Thread: [Learn Real Hacking With Real Hacking Game](#)

alynos - September 12, 2010, 8:14 pm

If you are already known to the hacking world then, welcome to the virtual simulation world of hacking environment.

If you really need some easy platform to practice hacking then I think this article will be a great help for you. Yes I am talking about the real hacking game, Hack The Game.

HackTheGame is a free 1MB file game which will introduce you to the real hacking word.

The real hack able DOS environment makes you feel like that you have finally accessed to US Defense system.

The game becomes much more interesting and fun because of the addition of sounds. The sounds includes typing and several warning announcement.

The user interface of HackTheGame is very friendly and easy. Just open the program and select your language, input any ID you may like.

There are several missions of this game. You'll get the briefing of each mission in your inbox.

The mail itself includes several hints and processes.

If you find sounds irritating then, you can go to settings menu and disable sounds. But I bet you, enabling sounds makes your game play experience very easy.

I bet you'll love this game.

No installation is needed to run this game and it is obviously safe to use because it utilizes local files which in game play acts as a remote files. You don't have to worry about your security. If you doubt it, then play it offline.

This game can be downloaded from here >> <http://www.mediafire.com/?k272epynbvad2ho>

Wow bro this is sweet, downloading tomorrow

Slankey™ - September 12, 2010, 8:37 pm

Looks fun.

Maybe I'll get it.

MasterMind98 - September 12, 2010, 9:26 pm

Nice game, this looks very interesting.

Hack3dCustom - September 12, 2010, 9:33 pm

AH i remember the Developer who made this game, i believe it was Da-0Day. Fun game i beat it in like 1 hr lol.

r1n0j - September 12, 2010, 9:36 pm

seems good..

downloading.. hope to complete all mission :)

Hack3dCustom - September 12, 2010, 9:41 pm

rj lol Skill's & time is what it will take you :P

psycho_mcgee - September 12, 2010, 9:49 pm

Thank you I've been looking for a program that simulated hacking for a while, not gonna lie i think its a lot easier to learn something if you have to actually do it.

Hack3dCustom - September 12, 2010, 9:51 pm

Lol Mission 1 (for noobs) can be a challenge.

Credit or leeches.

Hack3dCustom - September 12, 2010, 10:18 pm

Credit sorry dude, i know the owner of that Tutorial

D??i????™ - September 12, 2010, 10:19 pm

lol, it's infected. No one download!

Hack3dCustom - September 12, 2010, 10:22 pm

LMFAO, no it is not, i use this tool & i am familiar with the developer.

Exactly, don't be naive deviance.

OP just copied.

Hack3dCustom - September 12, 2010, 10:33 pm

Thank you What Rights, some people always saying random shit like that pisses me off, especially after i know the Programmer. Which in a way is Funny.

Looks like fun, I'm downloading.

Thanks for sharing.

Rain Suffer - September 12, 2010, 11:52 pm

Looks really fun ill give it a go. =]

minisaaz - September 13, 2010, 2:13 am

Thankx for crediting me. Though I really don't needed to because the creator of this software is not me. I just informed my visitor to try this game once ;)

Regards,

suraj kayastha

I also blog in youcanhack.blogspot.com and web-dezine.blogspot.com
