Thread: [Scan 1st , Close AV and Start Using Program/Hacks](#)

dark_Risk12 - April 24, 2009, 12:05 am

Error message:Windows cannot access the specified deice, path, or file. You may not have the appropriate permissions to access the item.What To do?

This is your problem??

Solutions:Close Your AV and You can use any Program/Hacks

How To Disable AV:

AVAST

Right click on the avast! icon in system tray and choose (Stop On-Access Protection)

AVG 7

Please open the AVG7 Control Center. Double-click on the "AVG Resident Shield" component and deselect the "Turn on AVG Resident Shield" checkmark and save the setting.

When you need to enable the AVG Resident Shield, reopen the AVG Control Center. Double-click on the "AVG Resident Shield" component, select the "Turn on AVG Resident Shield" checkmark and save the setting.

AVG 8

Please open the AVG 8 Control Center, by right clicking on the AVG 8 icon on task bar.

Click on Tools.

Select Advanced.

In the left hand pane, scroll down to "Resident Shield".

In the main pane, deselect the option to "Enable Resident Shield."

To re-enable AVG 8, please select "Enable Resident Shield" again.

AVIRA ANTIVIR

Please navigate to the system tray on the bottom right hand corner and look for an open white umbrella on red background

right click it-> untick the option AntiVir Guard enable.

You should now see a closed, white umbrella on a red background .You successfully disabled the AntiVir Guard.

BIT DEFENDER

Move mouse arrow to the Bitdefender icon in the bottom right of the desktop. (The little pictures in the lower right corner. When the arrow is placed on the little picture, a caption appears that tells what it is.)

Double click the icon for Bit Defender.

When the Bit Defender window appears, move mouse arrow to the left side and click >> Virus Shield.

Move mouse arrow to the black check by Virus Shield is enabled and click.

The black works will change to red, >> Virus Shield is disabled.

Move mouse arrow to the top right corner and click the down arrows.

Bit Defender is now inactive.

To enable Bit Defender, do the same steps except click to enable.

ESET NOD32 ANTIVIRUS

Please navigate to the system tray on the bottom right hand corner and look for a sign.

click it -> click on the button.

a popup will warn that protection will now be disabled. Click on "Yes" to disable the Antivirus guard.

You successfully disabled the NOD32 Guard.

F-SECURE ANTIVIRUS

Please navigate to the system tray on the bottom right hand corner and look for a blue sign.

right click it-> select Unload.

The F-Secure sign should now be surrounded by a red striked through circle

You successfully disabled the F-Secure Guard.

KASPERSKY ANTIVIRUS

Please navigate to the system tray on the bottom right hand corner and look for a sign.

right click it-> select Pause Protection.

click on -> By User Request

a popup will claim that protection is now disabled and a sign like this: will now be shown.

You successfully disabled the Kaspersky Antivirus Guard.

MCAFEE ANTIVIRUS

Please navigate to the system tray on the bottom right hand corner and look for a sign.

Right-click it -> chose "Exit."

A popup will warn that protection will now be disabled. Click on "Yes" to disable the Antivirus guard.

You successfully disabled the McAfee Guard.

MCAFEE SECURITY CENTER 7.1

Please navigate to the system tray and double-click the taskbar icon to open Security Center.

Click Advanced Menu (bottom mid-left).

Click Configure (left).

Click Computer & Files (top left).

VirusScan can be disabled in the right-hand module and set when it should resume or you can do that manually later on.

Do the same via Internet & Network for Firewall Plus.

NORTON ANTIVIRUS (by Symantec)

Please navigate to the system tray on the bottom right hand corner and look for a sign.

right-click it -> chose "Disable Auto-Protect."

select a duration of 5 hours (this assures no interference with the cleanup of your pc)

click "Ok."

a popup will warn that protection will now be disabled and the sign will now

You successfully disabled the Norton Antivirus Guard.

SYMANTEC ENDPOINT PROTECTION

Right click on the icon in the taskbar notification area & select "Disable Symantec EndPoint Protection".

+REP IF YOU THINK THIS HELP~
