Thread: [Free anonymoys proxy browsing / vpn](#)

ryan1918 - September 29, 2010, 11:29 am

Yeah, I started a site that is anonymous and has zero ads, popups, or bullshit..

let me know what you guys think, stop paying other people for there bullshit!

<http://www.thegamenetwork.org>

chilliman - September 30, 2010, 9:37 am

Vouch - It appears to work!

qwickpkz - October 1, 2010, 6:51 pm

Thumbs up (Y) good and working site.

Zeon - October 3, 2010, 9:43 am

I'll wait until someone with more than 10 posts replies. You could have made those accounts simply to vouch for you.

jamesbebbby - October 3, 2010, 11:57 am

Works this end!!!

Cheers James

Scincid - October 3, 2010, 5:09 pm

I wouldn't login into accounts with this. I wouldn't really with any HTTP proxy, but that's just me. :p

stevenhacksall - October 3, 2010, 9:41 pm

vouch for a working proxy.

NotAk-47 - October 4, 2010, 1:45 am

works just fine. Lmao vouch

Moot - October 4, 2010, 1:46 am

You spelled anonymous wrong in your title.

jamesbebbby - October 4, 2010, 6:31 am

Cheers James

ryan1918 - October 4, 2010, 10:07 pm

Yes, I didn't put anonymous because some schools and work places block that keyword, thanks guys.

Yeah if you don't trust it don't login to sites with it, but I don't log anything on it, I just am sick of all these damn proxy browsing site's that have 20 ads, popups and bullshit..

[Warn]

I also sell hosting services, like web hosting, bnecs, eggdrops, ircds, radio stations, game servers, dedicated servers, if you like the speed, I have over 18 dedicated servers, I host over 550 sites, mainly forums, if you are interested you can private message me for a quote or I can give you a link to my company.

ryan1918 - October 7, 2010, 5:11 pm

So would you rate it fast or slow, and any suggestions?

ryan1918 - October 9, 2010, 9:48 pm

I was wondering if anyone had a good php script for proxy browsing site, that has an admin panel, I really don't like the current one I'm using.

Itachi Uchiha - October 9, 2010, 11:36 pm

Clearly, since they can be keylogged.

ryan1918 - October 10, 2010, 4:11 pm

I hate to say it but I could care less about key logging someone, and as I mentioned before, don't login to any site if you don't want to, of course I could keylog it, but I really don't have the time to care about getting someones login.

The Elite - October 10, 2010, 7:01 pm

A great VPN and Proxy service, used it before.

Itachi Uchiha - October 11, 2010, 1:09 pm

(Oct 10, 2010 04:11 PM)ryan1918 Wrote: [\[CITE\]](#) I hate to say it but I could care less about key logging someone, and as I mentioned before, don't login to any site if you don't want to, of course I could keylog it, but I really don't have the time to care about getting someones login, I have access to one of the biggest key logged nets, with over 10,000 pages of logins with 20 things on each page, from banks, email accounts, social network accounts, and a ton more, Anyone interested in purchasing access to this? It's from 100,000 different computers, and it updates every week.
Not need to rant. I only made a statement I never said it was keylogged.

ryan1918 - October 12, 2010, 12:51 am

Yeah, it's okay, I just take things offensively when people kinda assume things, but yeah I understand, because if anyone knew me, they would know I would never do anything like that, I'm just trying to create a good site that benefits people like all my other sites.

I take everything in consideration though.

zezaku - October 14, 2010, 12:43 pm

actually i m hosting my servers on his hosting and all i can say is u can trust ryan and is always a pleasure to work with him

ryan1918 - October 14, 2010, 4:48 pm

thanks bro, I am trying, I will be opening some more free sites in a week or so! get ready, anyone got any ideas for new sites?

ryan1918 - October 15, 2010, 11:32 am

It should be faster, I've upgrade my port from 100mbit to 1000mbit, let me know what you think.

ryan1918 - October 19, 2010, 4:47 pm

If you own a proxy site I can send thousands of hits directly to your site, I have OVER 150,000 OPT-IN emails for proxy browsing sites, and once I send out the email, you will receive minimum of 1,000 hits the first time I send it out, but normally you get 1,500-5,000 direct hits the first day, and you will get about 600-1,000 or more hits depending how fast your proxy site is, and if it don't have a ton of ads/popups and make the people want to come back.

The rules are as follows, I only send to proxy browsing sites, as they are only OPT'D in for them, there is no spam, or emails from people that don't want it.

I offer discounts if you purchase more than 15 days in a row, or a month's worth of services up front, after you purchase one of my MASS MAILS, you will purchase again.

I can get tons of traffic to your sites, I offer discount for 5 or more sites for one purchase, I send out a new email every single day, and there turnout is about .3 cents CPM, that's the cheapest rates you will ever get.

Payment methods are, Paypal(VERIFIED ONLY, THERE IS A 48 HOUR WAIT IF THIS IS YOUR FIRST PURCHASE TO PREVENT CHARGE BACKS UNLESS YOU ARE RESPECTED ON HERE), Liberty Reserve, Prepaid Gift Cards, Green Dot Money Packs.

PRICE: \$25 per site, per day, discount for 5 or more sites per purchase, or if you purchase 15 days or more in one time.

I DO NOT SEND TO ANY SITE EXCEPTS FOR PROXY BROWSING SITES, I have the right to refuse your site any my discretion.

If you are first time customer, I will offer a discount to test my services, I will allow the first purchase to be \$15, because I know you come back for more!

ryan1918 - October 19, 2010, 7:49 pm

I have now also added two servers on the site, so it will spread out the traffic now.

ryan1918 - October 25, 2010, 6:39 pm

I just added a germany server now, so there is 3 servers hosting the site.

christiano - October 25, 2010, 9:41 pm

Hmmm..nice service it has

Its awesome

ryan1918 - October 26, 2010, 12:10 am

Thank you, as it grows I will add more servers and keep it alive by donating if you a few bucks will keep it alive, but I won't ever put up ads/banners, I am probably the only proxy browsing site that doesn't have a single ad.

Imcognito - October 26, 2010, 6:08 am

It's not just you! <http://www.thegamenetwork.org> looks down from here.

Check another site?

ryan1918 - October 26, 2010, 5:39 pm

No idea, works for me, I know I was fixing my name servers, that could of caused that.

ryan1918 - *November 5, 2010, 12:36 am*

I just added another server to the list!

ryan1918 - *November 10, 2010, 10:36 pm*

Do you think I should add anything to it?

ryan1918 - *November 16, 2010, 3:03 am*

Okay, ing my thread, hehehehehe
