Using this method I have around 600-900 victims; the only problem is that my home connection is unable to withstand them all, LOL!

Please note it's 10-12am in Europe and most of people are at school & work :)

665 - September 24, 2010, 2:36 am

Tmryuu that is Great.

Is your server crypted? Is it binded to those reall Cracks?

Tmryuu - September 24, 2010, 2:39 am

It's crypted, yes.

The original .exe is binded to it (the one you get when installing) but it doesn't work as the game isn't cracked yet :)

SRH - September 24, 2010, 2:39 am

wow man props on your server

665 - September 24, 2010, 2:59 am

You still have people complaining about it not being cracked right ? haha

lucida - September 24, 2010, 4:30 am

Mind pming me the fake program that your binding it with? Seems like this is a godsend.

Effexion - September 24, 2010, 5:30 am

Yes this is how I did it, yet my server is no longer FUD, but I still get loads of hits lol.

Brutal Chaos - October 29, 2010, 10:48 am

Spreading torrents is the way to go. It all depends on what you upload, and where.

jovo - October 29, 2010, 4:30 pm

Did you spread your fake crack with torrent or warez forums?

Hack - Forums - October 30, 2010, 1:32 am

LiveMeerkat - *November 8, 2011, 2:18 pm*

Cmon please share the secret! =P XD

garrex - *November 10, 2011, 12:34 pm*

I prefer e-mail spreading... surprisingly people do just open executables when they get them from "friends" and this way you can pretty much control the area of your spreading which can be very usefull

HIGH_JAX - *November 10, 2011, 2:22 pm*

You want to show me how to that?

:)

Keep the love going. XD
