It will come out FUD, I used one of his free crypters before and it was FUD and not corrupted, this must be the all singing all dancing version so it can only be better. Good luck with sales.

StormCryptor - September 14, 2010, 7:17 am

Yes, the files come FUD and are in no way corrupted. Doesnt need EOF, since it uses codedom.

*Added a new, darker design.

Is this coded in VB.NET?

:(

StormCryptor - September 14, 2010, 7:54 am

Yes, Sanju. It is coded in vb.NET ;)

Da Loser - September 14, 2010, 8:01 am

You Spelt "crypter" wrong. And do you even understand what CodeDom Is..? its not some magical immortal FUD feature, codedom just compiles code thats it, how unique the code is, thats up to you.

No, he decided to use a different spelling of the name. All the others are mostly called "something crypter" so he was different and chose another spelling.

I am also coding my Crypter with Codedom, and without any work, I got it FUD. It will stay FUD for a long time. Only the RunPE might be detected. But its simple to fix.

Good luck with sales.

LoL :D ... I never promised that... thats only in my sig to attract people ;]

AmT-yd- - September 14, 2010, 2:02 pm

Not saying he did this but, I did hi sh!tcash file for the crypter then he activate it, then few hours later deactivated it...soooo...

StormCryptor - September 14, 2010, 2:21 pm

Cant you read ? The public version is not supported anymore! This is the payed version.

galishacker - September 15, 2010, 3:31 am

I Bought this crypter this is one of the best crypters i have ever seen +1 for StormCryptor nice job :)

CacaoBux - September 15, 2010, 7:26 am

I bought it, and it's awesome. Big vouch - Thank you. =)

StormCryptor - September 15, 2010, 7:28 am

Hehe, welcome ;]...

Still looking for more buyers :)

h3h3y9 - September 15, 2010, 1:06 pm

Vouch for this guy. The crypter is simply amazin. Each crypt 99% unique.
Good luck with sales, bro.

OP what does this function mean "Uses hosts file checker". Also does it need to connect to internet to authenticate or i can use it offline too.

Thanks

How is the scan In scan4you.biz ? 33/33 ? and Runtime and Scantime?
it where nice when he had a binder to....

StormCryptor - September 16, 2010, 9:34 am

It needs internet. What it does is - it checks if u have added my license server to your hosts file.
Simple as that ;]

Parabola, no, no refund. I wont rip off you, you can see i get vouches from highly rated members here on HF.

CacaoBux - September 18, 2010, 2:10 am

Bring this thread to the top.

Dekken - September 20, 2010, 4:37 pm

My license stopped working. Please get online on MSN.

CacaoBux - September 21, 2010, 1:38 am

Yea, mine too. I'm waiting for him to come online.
