Thread: [HWiD Lock + TuT {VB6} {EASY}](#)

3XPL0IT - October 1, 2010, 2:23 am

Hey guys this is my HWiD Lock program made in vb6.

Pics:

-Login

-Accepted Or Not

-HWiD Code Reader

-VB6 Source

-After The Login You Simply Add Your Form

-VB6 HWiD GetHWiD Code

Also Edit This One:

After That When You Want To Add An Client,
Make A New .TXT File With The HWiD Written In It.
And Name The .TXT File To The HWiD Code.
Also For Each Client Create An .TXT File And Upload IT.
Its Verry Simple.

For More Questions Contact Me.

There are many examples of HWID locking in vb.net already. Seek and you shall find.

Fafaffy - October 1, 2010, 5:54 am

Nice tutorial Hope someone finds it useful :)

And whats with the newcomers flaming?

besimbicer - November 29, 2010, 3:15 am

help me i need not rar password its file please sent me

-Vector- - November 29, 2010, 3:24 am

I would imagine this is a pretty easy to crack HWID protection, with a poor admin-side GUI. But good job anyway, people can use this to develop their own HWID protections :D

@besimbicer, you have to decode the password from the given hint. This is to stop people from leeching it.

besimbicer - November 29, 2010, 5:33 am

vector i dont know password algorithms :(need help

DynamicFirework - August 6, 2012, 7:00 pm

Link down I really need this!

Im making a crypter :\

Rommel Maquin Valladares - November 16, 2019, 9:03 am

Link fallid =(I needed it for my project = (if they upload it again thanks

#Kat - December 24, 2019, 8:38 am

I can assure you you will not ever need this period.

nascoman - December 31, 2019, 8:29 pm

I need someone to coded private rat which I am willing to pay and I please if you are ripped do not contact me.
