Thread: [\[TUT\] Setting Up Spynet 2.6 \[Some Pictures\]](#)

Haydn - September 21, 2010, 1:39 pm

hey guys, this is a simple tutorial on how to set up the popular Remote admin tool "Spynet"

Hope you enjoy and it is helpfull !

( this tool requires a NO-IP account, if you allready have one, then skip to section B, otherwise read on from here)

## Section A - Setting up No-Ip.

1.navigate to <http://www.no-ip.com/> and then create an account

2. After creating an account and verifying your email adress, sign in, and head to Manage Hosts. then click add host

3. then type in the No-ip you want to use in the box that has red around it in the picture, then select the ending you want in the drop down box next to it.

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot1.jpg>[/IMG]

4. then wolla, your NO - IP is created :)

Port fowarding - this tutorial contains no information on how to port foward, please find another tutorial or visit [Portforward.com](http://Portforward.com).

## SECTION B - SETTING UP SPYNET

1. open up Spynet, a box will appear, but will be in spanish, click no, then go to "opciones" then "seleccionar idioma" and then double click "English.ini"

2. then go back to the spynet window, click start, then go to file, create server.

3. double click on any of the two default users, and then select the following options:

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot2.jpg>[/IMG]

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot3.jpg>[/IMG]

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot4.jpg>[/IMG]

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot5.jpg>[/IMG]

[IMG]<http://i1009.photobucket.com/albums/af213/Reventix/screenshot6.jpg>[/IMG]

[IMG]http://i1009.photobucket.com/albums/af213/Reventix/screenshot7.jpg[/IMG]

4. then click "CREATE SERVER" then choose where you want to save it, then you should have a file somewhere called "server.exe" !

5. now you need to crypt it, find a decent working crypter in the hacking tools section, or if you need help for it  
just ask someone, im 100% sure somebody would help you !

6. then after you crypted it, you need to get a spreading technique, now just search in the search bar for "torrent spreading"  
and there is a few threads on how to use torrents to spread that will help you out :)

Spynet 2.6 Download Link - [Click Here](#) - 2.3MB

i would put in a virus scan of the .zip file, but its all false negatives so there isnt much point

Thats about it, if there are any problems with my tutorial please comment and ill change it :)

dont flame, this is my first tutorial and everyone has to start somewhere right?

thanks for reading ! :D

**Callao** - September 21, 2010, 2:02 pm

clear instructions nice =)

5/5

if someone doesnt know hwo to after this. (idiot)lol

**Jesta** - September 21, 2010, 3:58 pm

Nice tutorial man, helped me out

**Haydn** - October 10, 2010, 2:17 pm

Bumping this.

hope This tutorial is Helpful :) !

**KnightOfSilence** - October 11, 2010, 1:45 pm

Very usefull !

Thanks ?

**P0w3R0fChr1sT** - October 11, 2010, 2:25 pm

Very clear tutorial! keep up the good work!

**Dean** - October 13, 2010, 4:59 pm

Is this a legit version of spynet?

Or can a respected member link me too one please?

**devnull** - October 13, 2010, 7:27 pm

thanks for the share dude :)

**Haydn** - October 15, 2010, 8:30 am

So what man? people have to start somewhere.

**The\_Best** - October 15, 2010, 8:57 am

Nice tutorial man, i will try that

**Hela** - October 21, 2010, 3:56 am

great turt.? You helped me make my 1. RAT.. but I have one problem, I do not know how to send this current to the victim, can you help me with this?

**harrison573** - November 23, 2010, 11:03 am

Very nice tutorial but i need some one to help me crypt it please help me reply pm me w.e i need help please :]

**Panduli** - December 13, 2010, 8:49 am

Me and my Friend tried this and he succeeded the first time then he closed it and opened it and it didn't work anymore...I tried it I made the server and all of that when my friend clicked it it didn't show as my victim.

**Majek** - December 13, 2010, 9:47 am

I tryed everything u said, first it worked great with no FUD with my friend we tryed it and i could see his, then i ran his server and my spynet crashed and couldnt connect (on 2.7 final) then i downloaded 2.6 and we tryed again but this time we cant even get it so i can see his, we disabled antiviruses and stuff.... on bottom of spynet it says "waiting for connection on ports (81)(82)... can you help me? i would really like to get this stuff going :D

**Diamond Supply Company** - December 29, 2010, 6:46 am

EDIT: This is so backdoored.

13/16 LOLLOLOLOL

**Plutonium** - December 29, 2010, 7:56 am

Thanks for this extremely helping tutorial. Really needed it! (=

**xarisis** - December 29, 2010, 9:11 am

Not a perfect tutorial but it might help some people...

Add a few links to Port Forward tutorials and make a few things clear...  
Nice try

**Haydn** - December 29, 2010, 2:25 pm

(Dec 29, 2010 07:46 AM)jJinX Wrote: [\[CITE\]](#) EDIT: This is so backdoored.

13/16 LOLOLOLOL

no it really isnt? jeez i try to help and all i do is get flamed? NICE.

And also, thanks everybody for the Positive Contributions!

**Haydn** - January 24, 2011, 5:09 pm

Bumping this, :)

-Haydn.

**mcmaster-99** - March 27, 2011, 8:12 pm

i love this tutorial very clear

**masterbrain** - June 10, 2011, 10:31 am

THIS A FUCKING VIRUS TESTE.VBS I SCANNED IT WITH COMODO EVERYONE THAT  
DOWNLOAD THIS FUCKING SHIT DOWNLOAD COMODO FIREWALL I

**Fatty** - June 10, 2011, 8:49 pm

Really Clear tutorial. good job man

**HIGH\_JAX** - June 12, 2011, 3:09 pm

I did not need the tut but, thank you for the files. It looks to be and in depth tut though good job.

**BasketCase** - June 12, 2011, 9:23 pm

Thanks for the tutorial bro.

**Haydn** - October 17, 2011, 4:28 pm

ing this!

....

@!"£\$%^&\*\*(( ))\_\_&

**Duncan.** - October 26, 2011, 10:56 pm

I give a 100/100 It's Very Swift, Good job. I expect more from you :P:P:P ?

**Bossmous** - October 27, 2011, 12:14 am

Dude... this shit is in spanish?

tt t

**juragan bokep** - October 17, 2012, 6:03 am

I wish I learn from ur videos

thanks a lot men.. u help me..

**hackerdex** - January 16, 2014, 10:06 pm

Thank you soo much I was tryna find spynet and all the other ones are viruses when I check msconfig startup there are stuff runing thanks this is legit

**hamzajacobs** - January 14, 2015, 9:38 am

Good post! Downloaded it! Keep it on dude! :)

**SIM-2662262** - March 25, 2015, 12:37 pm

Spy Net is too extremely old, unstable, and probably backdoored. I not yet recommend this rat.

**obitex2k2** - July 5, 2016, 12:22 am

This is nice tutorial bro, i love it....keep it up

**sam786000** - July 25, 2016, 12:24 pm

one of the best step by step guides thanks man
