Thread: [Virtual Box- How to share files between original pc and virtual box \[tut\]](#)

ThE-iNFILTrAToR - September 18, 2010, 6:10 am

In your original PC create a New Folder and name it anything. I named this folder nexus

Start virtual box click on devices and then Install Guest Additions.

Spoiler [\(Click to View\)](#)

After completing the installation again click on devices then Shared Folders.

Spoiler [\(Click to View\)](#)

A window will open, click on the sign add shared folder

Spoiler [\(Click to View\)](#)

Now you have to set the path click on other

Spoiler [\(Click to View\)](#)

Then browse to the folder you created on your original PC. I named it nexus as you can see in the image. Then click on ok.

Spoiler [\(Click to View\)](#)

Check the box make permanent if you want that folder to be linked to your virtual box permanently. Click on ok.

Spoiler [\(Click to View\)](#)

Then right click on My Computer, (in the virtual box not in your original pc) then click on Map Network Drive.

Under folder field write \\vboxsvr\name of your folder. In my case the folder name was nexus thats why its written \\vboxsvr\nexus

Check the box Reconnect at logon if you don't want to follow this step every time you start the virtual box.

If you will leave it unchecked you will have to follow this step every time you start the virtual box to share files etc..

Spoiler [\(Click to View\)](#)

Now suppose you want to transfer an image from your original pc to the virtual box.

For that you will have to copy the image in the shared folder . In my case the shared folder name was nexus

Spoiler [\(Click to View\)](#)

Then in the virtual box you can find that image in Z drive

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

In this way you can share files etc. from your original pc to the virtual box and from the virtual box to original pc also

bourd - September 18, 2010, 7:36 am

Good tut. Shame I missed it yesterday.

MasterMind98 - September 18, 2010, 8:57 am

Great tutorial, and it's also very useful.

It has been posted today...

codepoet - September 18, 2010, 4:44 pm

OMG...I LOVE YOU FOR EVER AND EVER AND EVER!!

I BEEN TRYING TO DO THIS FOR SO LONG!!!!

sorry about cap

Nice comment..
I am glad this helped you

Fallenbot - September 20, 2010, 8:46 am

Very nice tut.
However its very useful ! :)

gozilla123 - September 20, 2010, 10:34 am

it said network path couldnt not be found when i do
\\vboxsvr\name

i name my folder tttt so i put

\\vboxsvr\TTTT

never mind got it to work

all you have to do is restart it

thanks for this tut!!!

bibi44 - September 20, 2010, 3:09 pm

thanks for this share,
I spend hours to figure out how to share files,

Sithis - September 22, 2010, 10:01 am

I already knew it. But nice and noob friendly tutorial bro. ?

You are welcome mate ?

wanna_hacker - December 30, 2010, 10:33 pm

why i am getting this error ?

[IMG]http://i52.[censored].com/r1ihwi.jpg[/IMG]

-mothered- - December 30, 2010, 11:56 pm

Now this is definitely well worth reading.

Very well documented and illustrated mate.
Good work.

Have you installed guest editions ?

Syntax:

\\boxsvr\your shared folder name

Have you created shared folder in your original pc and specified the path in this step Spoiler ([Click to View](#)) before mapping network drive.

You have to Map network drive from virtualbox not from your original pc.

wanna_hacker - December 31, 2010, 11:18 pm

yah i was doing the same but now its working fine thankx

Invisible Man - January 1, 2011, 7:23 am

Thanks, This is VERY useful! If I could rate, I would give this the 5*

egabell1 - January 1, 2011, 8:29 am

Thanks alot. Now I don't have to upload every single file I want on my Virtual Box.

Nice share!

-Egabell1

chrome24 - January 2, 2011, 4:25 pm

i will make a linux and windows sharing tutorial since yours was window xp virtual sharing.

H4ckThePlanet - January 7, 2011, 2:39 am

Nice TuT. Very good for n00b VB users. Keep it up.

DarkGDude - June 16, 2011, 10:56 pm

Good tutorial. Thanks for this.

ASM - *July 1, 2011, 1:39 pm*

Dude can you make the same tut for win7? I am stuck at the right click map ect. in win7 it isnt there

EDIT: nevermind i found it now im looking for a way, to BE able to send files but if my VM gets infected the virus wont come in my main pc, if anyone has any info on that please let me know

Shogo Makashíma - *June 25, 2014, 10:34 pm*

very good tutorial thanks! ?
