Thread: [\[FREE\]Get your own Gmail dot trick @gmail.com](#)

FrenchcoreRadio - September 16, 2010, 2:57 pm

I will turn your gmail account into 100's of emails but they are actually the same.

it looks like this:

before:

Code test@gmail.com

After:

Code t.e.s.t@gmail.com

te.s.t@gmail.com

t.es.t@gmail.com

tes.t@gmail.com

t.e.st@gmail.com

te.st@gmail.com

t.est@gmail.com

test@gmail.com

its totally free!

if you need to invite people and if they join, you get something.

now you can invite yourself over and over again, it is like a 10 minute mail, but then permanent.

for example

You invite test@gmail.com, you get an email on that account, you accept it, join the site, and its impossible to invite test@gmail.com again.

So the program i have puts a dot somewhere, so you can invite the same email again, which is just different for you, but not for Gmail, it remains the same one.

I cant explain it more clearly, im sorry.

This is awesome, I could see where this could be very useful!

I'll let ya know if I need it done.
