Thread: [Need a real hacker! RAT-Server infection- Email password grabber](#)

Tobias_1982 - October 3, 2010, 5:10 pm

Hey guys,

My name is Tobias n I am from Germany, i was once quite a regular user of hforums but time passes by and I am old now ;)

Anyway I kind of have a problem that I have to address to the community. Maybe somebody can help me. Ok I study medical informatics and do have a serious problem. They close down our study plan, means they switch our magister to the American bachelor and master system. And that means I only have time left until December to finish the last 5 exams. They dropped this bomb on FRIDAY, 1st October 2010!! Otherwise all the other work I have done was useless. This comes totally out of the blue and since I have a job too (family doesn't support me),nobody expected this. They just announced it on Friday and I think I can do 4 of the five exams. The last one is just a pain in the ass.

The fifth one will be a total gamble and I just want to improve my chances. Maybe anyone of you has an idea. Get email address and password of profs or RATs, search the university server.....I mean I am out of the scene quite some time so I need someone who really knows their shit. I thought bout maybe infect pdfs and send it to them they open the pdfs and get RAT infected.

I need a hacker and I pay up to 200 Euros only via paysafecard. I mean it depends on your status, your reputation and what idea you have on helpin me! And dont fool me gg cause I know the scene.

If you know some peops that might help just PM me!

If you know a way to help me, let me know what your plan is and send me an email to tobias.muellner@yahoo.com Or PM me or add me on msn (same email adress)

Thanks so much! Ok guys I gotta go learn! Hope somebody can support me!

All the best

Tobias
