Da Loser - September 25, 2010, 4:31 pm

Caturman - September 25, 2010, 6:13 pm

Nice tutorial, some of these methods are on the partyvan wiki.

yo Sinister - September 25, 2010, 6:35 pm

Swatting: Using skype or spoof card and calling the cops and saying theres a man with a gun in your house holding you and your family hostage. The swat breaks down your door, ties everyone up and talks to all of you and maybe brings you to the station. The police find out there wasnt a hostage situation and goes back to look at the call and thinks your from from england because thats where skype is located. Make shure you dont have any real info or a phone number on ure skype account.

This is a pretty hardcore thread. Definately subscribing to this for later reference!

Ninjury - September 25, 2010, 9:34 pm

Good job on the tutorial.

That is called "making someone life a hazard" Want to actually ruin someones life?

If i get enough PM stating you want to know how to really ruin someones town reputation/life. I will make a tutorial on it.
