Ain't working for me even lol.. but oh wells :D ..

Ain't this the same crap you did with NoNa Crypter?

You deleted it.. FFS are you infecting files?

Lil Saint™ - September 28, 2010, 11:39 pm

thanks man looks great. realy nice GUI

UminekoRox - September 29, 2010, 12:12 am

Yo, nice Gui, seems to be good based off the comments on this. I guess I should get to the point... I want this, may I please have it? I'm not a trusted or leet member since I'm not on here often, but I have been needing to get past shitcash for god knows how long lol. I am hacker, but I am not often with the community, just not my style I guess haha. Also, I know what a hacker is, and what we do, I personally consider myself inbetween a grey hat and a white hat hacker, does this satisfy you enough? Also, the reason I have not developed something like this myself is because this kinda stuff isn't really my for'te lol. Nice ta meet'cha, and it would be nice to have this, but thanks for reading.
:P

internap dos - September 29, 2010, 12:44 am

Please try to check the license thing.. It doesn't seem to be working. I have the HWID activated, the crypter here.

This is very somewhat like your NoNa Crypt since it had the same .dll.

deathbanger - September 29, 2010, 11:19 am

damn this looks legit and smart about only asking certain people so this doesnt get leeched/patched
