Thread: [\[Release\] MetuS HackForums Edition - DDoSer](#)

Brent328 - April 24, 2009, 12:47 am

I found the source code and edited it. And yes I did credit the original creator of it, I just put myself in there as a modder.

You will need to forward port 3176 for the bots to connect to you and for you to send commands to the bots.

whiterabbit7500 - April 24, 2009, 9:19 am

i'll have to give this a try when i get home...my current botnet program doesnt seem to be working right. what coding does it use?

volcomstone000095 - April 24, 2009, 11:03 am

(Apr 24, 2009 09:19 AM)whiterabbit7500 Wrote: [\[CITE\]](#) i'll have to give this a try when i get home...my current botnet program doesnt seem to be working right. what coding does it use? I think Visual Basic and C++/C#

Nembot - April 24, 2009, 11:10 am

Is this better than RXBot? Is it easy to spread?

krizhiel - April 24, 2009, 11:38 am

well can u send me thanks.....

Brent328 - April 24, 2009, 3:32 pm

(Apr 24, 2009 11:10 AM)Nembot Wrote: [\[CITE\]](#) Is this better than RXBot? Is it easy to spread? Its not an IRC botnet, and the spreading depends on how well you do spread

xyz iz lawless - April 25, 2009, 1:47 pm

can u please tell me what the update bot feature does

wan5 - April 25, 2009, 5:28 pm

(Apr 25, 2009 01:47 PM)xyz iz lawless Wrote: [\[CITE\]](#) can u please tell me what the update bot feature doeslol wait for it.... It updates the bot! ONLY use if a new version comes out as it overwrites the registry

Xazime - April 25, 2009, 6:23 pm

Works well, thanks :)

iwanbehacker - May 1, 2009, 4:27 am

wow wen i try it doesnt come up wif anything.... please pm me on how for it to work

boxhead - May 1, 2009, 6:18 am

i dont trust all this botnet stuff, its more likely to use your computer for ddosing

Enjoi - May 1, 2009, 8:32 am

Could you write a tutorial on how this works? ;o

Next-1 - May 1, 2009, 8:55 am

bull shit

my Av picked it up.

is a hack tool but it said that it a kind of virus.

>>>>???

>>>???

Well if it is public hack tool no wonder why it is detected by av

Hydra - May 15, 2009, 9:33 pm

Infected with MAL/VB-AO. He Binded his bot to this program. DON'T DOWNLOAD

itzsoprokilla - May 16, 2009, 2:22 am

hey dumb nuts maybe its because metus has a build server coded into the booter...
lmaoooooooooooooooo

RedDevuk - May 16, 2009, 2:29 am

Retards this guy is trusted. Of course it's picked up by an AV just like BiFrost or any other one.

Its not an IRC botnet, and the spreading depends on how well you do spread
This is why I hate botnets like this: they have a direct connection to your computer which can be easily traced through decompile or a firewall and then they have your IP address plus a open port to connect to... Use a IRC Botnet which is an indirect connection.

Phrenic - May 16, 2009, 4:09 am

They could still look at the firewall and figure out which IP and Port it is connecting to.

Phrenic - May 16, 2009, 4:24 am

(May 16, 2009 04:20 AM)DarkSel Wrote: [\[CITE\]](#) They could still look at the firewall and figure out which IP and Port it is connecting to.
The whole idea of this is to spread it out to noobs, somebody with the knowledge to do that wouldn't execute it in the first place.

xsaix - May 16, 2009, 5:07 am

I love this, Very Well made
I like this program, i think it take a while to take down

GNCM - May 16, 2009, 5:17 am

It's supposed to register as a trojan then?

Brent328 - May 16, 2009, 11:41 am

(May 16, 2009 05:17 AM)GNCM Wrote: [\[CITE\]](#) It's supposed to register as a trojan then?

Yes, it is detected as a trojan. But it isn't.

Save the server in the same folder as the client is in.

zerovalue0 - June 7, 2009, 2:20 pm

ummm mine not working says missing something

Torrance - June 12, 2009, 10:59 am

Thanks its more reliable then my 2.0.1

1efty - June 12, 2009, 12:45 pm

You should make a MeTuS 2.8 one!

masterchief22 - July 25, 2009, 7:55 am

hi am new here if someone could give me some help with finding a host booter

fishstick - July 26, 2009, 12:16 am

can anyone help me out plz? im having trouble setting up metus 2.0. so far here is what i have done: downloaded metus 2.0, created an account for no-ip.org. made a bot with the correct @xxx.no-ip.info. and i put it on someones computer and ran it but when i open up metus i dont see any bots in my thing. do i need to hex edit metus?

Maxie - May 19, 2010, 5:47 am

Seems nice, is it stable?

Shooooooooort

Testing321 - May 19, 2010, 5:55 am

Can we enter the IP that we want to DOS or we need to spread the server ?

Alpha Sierra - May 19, 2010, 8:21 am

Thanks, Ill be trying it out.

Mixu - May 19, 2010, 10:40 am

(May 19, 2010 05:55 AM)ExSonic_Gear Wrote: [\[CITE\]](#) Can we enter the IP that we want to DOS or we need to spread the server ?

You have to spread it first, then enter the IP you wana ddos and then it will use all your infected users (zombies) to DDoS the victim.

danielfronty - May 19, 2010, 10:58 am

how can u get peoples IPs?

Kamay - May 19, 2010, 11:00 am

circa 200-fucking-9

Fendaril - August 3, 2010, 3:58 pm

(Jul 26, 2009 12:16 AM)fishstick Wrote: [\[CITE\]](#) can anyone help me out plz? im having trouble setting up metus 2.0. so far here is what i have done: downloaded metus 2.0, created an account for no-ip.org. made a bot with the correct @xxx.no-ip.info. and i put it on someones computer and ran it but when i open up metus i dont see any bots in my thing. do i need to hex edit metus?

I am having this same issue. I port forwarded 3176 and it clears. I then created the executable but nothing shows.

I suspect this program.Be careful guys.

Snarr - August 3, 2010, 4:36 pm

MeTuS is an overused booter. In my opinion, DarkDDoS is where it's at :D.

-na.Talish - August 3, 2010, 4:38 pm

What have you done to it apart from fuck up the gui?

Brent328 - August 3, 2010, 8:19 pm

(Aug 3, 2010 04:38 PM)Talish Wrote: [\[CITE\]](#) What have you done to it apart from fuck up the gui? What have you done apart of bumping a year old thread?

iTz Depressed - August 11, 2010, 12:02 pm

Does this use a 3 letter no-ip?

Dual_Sho0k - December 30, 2010, 7:38 am

Guys, this program doesn't work in my computer ...

The Mammoth - December 30, 2010, 7:47 am

This is visual basic right C++?

RooKie iz Boss - February 20, 2011, 9:12 pm

thanks man needed this:)..

hego555 - April 9, 2011, 9:12 pm

Does this start on startup?

blake1996 - April 19, 2011, 7:16 pm
