Okay, so i built a site with downloads of bots, hacking programs, adf.ly bots for everything, but in order to download all the programs you have to complete one survey. I know my rep is very low. But I now i'm trying to raise that. Click the following to go to my site and download you're bots. You have to complete a survey and click on one of the pages to take you to the right section of the downloads. [Click here!](#)
