Thread: [\[3/5\] HP System Management Homepage Root Novell eDirectory Member Security Issue](#)

Omniscient - June 18, 2007, 5:06 am

A security issue has been reported in HP System Management Homepage (SMH), which may result in malicious people gaining access to the application.

Be sure to check if your system is missing security updates or have insecure applications installed:
http://secunia.com/software_inspector/

Feature Overview - The Secunia Software Inspector:

- Detects insecure versions of applications installed

- Verifies that all Microsoft patches are applied

- Assists you in updating your system and applications

- Runs through your browser. No installation or download is required.
