Before entering in thread I thought you are -Sky. Why don't you make your own username in place of copying others.

Btw free hosting only works for 1 or 2 months. I think they suspend your account if they found too many users on a reseller.

Why would they do that? Its my VPS on a private dedicated Server.

I didn't know there was a -Sky. Ill change my name when I buy L33t.

You can just suspend my account if you find illegal content on my site. I swear I will follow the term of service...

Why the fuck do people base everyone off forum reputation? I got ganged de-repped because I called a forum group leader a fagget.
