Thread: [\[SPREAD\]Spreading your rats Free!\[SPREAD\]](#)

Calibrate - October 3, 2010, 4:45 am

Hey hacklets!

I've nearly perfected my technique on spreading, but i cant spread my own (portforwarding problems), so i'll spread your free of charge!

Down side: Spoiler ([Click to View](#)) You must be a new member/not have any infected, this stops the same person using my service over and over.

Also gives a change for you newbies out there to join the club!

Simply PM me the link, first come first serve, but dont pm if im already doing one(Will say in this post), as i'll just ignore.

The one that i choose to spread WILL be notified via PM, so lets get started!

MBYBOX

-The one and only

Currently unavailable, i cant get access to the spreading program :L

EDIT: also tell me if its FUD, if its not then free crypting!

popolgaga - October 3, 2010, 4:56 am

lol it's strange cause you didn't check "10 slave" in your sign but you're claiming that you can spread easily...

edit: sorry i've just understood that you can't portforward...

Hehehe thats ok :)

Cant portforward because im on a blinking mobile broadband, that has uPnP options, but wont work...

Why does this thread say it has -1 replys :S

It prob dont anymore since i just replied lol..

Add my msn. Ill help you portforward if i can bro
