This guy sold me a Crypter which doesnt work at all. And the target must have .net else it wont work. In few hours, his crypter fud got detected and all my bots disappeared.. ZZ

CacaoBux - October 2, 2010, 1:39 am

Unfortunately, you are totally wrong just because i don't have a crypter at the moment, so you are trashing my thread or somebody other sold you non-working crypter.
