Thread: [\(VB.NET\) My Basic Keylogger \(VB.NET\)](#)

D_D - September 18, 2010, 4:00 am

Hey guys. This is my first keylogger. I haven't tested it yet, so that's why I upload it here. I wanted to ask if anyone wanted to test if it works. It's made in Visual Basic 2008.

It's not FUD because this is just a test. I will FUD it if it works.

Screenie of Builder:

Thanks guys!

I forgot to post the link, lol! It is there now. Sorry guys!

You can always test on yourself too ..!

D_D - September 18, 2010, 4:06 am

It's not my computer I am sitting on, so I am afraid if I can't remove it again.

(Sep 18, 2010 04:09 AM)D_D Wrote: [\[CITE\]](#) Ofcourse I know what it does. Are you going to help or keep trolling? I think you miss-understood me. I meant if you know what your server does to infect the victims PC.. like registry's, etc, etc !

So just remove what ever it does and you are done !

And please chat with some manners ! I could have done the same thing!

1337Montana - February 3, 2011, 9:31 am

I Also Maked 1 Of that but When i'm trying to run the server.exe it tells me an error (the program won't start up) I got Windows 7 And he builder and stub are working (only stub has got some infections when i run it but i've dissabled the AV when i added it to the source of the builder)
