5:07 am*
Done that. Sent it to him again and got this one now.

[img]http://img84.imageshack.us/img84/240/imagelig.jpg[/img]

Edit: OMG got posted 3 times -.-

Cam G - *October 20, 2010, 5:36 am*
Looks like a decent crypter. I'll check it out.

XxTheGenocidexX - *October 20, 2010, 5:39 am*
its the best free crypter but doesnt work for CyberGate 1.07.5 :/

pafke - *October 20, 2010, 6:48 am*
(Oct 20, 2010 05:39 AM)XxTheGenocidexX Wrote: *[CITE]* its the best free crypter but doesnt work for CyberGate 1.07.5 :/
Works perfectly, i have over 300 victims whit cybergate 1.07.5 + ownz crypter.

XxTheGenocidexX - *October 20, 2010, 6:55 am*
well it works the first time start but when you reboot his pc he is gone :/

pafke - *October 20, 2010, 7:09 am*
(Oct 20, 2010 06:55 AM)XxTheGenocidexX Wrote: *[CITE]* well it works the first time start but when you reboot his pc he is gone :/
Not true, try to use crypters start up, works for me.

XxTheGenocidexX - *October 20, 2010, 7:11 am*
i did that i can make some screens and i can show you with that that i use the standard settings + the right settings for crypter so tel me if i need to post

pafke - *October 20, 2010, 7:28 am*
@XxTheGenocidexX

This are settings that work for me:

[IMG]http://img230.imageshack.us/img230/4130/70524464.png[/IMG]

[IMG]http://img263.imageshack.us/img263/8924/49710469.png[/IMG]

Server is also working whit out any start up settings made in cybergate, at least for me.

d3adz3r0 - *October 20, 2010, 8:00 am*
okay i'll try it out too and see its FUD or not

XxTheGenocidexX - *October 20, 2010, 8:11 am*
(Oct 20, 2010 07:28 AM)pafke Wrote: *[CITE]* @XxTheGenocidexX

Server is also working whit out any start up settings made in cybergate, at least for me.thats exactly my settings to but it still doesnt work :/ but i dont use USB spread

GyroErbin0 - *October 20, 2010, 8:25 am*
Select add to startup in the crypter.
De-select the boot options in cybergate, it should work now.

DarkLight188 - *October 20, 2010, 8:41 am*
Password seems to keep failing for me...not sure why...I know I did it right..anyone else having this problem?

Khronos - *October 20, 2010, 9:01 am*
Hey,

I'v been trying to decrypt this for a while now, i'm new to the scene. I'v opened up the password in notepad, removed the A's and spaces, gone through decrypting it in the opposite direction it was encrypted, and it's never right, any tips?

Many thanks :)

DarkLight188 - *October 20, 2010, 9:16 am*
In same boat as above sadly, first time in a long time I've been stuck like this. :P

kucingsiam - *October 20, 2010, 9:29 am*
this not runtime fud... only scantime.. because only i want to try it at my dummy pc.. its automaticly delete by kaspersky,avg,node32 and avira. please clarify if anyone can bypass the runtime...

Al3x - *October 20, 2010, 10:53 am*
To bypass runtime use a fucking icon and put some thought into the file name, company name etc.

Don't just make a server.exe with no icon and no details and expect it to be undected. HERP DERP.

c6p0 - *October 20, 2010, 10:53 am*
(Oct 20, 2010 09:29 AM)kucingsiam Wrote: *[CITE]* this not runtime fud... only scantime.. because only i want to try it at my dummy pc.. its automaticly delete by kaspersky,avg,node32 and avira. please clarify if anyone can bypass the runtime...
runtime and scantime ! its FUD .

annoyone fur suggestion with new gui before update ?

[img]http://niglo-land.co.cc/oneone2.JPG[/img]

you like ? me i like this :)

Al3x - *October 20, 2010, 10:57 am*
Looks nice bro, go for it.

c6p0 - *October 20, 2010, 11:00 am*
grammar ok ? :)

no correction shure ?

Pitifoul - *October 20, 2010, 11:03 am*
What a nice GUI ! Nice job dude :D !!!

BlGs - *October 20, 2010, 11:13 am*
?am thk is work ?

c6p0 - *October 20, 2010, 11:14 am*
hmm ok :p

update after food :)

Al3x - *October 20, 2010, 11:15 am*
I guess "Restore" instead of "Restor" lol.
Your crypter password is leaked c6p0, change it asap.

daffi23 - *October 20, 2010, 12:24 pm*
Hmmm, my McAfee on my test pc detects it...(when run)

Awesome work though.

HalFDeaD™ - *October 20, 2010, 12:34 pm*
Merci l'ami. Je viens de decrypter le pass. J'vais tester avec mon server Cybergate et j'passerai plus tard dire ce que j'en pense

EDIT : Awesome crypter ! 100% FUD on novirusthanks and with my AV avira antivir premium on scantime/runtime !

J'te remercie l'ami. C'est du super boulot ton crypter :)

wyterzzz - *October 20, 2010, 1:49 pm*
MUHAHAHAHA "Condom".Hey man please change the title.It is "Codedom" not "Condom" ?.

[img]http://scrapetv.com/News/News%20Pages/Business/images-2/condom-being-inflated-over-mans-head.jpg[/img]

c6p0 - *October 20, 2010, 1:51 pm*
lol :D

first page fixed :p

Obs3rv3r - *October 20, 2010, 1:53 pm*
Letters on new GUI 1.9 is hard to read. Black background and gray letters = hard to read.
Can you make letters white (or some other color)? We will much easier read it.

deadseth - *October 20, 2010, 1:54 pm*
Can i change the extension file type from exe to mp3,jpeg,jpg,gif or something else ??
My server is the exe and the binding file is photo or song so when i send it look the extension of exe(over messenger).

Vort2 - *October 20, 2010, 1:56 pm*
I am trying over an hour to find the password and I found always wrong password.

Can someone send me a pm the password or some help how to find it. I follow the tips

Ruffa - *October 20, 2010, 2:14 pm*
Good job c6p0.

I think you have to change the Letter colour to white so people can read it good.
The gui looks wicked now :)

admir74 - *October 20, 2010, 2:30 pm*
blabla
and now???
everyone can help me to decrypt zhe pass!!

c6p0 - *October 20, 2010, 2:31 pm*
white ? no middle white i dont know :)
next update :D

thanks
(Oct 20, 2010 01:54 PM)deadseth Wrote: [CITE] Can i change the extension file type from exe to mp3,jpeg,jpg,gif or something else ??
My server is the exe and the binding file is photo or song so when i send it look the extension of exe(over messenger).
use search " embedded exe in jpg "
2 methods

and now???
whats this ?
dont post password here .

chootka - *October 20, 2010, 2:40 pm*
New GUI is great C6p0.. Just needed the little bright color fr the text, You can choose color like White over black or Lime green over black (Like Matrix).. Anything of your choice but little Bright (Readable)...

nicklan - *October 20, 2010, 2:41 pm*
When DLL crypt will be realised?

Vevion - *October 20, 2010, 2:56 pm*
Tried this on every istealer avaible and for some reaon it just doesn't work, it gets fully FUD, and the binded file OPENS up, but still the istealer doesn't upload the logs, whats wrong with this? You got msn you could possibly support me with?

or could you possibly send me a PM with a screenshot for correct settings? I'm binding the file with cryptor, not with istealer.

Plus All I change from default settings is the custom injection

Khronos - *October 20, 2010, 2:58 pm*
Hey,

I'm not going to ask for the password as that would be cheating :P but I was wondering if someone could point me in the direction of how to do this, you put on your first post that it is noob proof, which it is, but noobs (like me) will always be noobs unless someone teaches them. So please, can

someone give me some pointers and same general knowledge.

Many thanks,

EDIT1: c6p0, thanks a lot for all your help with this, and after finally getting it, I love it!

Silver Haze - *October 20, 2010, 3:17 pm*
Could someone help me, as well? I'm having the same problem Khronos was having. I've tried quite a few times at getting the password but I'm pretty confused.

Vevion - *October 20, 2010, 3:25 pm*
Just paste it into a word document, then copy/paste it into the decrypt site, and you got ur pass\

copy/pasting direct from site does not work!

, tell me if im not allowed to tell this xD

admir74 - *October 20, 2010, 3:36 pm*
what i make wrong

always i have a error decode and the key must be a least 6 characters long??

yoyoatw - *October 20, 2010, 3:40 pm*
...I've been doing this for 1 hour 30 min to no avail. First I copy the password into notepad/wordpad. Then I recopy it from notepad, into crypo. I decrypt using the given decryption codes (Asci etc), and i still get an error (a bunch of random symbols in crypo). Any help would be appreiated

c6p0 - *October 20, 2010, 3:44 pm*
removed spaces and no caracteres ascii,start and the end .

normal ascii chain %6E%6F%6F%6F%62
removed spaces and no caracteres ascii,start and the end .

normal ascii chain %6E%6F%6F%6F%62

(Oct 20, 2010 03:53 PM)Meyk90 Wrote: *[CITE]* Corrupt my Cg server <.< anyway thx for all ^^ awesome job ;)
Confirmed working fine with CyberGate.

Use "no injection"

Vevion - *October 20, 2010, 4:06 pm*
ok somehow it magicly works with istealer 6.3 now, but now I have trouble because the iconchanger doesn't support .exe files, and the file cloner doesn't work, what's up with that?

elbuay92 - *October 20, 2010, 4:24 pm*
Hi, I am new in this forum and i have tried all of the ways that i know of decrypting the password, please someone help me to decrypt the password I am not saying to directly say the password only to teach me.
Thanks :)

admir74 - *October 20, 2010, 4:30 pm*
i give up!! error encode 2hours.f...this shit

c6p0 - *October 20, 2010, 5:59 pm*
1.9.1

corrige bug path
renew color gui
same password 1.9

El Duce - *October 20, 2010, 6:25 pm*
Thanxs, man (:
Nice program , works perfectly

and still fud Awesome DUDE ;)

c6p0 - *October 20, 2010, 7:31 pm*
thanks ;)

add next or next next update codedom compiler for crypter. with choice for compile your serv .
with codedom (my personnal codedom remake)
or with classical method used now (my personnal injection method)

.

jimbo- - *October 20, 2010, 7:32 pm*
C6p0 I know why ur crypter doesn't work with Metus. Metus doesn't support EOF. I noticed that even if I uncheck Auto EOF, EOF is still written. if u change this option from auto EOF to EOF on/off, ur crypter would probably work with booters too rather than just RATS

Always - *October 20, 2010, 8:39 pm*
Sorry I still haven't gotten to testing this new version out yet, been really busy, I will do some this weekend though and bring my feedback here.

Modem Down - *October 20, 2010, 9:59 pm*
Alright, I give, password hints? I don't need to be given the answer, just a smart ass hint or 2.

No, I'm not worthy.. does that help at all?

Obs3rv3r - *October 20, 2010, 10:58 pm*
New GUI 1.9.1 is much better than old 1.9. Good job.

Always - *October 20, 2010, 11:22 pm*
Ok...I'm just going to repeat these important steps to get the pass:

1.Use firefox during the entire process
2.copy+paste into notepad

3.remove all the unwanted characters (spaces and ?s), make sure you get all of them
4.The rest you should be able to figure out yourself, it's called noob-proof for a reason

Hope I didn't give too much away and good luck!

Khronos - *October 20, 2010, 11:37 pm*

RockerAlex made this post a while ago, i'm also experiencing the same problem except it is corrupting my CG server. (Oct 16, 2010 06:03 PM)RockerAlex Wrote: *[CITE]* Testing now ... saying there's another update when I'm on 1.8.5 lol.

Crypts my CyberGate on Windows 7 64 bit without corrupting! But ... there's still an error saying "Attempted to read or write protected memory. This is often an indication that other memory is corrupt" and the file "Winz.exe" is detected by Avira.
I'v set my server to no injection and to the settings someone else said worked earlier on in the thread, i'v tried disabling everything on the crypter and on the server to no avail, same issue.

Obs3rv3r - *October 20, 2010, 11:49 pm*

@rfire90 - they can use Opera, Chrome or some other browser. I use Opera and have no problems with decrypting password

@Khronos - use Triple DES, don't use RC4 and change icon. I use CyberGate and have no problems with this crypter.

XxTheGenocidexX - *October 21, 2010, 12:11 am*

awsome got my startup to work but its not runtime btw got this message when i rebooted:
[img]http://img219.imageshack.us/img219/5053/avirak.jpg[/img]

Khronos - *October 21, 2010, 12:17 am*

Do you use any sort of compatibility modes with it? I'm on Win7 64.

Here are my settings

[IMG]http://img143.imageshack.us/img143/8524/settingscyber.png[/IMG]

evilman - *October 21, 2010, 12:27 am*

It"s runtime detected by avira on win 7 64.

Always - *October 21, 2010, 12:39 am*

(Oct 20, 2010 11:49 PM)Obs3rv3r Wrote: *[CITE]* @rfire90 - they can use Opera, Chrome or some other browser. I use Opera and have no problems with decrypting password

@Khronos - use Triple DES, don't use RC4 and change icon. I use CyberGate and have no problems with this crypter.
I've found while using other browsers, when copying to notepad, then decrypting it gives errors and it doesn't show spaces that need to be removed in notepad

maybe it's different for others...

DaRkOoO - *October 21, 2010, 12:47 am*
@Khronos, that will not work.
You can't use injection and startup options on both, crypter and CG.Use just one.
My suggestion would be to use crypter only to encrypt your file, use CG settings.
Anyway, this is codedom crypter now ?
I might try it.

Obs3rv3r - *October 21, 2010, 2:04 am*
@Khronos - I am on XP SP3 and don't use any compatibility modes.

jimbo- - *October 21, 2010, 2:51 am*
No it's not codedom yet. That's the next update

c6p0 - *October 21, 2010, 3:51 am*
thanks for feedbacks .

yep now the droop temp 64 bits its detected by avira .
i works for change this .other OS no 64 bits FUD.

ok next update give you possibility desactivated auto EOF.
for compatibilty with metus and other .

only multi binders "own'z tool'z" use codedom .
next update give you choice for crypt you server with "codedom" or classical method .

thanks .

if you use binder dont forget to check buttons or this dont bind your appli man.

Obs3rv3r - *October 21, 2010, 4:05 am*
Quote:next update give you choice for crypt you server with "codedom" or classical method .
What is better in your opinion?

c6p0 - *October 21, 2010, 4:09 am*
for me classical method its FUD longer ...
i have added codedom for binder,I'll do that you can use it to encrypt your server .
choice 2 methods "codedom" or "classical"

Al3x - *October 21, 2010, 4:22 am*
Are you removing 64 bit compatibility again? :/

c6p0 - *October 21, 2010, 4:24 am*
(Oct 21, 2010 04:22 AM)RockerAlex Wrote: *[CITE]* Are you removing 64 bit compatibility again? :/
no :) just change method for startup server 64 bits dont use droops this is FUD 2 day lol .
i find another method FUD .

Khronos - *October 21, 2010, 4:48 am*
Got it working, awesome cheers.

c6p0 - *October 21, 2010, 4:58 am*
anyone for test this patch for fix "attempted to read or write protected memory error" 64bits error "crypter" ???

http://connect.microsoft.com/VisualStudio/Downloads/DownloadDetails.aspx?DownloadID=6003

or this

It's now working for my blackshades:)

Also this gui is sexy. Good job, thanks!

DarkLight188 - *October 21, 2010, 4:53 pm*
Still detected on runtime here. (64-bit)

c6p0 - *October 21, 2010, 5:03 pm*
fucking 64 bits :p
not easy for test this i have not 64 bits at home .

anyone confirm for 64bits ?

HalFDeaD™ - *October 21, 2010, 5:08 pm*
Thanks for the new update. I don't know if it's a bug but my crypted CG server open a local disk

window when I execute it. Never seen that with the previous version. Otherwise work well & 100% FUD ^^

c6p0 - *October 21, 2010, 5:12 pm*
yes injection to explorer open window all start .
try with svchost or csrss or any processus no windowed .

DarkLight188 - *October 21, 2010, 5:15 pm*
In first post "droop" should be "drop"...etc :)

c6p0 - *October 21, 2010, 5:20 pm*
fixed :p
you have any suggestion egain ? :)

HalFDeaD™ - *October 21, 2010, 5:25 pm*
xD I'm an idiot ! I forget the explorer process.

D3lud3d - *October 21, 2010, 5:39 pm*
Thanks a lot for this man, it's a great alternative for a startup option when default programs don't quite work

elbuay92 - *October 21, 2010, 5:50 pm*
Hi, Please someone help me decrypt this password I have 3 days trying to decrypt the password but I cant, need help.
Many thanks.

rexraymond - *October 21, 2010, 6:39 pm*
ok i have no idea what i doing wrong now lol im getting this ass my password when i know its not correct... o{¨\À

also im using windows 7 ultimate i.e crome /i.e/fire fox i hav tried dycrypting it and had no sucsess

port_scanner - *October 21, 2010, 7:07 pm*
I would like to take some time to vouch for this crypter it is awsome.Much appreciated for this c6p0 bro and keep up the good work ? ? ? ? ? ? ? ?

Zmind - *October 21, 2010, 7:15 pm*
Jesus i cant uninstall it again lol for those who say that the server dont work after restart...its a lie!!!! lol

I made cure, checked the system32 and theres nothing there...

Super power injection :D

But i dont know why but i am having troubles conecting..i formated the pc for fresh start, and runed the server and only worked after the restart...

Older crypter versions where more faster i guess lol but for the other hand this injection his hell :D

pongga - *October 21, 2010, 7:38 pm*
what is the password...?[/font]?[/size]

Yeiw2323 - *October 21, 2010, 7:54 pm*

hey nice but how do we get the password?

rexraymond - *October 21, 2010, 8:01 pm*
read the first post it tells you how to decrypt the password

nvm ^^ great crypter by the way !! :D need anything done for yourself? links to be click ?

kucingsiam - *October 21, 2010, 10:01 pm*
once crypt my cybergate server it work auto startup/logon after the victim reboot the pc... please advice

rexraymond - *October 21, 2010, 11:27 pm*
kucing the startup option....

kaleman_68 - *October 21, 2010, 11:52 pm*
I see a newer version. I download it but test it later because I have to my work.
back home I want to start testing and see what ?? A newer version aa

c6p0 you're going too fast LOL

good work

rexraymond - *October 22, 2010, 1:38 am*
ok i see theres an update yet when i click the update button nothing happens then i look on the thread and same version 1.9.2 and when i try to crypt (Erreur: Look status....-) it will still crypt just gives me that msg is that about updating? as somtimes it says crypted! and somtimes the other msg

xmastex - *October 22, 2010, 1:55 am*
So, could somebody write all the settings in cybergate/own'z crypter in order to make these 2 elements work?

54samaf - *October 22, 2010, 1:56 am*
good crypter it s working with spynet?

scrawls - *October 22, 2010, 2:01 am*
Lame ass Norton is using Sonar and Download Insight to intercept uploaded files to vics' computers. Unable to bypass process while someone is atk to run updated servers, etc.

c6p0, can this be bypassed in a future release?

it's not detected as virus, just that it was downloaded or that it was trying to run. giving option to user to stop or automatically delete before run. norton sucks my balls.

also, I love that it shows originating IP in the window as well. ? VPN, anyone?...

d1rekt0r - *October 22, 2010, 2:11 am*
Best crypter on HF and only 60rep , come on Leets and Ubers !

SHARB - *October 22, 2010, 2:21 am*
Can You msg the new password tnx ?

Hack-IT! - *October 22, 2010, 2:22 am*
yes i too need the pass and ub3r and leets should repute him and vouch for him

rexraymond - *October 22, 2010, 2:32 am*

for all of you asking for the password its the same one and if you dont know it then look on the first page and theres the "noob proof" code to get the password also on another note
==

ok i see theres an update yet when i click the update button nothing happens then i look on the thread and same version 1.9.2 and when i try to crypt (Erreur: Look status....-) it will still crypt just gives me that msg is that about updating? as somtimes it says crypted! and somtimes the other msg

xmastex - *October 22, 2010, 2:36 am*

Ok so: Cybergate = NO INJECTION + Crypter = Custom injection to EXPLORER.EXE ----> Cybergate works fine but the explorer window appears anytime the pc is rebooted.
Cybergate = INJECTION TO DEFAULT BROWSER + Crypyer = No custom injection --> Cybergate is not working

This is my experience.

Updates:
if i use svchost instead of explorer as the injection process, there are no windows coming up when the pc starts. There's just the classical windows error saying "svchost has been terminated etc etc" which i have to close twice. Happens on Windows 7 though. Anyone else?

SHARB - *October 22, 2010, 2:46 am*

someone i know also has this problem :/ he also has windows 7 64 bits think its a fault of that?

Cr4zy Kr0n1x - *October 22, 2010, 3:12 am*

that is good crypter.. and is very very old post mate !!! i think is not more fud :/

c6p0 - *October 22, 2010, 3:12 am*

hey

thanks for feedbacks !
yep this error appear with seven 64 bits do not find my error in the code .
but run great with all other OS its strange .

explorer start all time 1 windows all restart if you choice explorer .
i used this by defaut for compatibility with all RAT .

easy you change this just tape "name" injection custom you want without extension .
run with all name/processus you want !
(Oct 22, 2010 03:12 AM)Cr4zy Kr0n1x Wrote: *[CITE]* that is good crypter.. and is very very old post mate !!! i think is not more fud :/
what ? you shure ? :)
this post update daily and yes its FUD !!

I've got over 200 victims using CyberGate crypted with Ownz ... you're doing something wrong.

bruderliebe - *October 22, 2010, 6:25 am*
are you using injection in the rat or in cybergate?
Im trying at a slave my cryped things but they wont work
I got a error tbh if i use EOF

Al3x - *October 22, 2010, 6:32 am*
CyberGate requires EOF, the error doesn't matter.

CyberGate injection needs to be off. Turn injection on in the crypter and make sure a process is typed in like "explorer" or "winlogon."

iTouchu - *October 22, 2010, 7:43 am*
Works on blackshades (Pretty much just used crypter settings) thanks for the awesome crypter.

CursedPX - *October 22, 2010, 7:45 am*
Thanks for the crypter bro :)

Robert Nesta Marley - *October 22, 2010, 8:15 am*
ahh yes it is a win7 64 bit problem, confirmed :) but i tried it out on my vista 32 bit laptop and i must say its a really good crypter, worked with cybergate, blackshades and even dark comet ! which is pretty rare :P i look forward to future updates and I pray you can find a solution for win 7 64 bit so i can use it on my main hack comp :P keep up the good work !

kucingsiam - *October 22, 2010, 8:31 am*
but the weakness is cybergate server not auto stat up.. after the victim reboot pc the server not auto connect or auto start... even i tick "add to start up" i think this crypter curropt the cybergate server while crypting.. please do advise... thanks

No. I just opened the crypter . It asks password to login and i put pass and then this comes. I logged only one time. I also tested in my 32bit PC. It works in 32bit PC. But when i execute it on 64bit pc, its giving this error.

c6p0 - *October 22, 2010, 9:58 am*
ok ok egain 64 bits !
before start crypter right click run as administrator ok ?
test compatibility xp right click egain .

and please next error click detail and copy/paste detail here please .

thanks

zanardi - *October 22, 2010, 10:09 am*
I got it working yesterday with 1.9.1, but now when i have 1.9.2 it doesn't work anymore with Cybergate. It also doesn't work on my own. My settings:

Note: The server doesn't work when i haven't crypted yet (normal because 'no injection') but after i crypted he also does nothing, i tested on my own and on my brother.

[img]http://img186.imageshack.us/img186/5535/naamloosmm.jpg[/img]

oooh !!!! pliiiiz help mee :'(
pliiz pm me ... !! password waaa

yoyoatw - *October 22, 2010, 1:04 pm*

Hey man, i'm seeing all the good reviews for your crypter, but I still can't get the password right. So here is what i am doing. First I copy the password to notepad. Then i delete all the spaces, then I delete all the "A" charachters. Then I go on crypo.com and decode in this order = tascii -> OKTO3 ->Zong22 -> Gila 7. But I never get the right password. It always comes up as "op" then a random symbol. Any help will be appreciated. I've been trying to decode the password for about 5 hours now and i feel miserable. Thanks in advance
I love the comments you're getting on your cryter! But the sad thing is that i still haven't decrypted the password. Please hint me as to what i'm doing wrong or lead me in the right direction. First I copy the password off your thread, Then I post into notepad and I delete all the spaces and the "A" characters. Then I copy that and go to crypo.com. Then i clicked on decrypt T-ASCII, then i pasted the code into there. Then I copy that result and I click on decrypt OKTO3, then paste, decrypt then copy. Then I repeat the process for decrpyting zong22, then i finally do Gila7. And my final password is "op". Please Help!

daffi23 - *October 22, 2010, 1:36 pm*

I always download these crypters, since I really think they r very good. However, can it be that as soon as a new version is out (in this case 1.9.2), the older versions do not work anymore (in my case 1.8.9)??? I now get an error saying something about 'unhandled exceptions in the application...'. Didn't get this message before! (using 1.8.9)

I would love to stick with 1 version for a while. As long as it stays FUB anyway...

c6p0 - *October 22, 2010, 2:06 pm*

(Oct 22, 2010 12:10 PM)DarkLight188 Wrote: *[CITE]* Ya, I still get "Trojan horse PSW.Generic7.CBSV" when it's ran, even with those settings. Using AVG 2011 btw.

Also, how you spreading?
how to for crypt your server ?
whats you used in the crypter .

whats server you say ?
downloader
server RAT crypted with crypter
file bind with unlimited binder codedom ?

do not use binder only for change your assembly ffs .
change this with reshack ! .

screenshoots .
(Oct 22, 2010 01:36 PM)daffi23 Wrote: [CITE] I always download these crypters, since I really think they r very good. However, can it be that as soon as a new version is out (in this case 1.9.2), the older versions do not work anymore (in my case 1.8.9)??? I now get an error saying something about 'unhandled exceptions in the application...'. Didn't get this message before! (using 1.8.9)

I would love to stick with 1 version for a while. As long as it stays FUB anyway...
yes this version its desactivated only 1.9.2 run now .

daffi23 - *October 22, 2010, 2:18 pm*
(Oct 22, 2010 02:06 PM)c6p0 Wrote: [CITE] yes this version its desactivated only 1.9.2 run now .
Ah! Thanks!
Will be downloading again soon then :-).

Thanks for the great crypters btw. awesome work

Al3x - *October 22, 2010, 2:21 pm*
I really hope Ownz isn't detected by AVG 2011 lol ... AVG is a really, really, really bad AV. We have no way of checking since NVT doesn't support AVG2011.

c6p0 - *October 22, 2010, 2:25 pm*
no pb bro

next update add icone change and assembly change in ownz toolz.
only for use with borlo/stub or crypted server .
dont use binder codedom after you crypt your server for change only assembly !
assembly binder codedom only used if you bind file !!!

zanardi - *October 22, 2010, 2:39 pm*
It really doesn't work with cybergate right now i used own'z crypter in the older versions and it worked perfect. Now it doesn't work i also heard it of other ppl

they are annoying,
especially when he knows nothing and who come here to say that its not working.

and please stop spam my PM

I'm not your mom you cope alone with all your ports.

:)

zanardi - *October 22, 2010, 2:50 pm*

I don't mean it doesn't work, it should work but i have the same settings as the older versions and it still doesn't work i tried everything. If you can just post the CORRECT settings (everyone says something else) it would be alot easier.

c6p0 - *October 22, 2010, 2:53 pm*

yes i know this song you create the same server to last version you wrong ...
i have now (Total 1,437) PM dude no time to help all user ! .

Ruffa - *October 22, 2010, 2:56 pm*

C6p0 also has a human being life.
He might want to create a support team, i'll join it if he makes one, so he can continue living, instead of answering all pm's.
C6p0 i Respect your work, good job!

injector sql - *October 22, 2010, 2:56 pm*

thanks for ur pm but ...!!!! what's the password To entre to the Software ????

zanardi - *October 22, 2010, 2:57 pm*

Nope created a new one (same settings) and tried all settings what they said at this thread. Sorry i won't pm you anymore but can you please post the correct settings it would help alot of ppl

injector sql - *October 22, 2010, 2:58 pm*

waiting Your reply brother :)

Zmind - *October 22, 2010, 3:00 pm*

c6p0 when do you fix the password recovery on the cybergate server? would be so nice :)

I am testing the new 1.9.2 with cybergate and it works PERFECT

Vista premium,vista business,xp home,xp professional,7 premium,7 starter..it rocks!!

The only thing to become perfect is the password recovery..it doesnt work..and if it was working u have no need to use istelar keyloggers etc...

Please fix this :)

Ruffa - *October 22, 2010, 3:01 pm*

Not his fault.
Cybergate drops a password stealing file, will be hard to fix that.

Torrents.
The icon is high res, ya.

corruptxfatal - *October 22, 2010, 4:07 pm*

are people use rc4 or triple des for their dark comet servers?

c6p0 - *October 22, 2010, 4:10 pm*

you choice rc4 works nice encryptions ! server small 300 ko
triples des works strong encryptions server big . 600ko

with darkcomet 2.2 dont forget use defaut settings bro ! .

fireflyyy - *October 22, 2010, 4:11 pm*

Hey Zanardi!! I Will TEACH YOU HOW TO PUT THIS Thing work on Cybergate!!
on cybergate in lab "Install" you dont check melt file on and all registery and Active Setup,and put no injection, at rest you can put wath you want, create your server, and then go to Own'z Crypter 1.9.2:

Things you really need to put on is --> Runtimes 32&64 Bits IMPORTANT Auto EOF and Costume injection, and finaly if u want to add to setup, just check the box below "Final Crypt"

Ok, thats it, i just talked becuse some people are talking about that and thar make me nervous xD!!

And To Make it FUD, Change ICON with Own'z Crypter too, and then change the descryption etc... Here is my SCAN!!

an easy workaround that i use with malware and ccleaner is i bind my server to the program .exe and reup to vic. everytime they scan to clean their system they reinfect it. ?

warhacker - *October 22, 2010, 11:16 pm*

ok i got this and when I try to decrypt it i get an erro

Ú -Ú

csas25 - *October 22, 2010, 11:46 pm*

Great crypter, would be better if you gave us the pass though :P :(

Ruffa - *October 23, 2010, 1:14 am*

@csas25,

Not really, it's anti-noob protection, the stub will last longer FUD.
So it's better with this password, if you invest a little time to decrypt and reading the tips then it's done within 3 minutes.

csas25 - *October 23, 2010, 1:46 am*

(Oct 23, 2010 01:14 AM)Ruffa Wrote: [CITE] @csas25,

So it's better with this password, if you invest a little time to decrypt and reading the tips then it's done within 3 minutes.I did invest like 2 hours decrypting with all kinds of programs yesterday , all brought up something - but too much or wrong

Warsaw - *October 23, 2010, 1:49 am*

I still can't understand anything in the OP about decrypting the password. The grammar is terrible and I can't understand what he's trying to say. Does anyone here understand him that can type proper English?

Obs3rv3r - *October 23, 2010, 1:51 am*

(Oct 23, 2010 01:46 AM)csas25 Wrote: [CITE] I did invest like 2 hours decrypting with all kinds of programs yesterday , all brought up something - but too much or wrong
Password is easy, you can decrypt it in less than 1 minute.

Warsaw - *October 23, 2010, 1:53 am*

(Oct 23, 2010 01:51 AM)Obs3rv3r Wrote: *[CITE]* Password is easy, you can decrypt it in less than 1 minute.Hah. I must be doing something wrong then.
Paste T-ASCII into notepad, get rid of spaces. Decrypt. Get OKTO3 string, try and decrypt, but get an error. What am I doing wrong? I'm using firefox and crypo.com. Augh.

Obs3rv3r - *October 23, 2010, 2:43 am*

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

thanks man !

kathiresan - *October 23, 2010, 11:01 am*
server not working after crypting with ownz crypter

c6p0 - *October 23, 2010, 11:15 am*
if you have any problem with sour server go to :
https://hackforums.net/showthread.php?tid=582083

while keeping the topic/forum clean.

zomfg - *October 23, 2010, 12:04 pm*
seriously, people stop asking for the password, if you can't figure it out then you probably shouldn't be using it.

fireflyyy - *October 23, 2010, 12:57 pm*
HEY THIS IS IMPORTANT FOR c6p0!!! PLEASE READ!
On Cybergate Servers.. we cant put melt file and injection... but... Its Stupid i think, becuse the "add to startup" of the Own'z crypter, will open the server but the file we bind too, and that means, always the victim restart Computer will open the binded file... and thats too bad...i'm not saying its a bad work, its a very good work... but you can fix it?

Things you need to FIX:

Fully Customizable "Add to Startup"
Problem with Binded files that always at startup the binded files load too, try do not delete them after 1st execution..:D

xD I Need to Give a Work to my Professor, and i need this crypter by be FUD and more trustable than others public... and i need to send they tomorrow or after tomorrow... :|, and i want to bind to my server a Powerpoint... Thats why i see that BUG's... Try Fix them the most fast possible, asking by a favor c6p0... Remember Is on Cybergate Server's...
And its very important have Fully Customizable "add to startup" and the problem of binded files at startup too...

Reply please...

faboloustarr - *October 23, 2010, 1:09 pm*
Thank !
Good crypter.?

corruptxfatal - *October 23, 2010, 1:28 pm*
having the same problem as firefly. could i crypt the server then bind after that with another program? will the server only startup or the binded file?

fireflyyy - *October 23, 2010, 1:39 pm*
dont know, but very probably that the server will be detected after join with another program, you can test, i already tested and its detected...
This is a problem that c6p0 Need's to FIX... and this problem is Urgent...

c6p0 - *October 23, 2010, 1:41 pm*
dont use binder crypter .
use binder codedom with delay for executions .

or

for use binder crypter you need uncheck add to startup .
check full options startup your BOT only .

fireflyyy - *October 23, 2010, 1:41 pm*
And I'm Sure that Too mutch people have this problem cuse if you want to spread, u need to bind something to victim think is real... and with that, after he download and execute the binded file exectes(normal), then he restart's and PUM!!! The crypter opens and The binded file too!!

c6p0 - *October 23, 2010, 1:43 pm*
its same with all crypter bro .
easy just remove startup crypter check startup only your bot .

fireflyyy - *October 23, 2010, 1:45 pm*
YES I Know c6p0 I TESTED Wath You said, but Injection mode dont work with ownz crypter... remember :| :)
and its bad without Injection...

c6p0 - *October 23, 2010, 1:47 pm*
this is work if you check only one .
cybergate
or crypter

not 2 ...

crypt your server with startup checked all options you want crypter. after that
codedom binder for bind your file .

fireflyyy - *October 23, 2010, 1:50 pm*
ok I WIll Test It...

--
Message Too Short
only one question, as i cant put injection on cybergate, i put in ownz crypter... that dont make diference right?
as i cant put injection mode on cybergate i put injection mode on ownz crypter, but as i bind the file it will be the samething? becuse the file is binded with server...!?

c6p0 - *October 23, 2010, 1:58 pm*
this is the binder codedom :

[img]http://niglo-land.co.cc/pump.PNG[/img]

this is independant crypter . after make your server go to own'z toolz and bind any file you want with delay or not .
this binder dont use runpe no add to startup

options delay click options add sleep time(codedom binder)

[img]http://niglo-land.co.cc/option.PNG[/img]

fireflyyy - *October 23, 2010, 2:03 pm*
Prest Atention!!
Prest atention to that, you said to make all startup on the cybergate... yes i do it... but i cant put injection mode becuse it isnt compatible with Own'z Crypter, okay, lets put the inject mode on ownz crypter when we bind the file... thats allright... but when the victim executes the First time it will have "inject mode" But When he restarts PC, it will dont have Inject mode becuse the Cybergate server dont have inject mode active... Understand? You dont know how to fix it?

c6p0 - *October 23, 2010, 2:10 pm*
yes i know for this that uncheck injections custom crypter ? :X
if you know for use cybergate only scantime .

or dont bind your file with crypter use binder codedom own'z tool'z .

wkdw1ll1ams - *October 23, 2010, 2:18 pm*
dark comet isnt fud D: every anti detects the installed rat :(

fireflyyy - *October 23, 2010, 2:22 pm*
hey wkdw1ll1ams, you have dark comet? can u sand it to me? Upload for megaupload, and PM me with link please ok?
c6p0 With codom my Av detects it in RUNTIME...
Tell me Step by Step to have injection mode, with binded file, and just server startups...

kucingsiam - *October 23, 2010, 2:29 pm*

as follow from c6p0 untick all the anti's/melt and so on so forth... but always got problem with cybergate server. TESTED more than 1000 times.. after crypt the cybergate server and victim run it but it work auto startup after they reboot the pc.(already the codedom or tick startup always get the failed result as usual. Please fix the bug and do advise c6p0...coz will waste spreading the rat and after reboot not auto connect :((

fireflyyy - *October 23, 2010, 2:32 pm*
kucingsiam, it auto connects to you after reboot, but the binded file will start with startup all the times!!

Now for c6p0 With codom my Av detects it in RUNTIME...
Tell me Step by Step to have injection mode, with binded file, and just server startups...

Ruffa - *October 23, 2010, 2:34 pm*

its still fud?? i will try it

downspider - *October 24, 2010, 1:06 am*

I GOT THE PASSWORD....
THANKS A LOT

SHARB - *October 24, 2010, 3:52 am*

i have forget Password Can You send for me Again Becuz of i am installed my computer ;/

sunguhan - *October 24, 2010, 3:54 am*

I've got a problem!
After the pass decryption I started the crypter. Then it asked me for another password. Well... I assumed that the pass was the one i decrypted, so i pasted it there and pressed login and... nothing happens. I made sure that there wasn't any spelling errors and so on, but still no good results?
So does the crypter use another password or?

I have read your post like 10 times, decrypted the pass several times, just to make sure that I haven't done anything wrong..
Oh well... I'm kinda stuck now.. Is the pass the same as the one to the archive or not?

EDIT:
I can pm you the pass, as prove that i have actually decrypted it...

c6p0 - *October 24, 2010, 4:22 am*
one nice user named DaRkOoO scann the server crypted scan4you !
many thanks man for help the community .

thanks

If u cant decrypt this within a week then u don't deserve the crypter. He tells u what order to decrypt in.

Always - *October 24, 2010, 9:58 am*
Something I'm concerned about is when you use add to startup in the crypter, each time a vista or 7 user restarts their computer it will ask them if they wish to open it and if they click "NO" it will be blocked.

HalFDeaD™ - *October 24, 2010, 10:09 am*
@rfire90

don't bind files with the crypter, use own'z tools binder.

daffi23 - *October 24, 2010, 10:32 am*
(Oct 24, 2010 09:58 AM)rfire90 Wrote: *[CITE]* Something I'm concerned about is when you use add to startup in the crypter, each time a vista or 7 user restarts their computer it will ask them if they wish to open it and if they click "NO" it will be blocked.
I have the same issue, but found the following. I use injection into winlogon, and add to startup. Then, after restart I get the message that winlogon has an error and needs to close. Click OK, and then all runs well. After restartin again I do no tget the message...
Strange, but it works..

arnolddrita - *October 24, 2010, 10:54 am*
Hey can anyone please tell me what options to use for Darkcomet? PLZ

Arzahel - *October 24, 2010, 11:00 am*
Thanks easy password ^^ one question what settings should I use to encyrpt a cerberus server?

deadseth - *October 24, 2010, 12:31 pm*
c6p0 what exactly is/do the borlo.exe??
I have installed all .Net Frameworks in my win7 x64 but can't run it even if a press right click run as administrator..

djpommes - *October 24, 2010, 12:32 pm*
love how you keep inproving :) love the new gui

fireflyyy - *October 24, 2010, 12:38 pm*
yeah, c6p0 its a big crypter

jimbo- - *October 24, 2010, 12:50 pm*
(Oct 24, 2010 12:31 PM)deadseth Wrote: *[CITE]* c6p0 what exactly is/do the borlo.exe??

I have installed all .Net Frameworks in my win7 x64 but can't run it even if a press right click run as administrator..borlo.exe is the stub for the crypter. You need the stub. The stub is that file that makes your server FUD. You are not supposed to run borlo.exe
also, the EOF toggle option didn't fix metus problems. It's still a good option to have. Idk if this helps c6p0 but whenever I try to run the crypted server to test, it doesn't execute at all showing no error message.

fireflyyy - *October 24, 2010, 1:17 pm*

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

jimbo- - *October 25, 2010, 2:39 am*
It means the login server is down don't worry it will be up soon.

nelec - *October 25, 2010, 2:56 am*
thx c6p0, it's great FUD crypter.

It's work with cybergate 1.07 & spynet 2.7 (restart ok for both)

note : if UAC is activated in Vista - 7, the restart RAT don't work

All French people are not on strike ;)

kucingsiam - *October 25, 2010, 3:42 am*

i smell something fishy on this crypt.. what ever way i tried to crypt and no matter how many times i change the setting and crypt.. the cybergate server wont autorun after victim restart/reboot the pc. i think this crypter need to be fix after a lot people complaining not autorun the cybergate server...

zalikich - *October 25, 2010, 4:07 am*

os you have ?
server used ?

tested with cybergates svchost works great for me .
win xp pro 32
vista pro 32

SIM-307931 - *October 25, 2010, 11:27 am*

Cybergate 1.07.5 with Svchost injection works good.
C6p0, please tell me why does your crypter connect to internet when I run it ? :D

And why you disabled previous versions ;/ It may be use as file pumper or binder in future ^^

Cheers

fireflyyy - *October 25, 2010, 11:28 am*

xD c6p0 I decrypted the pass, and you said, it depends of OS System... no Bro, if you say Depends of Browser!! I Acept! becuse i tested to decrypt on my with Opera Browser And It Give me Error's.. Then Go to my Brother Computer With * and I can Decrypt, And he have WIndows XP, And on Mine, i have the * too and decrypted and i have Win7... so * is good...
***--> Good Browser to Decrypt

See wath is The Browser-->Spoiler (Click to View)Ecrypted on this order:
T-ASCII-->GILA7-->BASE64
%47%6F%6F%67%6C%65%2E%43%68%72%6F%6D%65
I Put a encryptation too for ANTI-NOOBS...

c6p0 - *October 25, 2010, 11:40 am*

depending browser ?
hmm ok update first post
i have firefox :)

auth online for news and for reduce maximun leecher.
87000 user now :D
i can disable all versions crypter/borlo when i want.

daffi23 - *October 25, 2010, 11:44 am*

(Oct 25, 2010 11:10 AM)c6p0 Wrote: *[CITE]* os you have ?

ok fixed :p
if you have any suggestion for modified tips :)

thanks .

crusty - *October 25, 2010, 1:14 pm*
Doesn't work on my Darkcomet 2.2

MeDdErS - *October 25, 2010, 1:17 pm*
So does this work on CyberGate?

c6p0 - *October 25, 2010, 1:21 pm*
yes works well with cybergate and darkcomet !
just dont forget crypter have complete injection .

darkcomet use defaut settings .
works well with explorer and winlogon

fireflyyy - *October 25, 2010, 1:23 pm*

(Oct 25, 2010 01:17 PM)MeDdErS Wrote: [CITE] So does this work on CyberGate?
Yes It Works! I WIll Made A Toturial Right Now With Settings on Cybergate and Ownz Crypter, Tested and it Works after Victim Computer Restart

And c6p0 Now a Noob Question ? You scan files on scan4you becuse you have payed right?
xD I'm a expert but sometimes... you know...

c6p0 - *October 25, 2010, 1:25 pm*
no my friends, one user scann my file for free !
and thanks for your tutorial.

here nice user in this topic .

daffi23 - *October 25, 2010, 2:01 pm*
(Oct 25, 2010 01:08 PM)c6p0 Wrote: [CITE] ok fixed :p
if you have any suggestion for modified tips :)

thanks .
Suggestion: In the 'Toolz' section there's a binder. At the moment you cannot ad/change the icon here. Would be cool if this is also possible with this binder, just like with the crypter.

c6p0 - *October 25, 2010, 2:05 pm*
hmm yes i have added one assembly/change with flash.dll for own'z tools.
but this not good for me .the flash.dll its detected into my crypter.
i removed this ...

i learn for code my ownz assembly/icone change with guid change by reflection. next update certainely .

XxTheGenocidexX - *October 25, 2010, 2:05 pm*
sorry c6p0 but my startup worked on 1.9.0 with Cybergate but 1.9.1+ startup doesnt work and 1.8.9- didnt work either... and yes i did the right settings no im not a noob no the crypter is not only for pro's no i didnt use wrong settings yes im a dumbshit but still someone who knows how to fix?

c6p0 - *October 25, 2010, 2:07 pm*
try with new version 1.9.4(2) my friends .
feedbacks ?

XxTheGenocidexX - *October 25, 2010, 2:23 pm*
ok here is my feedback.
it still doesnt work with startup all my friends tryed it on their server/pc all didnt work :/
and thats like 6 pcs

c6p0 - *October 25, 2010, 2:26 pm*
dont use injection cybergates droop your file system
no password chrome,no melt, no delay, no upx .

do not name your server explorer if you use explorer inject for examples.
droop you serv real rep in windows .

another user send fresh scan scan4you

and yes never named your server in the settings cybergates winlogon.exe

or explorer.exe or all other real processus !

epic faill ...

fireflyyy - *October 25, 2010, 4:00 pm*

Yeah!! ? ? ? Sometimes erroring.. haha ?

jimbo- - *October 25, 2010, 4:13 pm*

c6p0 want me to post a link to this thread in my DDoSing tutorial?

yoyoatw - *October 25, 2010, 5:50 pm*

Is this Runtime FUD? Because scantime comes up as 0/32. But when I tried it on my friend's test computer, norton detected it. Any Help? I'm Using Cybergate btw.

jackass101 - *October 25, 2010, 6:33 pm*

Same thing happens to me. As soon as I re-downloaded the file as a test norton found it. I had a friend do it also and his avs found it also.

yoyoatw - *October 25, 2010, 6:45 pm*

i feel your pain... So any news on this? Are there specific settings we have to use on the crypter and cybergate, that would make runtime fud? Or is it a problem with the crypter itself?

Garrelf - *October 25, 2010, 7:41 pm*

Yataiiii !!!! It's Working great for me now !! It restart perfectly !!

You are a great coder !!!

PS: XxTheGenocidexX > If you have the same problem I had, contact me, I may be a solution for you ^^

Binaryninja - *October 25, 2010, 8:55 pm*

I can't figure out how to decrypt the password. I removed the %, and tried it step by step with no luck. Anyone? Help?

Zmind - *October 25, 2010, 9:58 pm*

I hate windows vista...day by day i am losing servers, vista servers :/

The xp and window 7 (32) they work for days, restarts etc....

But most of windows vistas victims i lose them...one or too survive..

I continue to try the crypted server on my vista test machine and still doesnt survive restart...it runs

at first and then goes to the blocked startup programs...

i am not saying thats with all vista servers, but most of them...just to feedback that i think that the server (cybergate) on vista its not a 100%

And updated the 1.9.3 server for the 1.9.4 and immediately lost them....did the same to me and after restart sometimes doesnt run.

And yes ppl, i know the right settings, i post them before and used the same settings now...

fr332play - *October 26, 2010, 12:21 am*
add LAN Spread that would be great and you should post your PayPal account here for donations

daffi23 - *October 26, 2010, 12:28 am*
(Oct 25, 2010 02:26 PM)c6p0 Wrote: *[CITE]* do not name your server explorer if you use explorer inject for examples.

Dude, this did the trick for me! I named my server svchost, AND injected in svchost (via crypter). I got an annoying error when instaling the server.
Now I name my server different, and no popup appears when installing the server.

Thanks!!

code1 - *October 26, 2010, 2:06 am*
After i have find T-ASCII code what i must do ?

ThéPoisoner - *October 26, 2010, 2:17 am*
Lol the crypter disapears when I open it...

Pitifoul - *October 26, 2010, 2:37 am*
I Don't know why but when i test in local it work gret...and when i send it to victims...nothing happend... all is good, i got my old victims..but when i update whith the new server i lost them :(!! what can i do ? i must uncheck "inection in default brower" in C.gate or disable custom injection ? i think the problem is going from that...

ThéPoisoner - *October 26, 2010, 2:46 am*
The virus won't start after it's been crypted, only if the PC is rebooted it works...

EDIT: Nvm, It works great! :D

XxTheGenocidexX - *October 26, 2010, 2:50 am*
did you do update server? or just send the file and run hidden/normal? since update doesnt work only send thing so you got 2 servers

daffi23 - *October 26, 2010, 3:08 am*
(Oct 26, 2010 02:50 AM)XxTheGenocidexX Wrote: *[CITE]* did you do update server? or just send the file and run hidden/normal? since update doesnt work only send thing so you got 2 servers
The second. Send and run. After some time the older one can be removed when all wors well witht the new one.

faboloustarr - *October 26, 2010, 3:43 am*
I have this error on my 2 pc Windows vista and Xp. Please Help

 JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
    <system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception

will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

leontodd - *October 26, 2010, 9:23 am*

My god, this is a great crypter. Its 100% FUD and works with cybergate.

Zmind - *October 26, 2010, 9:30 am*

your right..today i have lost all my windows vista servers.

i updated some servers with 1.9.4 and lost them.

i think i am gonna try another RAT besides cybergate,im sick off setting javas drive bys,torrents and losing servers..what RAT u guys advice? spynet? cereberus? darkcomet?

but even so c6p0, your crypter its still the best :)

arnolddrita - *October 26, 2010, 10:02 am*
Hey, does this crypter work with darkcomet? I personally cant make it work with darkcomet, did anybody else do it?

c6p0 - *October 26, 2010, 10:05 am*
return to my job !
thanks a lot for feedbacks and help user many thanks .
i have full pm i rep all .

this night complete recode my crypter functions by functions .
i find one probleme with my injection after add 64 bits compatibility.
serv works great but time to time error appear on screen restart !

i am wrongs with functions 64bits added,but this need to recode complete crypter.
and borlo !
no pb its great for me ! :) this is need 2 day code and 1 day test .
dont worry .

i could not answer that i would occupy.
but i'm always there anyway.
thank you for your understanding.

MeDdErS - *October 26, 2010, 10:16 am*
So, uh... what's the 'borlo'? Because I just executed it and now have a feeling I'm infected by his server. If so, uninstall me!

fireflyyy - *October 26, 2010, 10:22 am*
"borlo" is the stub man... ???

MeDdErS - *October 26, 2010, 10:28 am*
It should be named 'Stub 1' or something then - 'borlo' seems like a suspicious name lol.

Al3x - *October 26, 2010, 10:31 am*
Awesome work bro, keep it up.

daffi23 - *October 26, 2010, 10:38 am*
Cool. I'll wait for the new version.
I get too may problems with 194. Lost all my (very few) victims. Still a great project man.

zalikich - *October 26, 2010, 10:57 am*
and c6p0 please make it, thet crypted file dont need to open any net frameworks verion. its more greatest.

ralphenko - *October 26, 2010, 11:14 am*
It wasn't easy to decrypt the password, but finally I made it. Thanks for an awesome cypter.

daffi23 - *October 26, 2010, 11:24 am*
(Oct 25, 2010 02:01 PM)daffi23 Wrote: [CITE] Suggestion: In the 'Toolz' section there's a binder. At the moment you cannot ad/change the icon here. Would be cool if this is also possible with this binder, just like with the crypter.
Forget this one. Just found it the icon changer in the toolz section as well.

Jordyboy - *October 26, 2010, 11:29 am*
Thanks alot for this, still trying to decrypt i will have it soon ;)

prajulm - *October 26, 2010, 11:36 am*
DUDE!!!!YOUR CRYPTER ROCKS!!!!BTW LOVED UR PW....ITS BEEN FUN DECRYPTING UR PASSWORDS....Been decrypting the passwords for all the versions u released! NOOB-Proof i must say!

Jordyboy - *October 26, 2010, 11:40 am*
Thanks for the crypter, should have decrypted soon. Any help? I only get an error on the last decrypt.

arnolddrita - *October 26, 2010, 11:40 am*
Good keep it up man! Waiting for all your releases :)

igorr - *October 26, 2010, 12:27 pm*
I have a problem when encrypt my "cybergate v1.07.5" server, it will not work
I have windovs xp sp2.

I not: compres with UPX,delayed execution,googlecrome passwords,bind files.

I do not know where the problem!

yoyoatw - *October 26, 2010, 12:28 pm*
Hey man, is it runtimefud? because norton detects it. (using cybergate)

igorr - *October 26, 2010, 12:37 pm*
and my eset "nod 32" detect my server, when I crypted he is fud, but is not work.

fireflyyy - *October 26, 2010, 12:39 pm*
Lol You dindt See? c6p0 Is Busy With Recoding and remod the crypter? Be Patient!
Thanks

igorr - *October 26, 2010, 12:46 pm*
Ok I'm waiting, new crypter

Thanks?

hrefman - *October 26, 2010, 1:04 pm*
man yu are the best and u give it 4 free!!!! RESPECT. How can i get tut about all function????

trezz101 - *October 26, 2010, 1:19 pm*
Can somebody please help me

What options should I use to crypt Blackshades 3.6?

Has anybody been able to crypt it successfully?

Mine keeps getting corrupt

thank you

DarkDecaydence - *October 26, 2010, 1:24 pm*

Yup, i got it, checking it out asap.
Thx for making it free bro.

EDIT: Just realized how big of a noob i am... Fail.
Gonna return again when i've figured this out xD

Golliath808 - *October 26, 2010, 1:26 pm*

What's the difference betwen this version and 1.8 version? and it is runtime fud?

yoyoatw - *October 26, 2010, 2:12 pm*

(Oct 26, 2010 12:39 PM)fireflyyy Wrote: *[CITE]* Lol You dindt See? c6p0 Is Busy With Recoding and remod the crypter? Be Patient!
Thanks
OH! Thanks man, I didn't see that. Will be waiting for new version ?

DarkDecaydence - *October 26, 2010, 2:20 pm*

Scanning it with AVG turned back clean.
I am gonna use this :D

Sorry i have not read through 190 pages of talk, but it sometimes gives me errors. First one is that it fails when trying to login, and second one is that it returns an error when creating the crypted file.
The first error goes away randomly, and the second does not mean anything though, so no important deal there.
Really nice layout btw.

10/10 crypter, gj there!

Quick EDIT: I know that AVG is not the only AV system out there, but NoVirusThanks proved too advanced for me xD

Zmind - *October 26, 2010, 2:24 pm*

Annyone works with the Darkcome and c6p0 crypter? anny tips to the configuration?

I am going to switch to darkcomet..to see if its more stable.

c6p0 u should do more testing with cybergate/Vista...i am sure that its something wrong because i lose all the servers...

xene - *October 26, 2010, 2:35 pm*

password was kinda easy thou... took me 30mins just becouse i missed one symbol in notepad :D
Nice Crypter =)
If you go private, dont sell your crypter with one big package. sell it with small monthly fee and with autoupdates. Then i will buy defenitely.

fireflyyy - *October 26, 2010, 2:46 pm*

LOL For me 3/4 min xD
But it dont means we need an most hard, becuse noobs dont know decrypt xD!!

c6p0 - *October 26, 2010, 2:51 pm*
update

1.9.6

recode injections 32/64 bits
fix error startup .
fix error on screen startup 3 X restart .
feedbacks !
1.9.4(2) Activated for 24 hours .

yoyoatw - *October 26, 2010, 3:01 pm*

carelesmind - *October 26, 2010, 6:47 pm*
alright, i decrypted the pass. thanks bro.

i'll test it on cybergate.
EDIT: really can't get it to work on cybergate. using v 1.07.15

Zmind - *October 26, 2010, 7:21 pm*
Ppl...every single server i update with 1.9.6 i lost them! f*ck i don't know what to do anymore...

F*ck cybergate i am going to try Darkcomet!

jimbo- - *October 26, 2010, 7:30 pm*
(Oct 26, 2010 05:54 PM)crusty Wrote: *[CITE]* Usually when I look at their passwords, they dissapear and come back, or sometimes I get 2 of the same connection popping up. It's strange.
It's cybergate bro does it to me sometimes too using other crypters

trezz101 - *October 26, 2010, 7:55 pm*
so has anybody got this working with blackshades?

Always - *October 26, 2010, 9:11 pm*

so whose got the correct settings for cybergate+crypter so startup and everything else can work without permission popup during startup...post fast please

c6p0 - *October 26, 2010, 9:40 pm*
fix thats next update .
normally with 64 bits no popup appear .
run great with darcomet used defaut settings with this . tested darkcomet 2.2 last .

Muffinz - *October 26, 2010, 10:05 pm*
Dude thanks so much for this i bin looking for a good crypter :)

TianMan - *October 26, 2010, 10:10 pm*
Can anyone help me with the password decryption? I'am having difficulties following the instuctions.

schf11g - *October 26, 2010, 10:34 pm*
Why pay $50 for a crypter when you can get this free?
Love it!

Zmind - *October 26, 2010, 10:56 pm*
Ok so lets see c6p0, i am going try to spread and test with Darkcomet 2.2 and i am going to post the settings and correctme if annything its wrong ok?

Because if u helpme other ppl with Darkcomet wont bother u with the setings :)

- Main Settings -
Mutex Name : Random
Server ID : server
Check protect server connection by password
Random Range Instance : 1000 to 4000
EOF (end of file)

- Connection settings -
IP adress : ilovebig.boobs.no-ip.org
Port : 81

- Server startup -
Installation Path : SYS32#\ --- test\explorer.exe
Check on File Date.
Uncheck Melt server
Use Power startup - Registry
Check on Enable Server startup
Check on Persistance Install

- Other Startup -
Check Install inregistry startup
Check Install With ActiveX startup + random key
Check start with UserInit.exe

- Server Shield -
Optional i gues...

- Anti Virtual Box -
Uncheck Active Anti Virtual Box

- Generate server -
Check on persistence
Uncheck Pack server ith UPX

Its ok or i change annything before crypt?

Always - *October 26, 2010, 11:48 pm*

yes u r right. I truly agree with u, maybe problem come to us, but we need a correct setting in order to avoid that such problem. For sure we are 100 % support a l33t c0der like c6p0, and we need the genius c0der like him in to continue his best works...

fireflyyy - *October 27, 2010, 8:56 am*
The Correct Configurations works with:
Win XP 32&64 Bits
Win Vista 32&64 Bits (Without UAC Activated!)
Win Seven 32&64 Bits(Without UAC Activated!)

And That's Badd becuse most of people uses UAC...
So Wait Untill c6p0 Fix This,
AND PLEASE!!! DONT SPAM HE PM'S!!! DONT SPAM, LET HE WORK!

fireflyyy - *October 27, 2010, 9:12 am*
Sorry Double Post!

--
Too Short

deezjee19 - *October 27, 2010, 9:17 am*
Can you also check for the DEP crap i keep getting? lol
It concerned a clean install of winXP 32bit, no AV, no firewall, no nothing..

If needed im available for troubleshooting with u guys to solve it :)

thanks and good luck

fireflyyy - *October 27, 2010, 9:19 am*

yoyoatw - *October 27, 2010, 12:28 pm*

Waiting for tutorial! Thanks for awesome cryter!

sync - *October 27, 2010, 12:34 pm*
Guys. I am getting frustrated here. I cant freaking figure out what i am doing wrong when i decrypt the password. Please help me. I have tried everything!! Send PM!

pixelthis - *October 27, 2010, 12:43 pm*
I understand how to decrypt it just not how to work out the KeyPass required by the OKTO3 decyption. Maybe I am blind and have missed something somewhere. I have removed the characters which should of not been there (17 of them), then decrypted it using T-ASCII Decode giving numbers, the next stage of decryption OKTO3 requires a key pass for the decryption, which is where I am stuck.

commander.spy - *October 27, 2010, 1:09 pm*
Still fucking dont know y that "errur look status" is cming !! man but after that also crypted file works that is nice thing

jackass101 - *October 27, 2010, 1:14 pm*
I am sorry if this was mentioned previously but I am getting frustrated now. For some reason my Norton detects it when I download it but not when I scan or run it. I asked my friend with a different Anti-Virus and the same thing happens. Does anybody know why this happens?

fireflyyy - *October 27, 2010, 1:17 pm*
Probably becuse this is a hack tool, and i think stub is 1/16 detected, but not server crypted...

HakkuR - *October 27, 2010, 1:17 pm*
(Oct 27, 2010 01:14 PM)jackass101 Wrote: *[CITE]* I am sorry if this was mentioned previously but I am getting frustrated now. Number 1. Norton sucks.
Number 2. It thinks because of the url its probably bad...

jackass101 - *October 27, 2010, 1:19 pm*
Also I may have forgotten to mention I am talking about my crypted server not the crypter itself sorry if I misled.

mrstean - *October 27, 2010, 1:30 pm*
I'm So annoyed of this password.... I'm Doing this like 3 hours now still no effect -.- Whatever :(

rustis - *October 27, 2010, 2:03 pm*
I'm still super noob with decrypting passworlds.. can anyone send me the pass with pm?

c6p0 - *October 27, 2010, 2:20 pm*
(Oct 27, 2010 01:17 PM)fireflyyy Wrote: *[CITE]* Probably becuse this is a hack tool, and i think stub is 1/16 detected, but not server crypted...
shure ?
i have scanned this and its clean .
norton take my stub ?
norton :p shame on me .

ahandlen003 - *October 27, 2010, 2:34 pm*
Awesome FUD. Thanx, awesome as usual. If anyone wants help on how to decrypt pm me.

ManUnited - *October 27, 2010, 2:38 pm*

Just sent you a PM I love the GUI looks great, I look forward to trying it out.

Edit: Fast as lighting with the reply, many thanks it looks like a great Crypter.

fireflyyy - *October 27, 2010, 2:55 pm*

norton :p shame on me .
Dont know man, ive dont scaned it... I'm sorry
Answer mY PM's

efkariux - *October 27, 2010, 3:24 pm*

CAN SOME1 PLEASEEEE PM ME THE PASSWORD? =/ IM SO SHIT AT IT.. :[WASTED 2 HOURS NO RESULT

ManUnited - *October 27, 2010, 3:26 pm*

Works like a dream thank you very much for the share, it looks great and runs perfectly.

zetunz - *October 27, 2010, 3:57 pm*

@ahandlen003 : ofcourse not, the password is a filter to protects too noobish people to fuck the FUDness of the crypter. So no, keep your help services for yourself, thanks

jackass101 - *October 27, 2010, 3:57 pm*

Every time I download my crypted server it shows up as (WS.Reputation.1) and removes it. What is this and can I fix it?

TianMan - *October 27, 2010, 4:37 pm*

Can anyone help me with the password instructions?

Zmind - *October 27, 2010, 4:40 pm*

Just a question i know whe should use only one injection method (cybergate / ownz crypter)

And what whe should use, i always used the crypter injection...but could the best the cybergate method?

And its possible to bind to Crypted RATS like cybergate with Darkcomet? or could become corrupt or unstable?

jackass101 - *October 27, 2010, 5:33 pm*

I'm sorry if I'm double posting but my computer does not see the post. When I download my own crypted server Norton picked it up as (WS.Reputation.1). This also happened when my friend downloaded it with his Norton. Is this my fault? If so what setting is this?

1llusion - *October 27, 2010, 5:37 pm*

(Oct 27, 2010 04:40 PM)Zmind Wrote: *[CITE]* And its possible to bind to Crypted RATS like cybergate with Darkcomet? or could become corrupt or unstable?nice question O.o I must test it. will report if it works...

anyway thanks alot! and for the brain testing also :)

EDIT: bind is perfect! works like a charm :)

Jester868 - *October 27, 2010, 7:00 pm*
Teehee! I didn't even decrypt it and I got it.... Theres a secret to get it even if you dont know their pass

yoyoatw - *October 27, 2010, 7:24 pm*
Doesn't work very well :(. It is NOT runtime fud.

corruptxfatal - *October 27, 2010, 7:38 pm*
facepalm i figured out why my istealer wasnt running

Muffinz - *October 28, 2010, 12:26 am*
OK so everything is good only thing is the my server get caught when it runs is this because of my settings or is it the rat I'm using can anyone help? btw I'm using Cybergate thanks in advance

jimbo- - *October 28, 2010, 3:03 am*
The crypter is scantime only. That's why it gets detected.

yoyoatw - *October 28, 2010, 3:11 am*
(Oct 28, 2010 03:03 AM)eXpLiiCiT sG Wrote: *[CITE]* The crypter is scantime only. That's why it gets detected.
Yeah, thats what I thought. Apparently he will update, to become runtime and scantime fud

v3tkwakje - *October 28, 2010, 4:47 am*
Doesn't work with ISR Stealer 0.3 (on windows 7)

can someone help me?

commander.spy - *October 28, 2010, 4:49 am*
I dont fucking knoW.... Y thAT Errur look Status is still cming man !!! ..

But then also my crYpted file is working good it seems but i dont that errur man >> :(

Help me c6p0 > >> > >

Al3x - *October 28, 2010, 5:32 am*
Looks like Avira is picking it up runtime now c6p0.

Duginox - *October 28, 2010, 6:28 am*
Server says NOT INFECTED on my AV but it dossent connect to my server.

schf11g - *October 28, 2010, 7:09 am*
Can someone tell me why when I get 150 torrent downloads and 20 youtube videos, only 4 showed up from the torrent and 3 from Youtube?
Is it because of the dependencies?
I'm using Blackshades.

Can anyone recommend me a cheap non-dependent crypter that actually works?
I'm not paying $60.

Binaryninja - *October 28, 2010, 7:12 am*
It's got a great GUI, but is only scantime FUD as people have been saying. I hope this is made runtime FUD!

DaRkOoO - *October 28, 2010, 7:17 am*
igorr - It's not detected as a virus, and KIS asks your permission for everything, that's why it's the best.

nauki - *October 28, 2010, 7:21 am*
so confuse... i try to decrypte but always error password :(

igorr - *October 28, 2010, 7:30 am*
DaRkOoO---

I know this for KIS fireval, but I do not know why it deleted and is detected as a virus?

Substance - *October 28, 2010, 8:03 am*
Decrypted pass in time btw very nice crypter !

End - *October 28, 2010, 8:38 am*
IF you can't decode the password just go to: http://tin yurl.com/2646sk3

Also. Nice crypter

crusty - *October 28, 2010, 9:28 am*
I think it's being updated right now. I'm not able to log in.

PartyBash - *October 28, 2010, 9:34 am*
(Oct 28, 2010 09:28 AM)crusty Wrote: *[CITE]* I think it's being updated right now. I'm not able to log in.
I just logged in so you might have the wrong pass?

Anyways I got my server FUD so thanks, I really enjoy your crypter :)

???? - *October 28, 2010, 9:51 am*
what is the pass of own'z crypter

PartyBash - *October 28, 2010, 10:10 am*
I logged in like half an hour ago, so you might have the wrong Pass?

c6p0 - *October 28, 2010, 10:13 am*
(Oct 28, 2010 07:30 AM)igorr Wrote: *[CITE]* DaRkOoO---

hmm send me screenshoots your antivirus take server please .
and its fud runtime !

its normal your firwalle check your autorisations before give access to NET.
and the UAC not detected virus just send you messages allow or not .

thanks DaRkOoO

your server run normal ?
ignore this error !!!
(Oct 28, 2010 05:32 AM)RockerAlex Wrote: [CITE] Looks like Avira is picking it up runtime now c6p0.
thanks rockeralex !
reinstall avira now on my desktop .
(Oct 28, 2010 03:03 AM)eXpLiiCiT sG Wrote: [CITE] The crypter is scantime only. That's why it gets detected.
scantime and runtime bro !

kutmustakurt - *October 28, 2010, 10:18 am*
Maximum post limit for a thread has been reached, please copy the MyBB code and start a new thread.
This thread will be closed soon. ?
Thanks.

c6p0 - *October 28, 2010, 10:30 am*
ok bro !
thank you for having prevented.

musab - *October 28, 2010, 10:42 am*
crypo wite sucks...I had to use another one to avoid the errors I was getting...thanks.

Crypted, tested on novirusthanks.org without submetting sample. Result --- > All clean

but..server doesn't work :-P

corruptxfatal - *October 28, 2010, 10:51 am*
when i use codenom with istealer, a temp file is made and detected when i run it, if i scan it, its ud and if run without av it will send logs. how can the temp file not be detected?

igorr - *October 28, 2010, 11:56 am*
[QUOTE='c6p0' pid='7322905' dateline='1288285985']

--
I'm sorry my mistake. I made a mistake.

Your crypter is excellent, he is 100% FUD, Scantime and Runtime,

c6p0-thanks again!
see this:
http://www.zshare.net/video/8208895228abba6b/

c6p0 - *October 28, 2010, 12:03 pm*
dont forgets,
crypted your file its first thing to do .
next stage, Human Manipulation and Social Engineering (this forum)

make your appli legit,bind this and other ...
its no possibles for me give you my settings real ...
run your brain :)

igorr - *October 28, 2010, 12:14 pm*
LOL:)

that this has happened, I forgotten my server crypt:)

Thanks..

jimbo- - *October 28, 2010, 1:09 pm*
why did u make a new thread?

What settings do you use?
Use Cybergate and feel the almighty light of this glorious crypter shine upon you.

Personally, i use Hide File, Block Anti Sites, Kill Firewall, Disable View Hide File. I change the icon, and i use RC4 encryption with a random key. I also make it Runtimes 64 and 32 Bit and Auto EOF, and Custom Inject it.

Any more questions?

boniface89 - *October 30, 2010, 1:27 pm*

i could find out the password, i was trying to decrypt, how you said.. can someone please help? PM !!!! :(

V3N0M4 - *October 31, 2010, 2:07 pm*

this man getting attititude so just spoil that crypter

c6p0 - *October 31, 2010, 2:16 pm*

(Oct 31, 2010 02:07 PM)V3N0M4 Wrote: *[CITE]* this man getting attititude so just spoil that crypter

why ? i dont understand man .

tamburro - *November 1, 2010, 6:25 am*

good crypter, and very simple password

thanks guy...

abhijay099@gmail.com - *November 1, 2010, 8:46 am*

yes i too need the pass and ub3r and leets should repute him and vouch for him

dasani - *November 1, 2010, 1:12 pm*

I can't get the pass .. crypo says error in decoding ..
