Okay so Sk8 Plague advertised in the Buyers Bay saying that he wanted to buy all gold memberships for the xbox.

so i made him a offer of an account which had 6 days live, 1600msp on it and 10th prestige on MW2 and a 50 in Halo 3, i sent him this offer via PM and he replied he would give me \$20 which i accepted, i asked him will he go first he said NO, so because he was leet i went first

i gave him the account details, he recoverd the account and told me it worked...i gave him my paypal account email and he told me it dosent work and he cant send money from US to UK, he told me this after he used the 1600msp on the account, so basically there was nothing i could do, so then i told him well you can buy me Leet on hackforums which he agreed to which was like 4 days ago he told me in a PM he sent the payment(filled out the leet form) but im still not Leet and i asked Omni if he sent the payment and he said no.

i stupidly deleted some of the pm's because i needed the space but i have one still...here is proof

[IMG]<http://i2.photobucket.com/albums/y25/xk05/hf.png>[/IMG]

he has then tried selling the account in the marketplace.
