Thread: [Mailboy 2004 - Mass Email Sender \[Precracked\]](#)

Syberpro - September 26, 2010, 10:11 am

MailBoy 2004 Mass Mailer is easy to use, fast and reliable mass mailer software. It can send your email message to thousands of recipients with a click of a button. MailBoy 2004 Mass Mailer is ideal for newsletters, targeted marketing, and keeping in touch with clients.

Quote:MailBoy 2004 Mass Mailer details:

***ORGANIZE YOUR SENDER ACCOUNTS AND MAIL LISTS**

You can create as many as you want sender accounts, just like you can create unlimited mail lists.

***MULTIPLE ATTACHMENTS**

No limit for the number of the attached files.

***DIRECT DELIVERY**

Sends your message straight out to the recipient's mail server.

***ABILITY TO USE EXTERNAL SMTP SERVER FOR DELIVERY**

Sends your message using an external SMTP server. This feature is for users who have problems using the built-in SMTP of the program because of the blocking of port 25 from their ISP.

***UNSUBSCRIBERS LIST**

You can load a list with emails you don't want to send to, so they will be removed from the email list you are sending to.

***HTML MESSAGES**

It can send HTML pages with embedded graphics. So, your messages will look like a web pages.

***UNLIMITED RECIPIENTS**

In MailBoy 2004 Full edition, there is no limit on the recipients count.

***THREADS TECHNOLOGY**

Threaded sending is used inside the MailBoy 2004 Mass Mailer to give you the ability to send a hundreds of messages simultaneously. It will help you to send faster and more reliable. MailBoy 2004 Mass Mailer supports up to 300 threads!

***RE-SEND TO FAILED MAIL ADDRESSES**

If there are failed mail addresses, the program will ask you if you would like it to re-send the message to these mail addresses.

***SENDING STATUS**

You can watch the process of sending of all of the mass mailer's threads.

***SAVE THE PROCESSED MAILS**

You can save in separate text files the successful, failed or both mail addresses. You can also save

the unprocessed mail addresses.

***EASY TO USE**

A powerful mass mailer with simple and intuitional interface.

***SUPPORTED OS**

Windows 98, Windows ME, Windows 2000, Windows XP, Windows 2003

Looks quite good mate, but just wondering, Is this compatible with Windows 7, particularly with the x64 architecture?

I'm away from home on an XP PC, hence would like some verification.
Thanks.

Nice , so yours make yahoo emails ?

Syberpro - September 27, 2010, 4:23 am

Anyone else tried it ? (i used it all night lol)

-mothered- - September 27, 2010, 4:49 am

No prob's mate, thanks for the reply.

Although the supported o/ses don't stipulate Windows 7, I can confirm that It actually Is compatible.

Sage Mode - September 27, 2010, 4:50 am

I plan on testing this out, I assume it is 64 bit compatible, if there are any error's I will edit this post with my results. Thanks for the share.

TheBlackMarket - September 27, 2010, 4:56 am

Cool Software, thanks dude.

its a trojan... lol

too short

Syberpro - October 28, 2010, 4:20 am

can you people read ?

its cuz i packed the crack and when i downloaded the crack it was detected too...

zombiehacker - October 29, 2010, 1:51 pm

it says FAILED!, is it outdated since its 2004? or does it still work.. i need some help with this, i typed to send to my own email and that didnt work either...

Syberpro - October 29, 2010, 3:12 pm

for me i sent over 13k of email and maybe 2000 failed ... not sure why

Soon™ - October 29, 2010, 3:47 pm

"This is a demo version. It can send email to only 100 recipients per sending"

Also, I can't set any option, I mean, no smtp server or w/e

Syberpro - October 29, 2010, 5:54 pm

really ? if someone else say its demo il post crack

Soon™ - October 29, 2010, 6:16 pm

ye, I couldn't really set anything up. It'll come in handy if it works. When I install it, it does say cracked at the agreement page ;)

GRID - October 29, 2010, 8:04 pm

If you could really found crack to the latest version , it would be so great :) . Thanks for this anyways.

Syberpro - October 29, 2010, 8:34 pm

latest , theres no latest 2004 is latest

Zenk - November 1, 2010, 3:19 pm

Could you post crack please? :/ How do you configure server SMTP, and which server do you use?

Soon™ - November 1, 2010, 4:10 pm

You can't configure smtp and stuff like Thatcher, coz it's a demo version :(

Syberpro - November 1, 2010, 4:41 pm

but the crack appears to be virus idk why ... still want it?

Soon™ - November 1, 2010, 5:15 pm

Is it the same as the version you uploaded? Because that one ain't working ;)

Syberpro - November 1, 2010, 5:23 pm

alright let me post like it worked for me

Soon™ - November 1, 2010, 5:25 pm

Hope it doesn't infect me :P

Well, it won't harm me, I hope, Sandboxie Rulez ;)

Soon™ - November 1, 2010, 5:42 pm

hhhhmm, let's go for the safe decision

Syberpro - November 1, 2010, 5:47 pm

wierd because this actually worked for me (the link)

Soon™ - November 1, 2010, 5:51 pm

indeed weird, it does say Cracked by Syberpro and watch my youtube or something in the Terms of (whatever) :P

Syberpro - November 1, 2010, 6:05 pm

yeah i did that lol ... with clickteam program

Soon™ - November 1, 2010, 6:48 pm

hehe, nice :P

Spoiler ([Click to View](#))Guess what: Too short

Zenk - November 2, 2010, 1:13 am

Could you post/PM me the crack then please? xD

elvinguitar - November 4, 2010, 3:31 am

is this still working? it has been detected by avast..

Syberpro - November 4, 2010, 2:20 pm

hmm it gets detected by virus but it works ... wierd i must say (its cuz of the crack)

Crazygamer - November 4, 2010, 5:20 pm

I been trying to use this, but I keep getting fail to send any emails? Am I doing something wrong? I used a updated list?

Thanks guys.

virus.. my security said it was virus

thexer - March 21, 2011, 2:12 pm

Hi!

Many thanks for the cracked version!!!

The problem with me is - first I downloaded the original and clean version from their site and it couldn't send e-mails from the beginning.. for example, I'm trying to send mails from normal SMTP server to my gmail mail.. it just not happening :(

For example (the MailBoy error message) > ***@gmail.com - Desc: Failed (No one of mail servers responds) ...

I saw that the problem maybe is because my ISP is blocking port 25 or some shit.. and the other problem is that the e-mail servers don't accept connections different from 25.. that sux sux sux sux, maybe I'll call my ISP tomorrow..

Syberpro - June 26, 2011, 8:42 pm

alright sorry can't help you on that one not really sure what is causing that problem.
