Hey,

I just saw the topic about the image uploading source,
I got a [censored] source here: <http://www.multiupload.com/TL759Q1GLQ>
I've edited it a bit so I would add extensions direct links and more. Though it doesn't work on forums.

Have fun.

Good release, I'll look around on it when I get the chance.

No problem, did someone already try this?
