Thread: [\[TUT\] How To Make A SMS Bomber \[TUT\]](#)

PURP - October 4, 2010, 11:04 am

Hey Guys today im showing the people who don't know how to make a SMS Bomber how to make one.Spoiler ([Click to View](#))

So to start off open Visual Basic then go to New Project
Then Click here

Spoiler ([Click to View](#))

Then you need to add 5 Text Boxes
2 Buttons 1 Rich Text Box
1 Combo Box

Like This Spoiler ([Click to View](#))

Then right click on the form and click view code add this Spoiler ([Click to View](#))Code Imports
System.Web

Imports System.IO

Imports System.Net.Mail

Then Double Click Button1 And Add This

<http://pastebin.com/dcfuH7nA>

Then Double click button2 and add this

Code End

Then Click On The Combo Box Like This And Click Edit Items

Spoiler ([Click to View](#))

And Add This

Spoiler ([Click to View](#))Code Sprint PCS

Verizon

Boost U.S

T-Mobile (Germany)

7-11 Speakout

Airtel (Karnataka, India)

Airtel Wireless (Montana, USA)

Alaska Communications Systems

Aql

AT&T

AT&T Enterprise Paging

BigRedGiant Mobile Solutions

Bell Mobility & Solo Mobile

BPL Mobile

Cellular One

CingularCingular (Postpaid)

Centennial Wireless

Cingular (GoPhone prepaid)

Claro (Brasil)

Claro (Nicaragua)

Comcel

Cricket
CTI
Emtel
Fido
General Communications Inc.
Globalstar (satellite)
Helio
Illinois Valley Cellular
Iridium (satellite)
Iusacell
i wireless
Koodo Mobile
LMT
Meteor
Mero Mobile
MetroPCS
Movicom
Mobitel
Movistar
MTN
MTS
Nextel (United States)
Nextel (Argentina)
Orange Polska
Personal
Plus GSM
President's Choice
Qwest
Rogers
SL Interactive
Sasktel
Setar Mobile email (Aruba)
Suncom
T-Mobile (USA)
T-Mobile (Austria)
T-Mobile (UK)
Telus Mobility
Thumb Cellular
Tigo (Formerly Ola)
Tracfone (prepaid)
Unicel
Virgin Mobile (USA)
Virgin Mobile (Canada)
Vodacom (South Africa)
Vodafone (Italy)
YCC
MobiPCS (Hawaii only)

Then Click Ok

Now you might have to re-arrange the text boxes for your program

Then Do this

Spoiler [\(Click to View\)](#)

And This

Spoiler [\(Click to View\)](#)

Now go to where you save it and there you go your own SMS Bomber. :)

If you need any help send me a PM or add me on AIM: atvrider2381

- 1 So many tutorials
- 2 Nice to see that you are coding
- 3 Really Bad Gui minimize and exit button wow
- 4 nice tutorial

PURP - October 4, 2010, 11:27 am

lol thanks and the GUI in the first picture is one is just thrown together. I changed it around completely.

? Lollipop ? - October 4, 2010, 11:32 am

how to get providers? im from croatia >.< no providers for me :S

PURP - October 4, 2010, 12:17 pm

(Oct 4, 2010 11:32 AM)Pedo Bear Wrote: [\[CITE\]](#) how to get providers? im from croatia >.< no providers for me :S

You should be able to google them.

InuyashaTB - October 4, 2010, 12:21 pm

google SMS provider gateway

Pulser - October 4, 2010, 12:25 pm

Why did you a bunch of Elseif statements?

Use a select case statement! It is much cleaner and easier to do. Here is a quick example I wrote up for you.

```
Code Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button1.Click
    Dim lol As String = TextBox1.Text
```

```
    Select Case lol
        Case "Hello Hackforums"
            MessageBox.Show("hi")
        Case "Mr. Predictable"
            MessageBox.Show("Is cool")
    End Select
End Sub
```

InuyashaTB - October 4, 2010, 12:26 pm

(Oct 4, 2010 12:25 PM)Mr. Predictable™ Wrote: [\[CITE\]](#) Why did you a bunch of Elseif statements?

```
Code Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)
Handles Button1.Click
    Dim lol As String = TextBox1.Text
```

```
Select Case lol
Case "Hello Hackforums"
  MessageBox.Show("hi")
Case "Mr. Predictable"
  MessageBox.Show("Is cool")
End Select
End Sub
```

it doesn't matter.

Just depends on preference :)

lemondragon - October 4, 2010, 12:28 pm

You're able to bomb a mobile with sms

So it is possible to send a sms from pc to mobile for free?

So why use a mobile sending a sms, if you can use your pc?

(I think I missed something(?))

Pulser - October 4, 2010, 12:30 pm

(Oct 4, 2010 12:28 PM)lemondragon Wrote: [\[CITE\]](#) You're able to bomb a mobile with sms

So why use a mobile sending a sms, if you can use your pc?

(I think I missed something(?))

These text message spammers use the providers built in E-mail to Phone capabilities. These programs simply work on a loop / timer to send an e-mail to a phone, over and over.

InuyashaTB - October 4, 2010, 12:31 pm

the point of SMS is that its MOBILE... not on your desktop.

also yes, most of the time its free... and its called email.

Thats all were doing. Sending an email to cell phones through a gateway.

Zer[o] - October 4, 2010, 12:31 pm

nice tut, thanks for the share

PURP - October 4, 2010, 12:31 pm

(Oct 4, 2010 12:25 PM)Mr. Predictable™ Wrote: [\[CITE\]](#) Why did you a bunch of Elseif statements?

Sure, let me know if you need help.

lemondragon - October 4, 2010, 12:32 pm

Ah... Thanks for explaining :D

PURP - October 7, 2010, 8:51 am

No problem. Maybe someone else could use this.

versx - October 7, 2010, 11:08 am

Decent tutorial, thanks for sharing.

»**AUB™** - October 7, 2010, 8:36 pm

thanks for the tutorial ?

but i need help, i want to add "optus" into the combobox. can you send me the code for "optus"?

for example: this is for vodafone

```
Code Elself ComboBox1.SelectedItem = "Vodafone (Italy)" Then  
mail.To.Add(TextBox1.Text + "@sms.vodafone.it")  
mail.From = New MailAddress(TextBox3.Text)  
mail.Subject = TextBox2.Text  
mail.Body = RichTextBox1.Text  
SmtpServer.Send(mail)
```

bodies - October 7, 2010, 10:02 pm

I did your tutorial and i get errors (picture in link)

<http://img43.imageshack.us/img43/5486/errorsx.png>

so i added a label and a 5th textbox which got rid of the errors, but then i got this error at runtime (picture in link)

<http://img821.imageshack.us/img821/1461/error2y.png>

I know my solution isn't right but i was just brainstorming

any help would be great!

Fluorescent - October 7, 2010, 10:47 pm

Nice and simple tutorial, worked for me. I compared it against mine and it's pretty good.

mmmm... i never had a problem with label1 ?

Static™ - October 8, 2010, 9:09 am

What vB is this made for? I'm running 2010 and errors come up saying, "Couldn't identify Email" or something like that, and 80 of them.

thahim - October 8, 2010, 4:33 pm

can't copy and paste the code.. have to remove all 500 line numbers ... can't really do that do u have other alternative

Pulser - October 8, 2010, 4:43 pm

You shouldn't be copying and pasting code. If you have even the slightest amount of programming knowledge you can put this together. All you need to be able to do is add components to your form, do some Imports, and finally build it. There really are no errors.

rakistahbokyot - October 8, 2010, 8:01 pm

can i have your file? i am a beginner.

PURP - October 22, 2010, 9:53 am

(Oct 8, 2010 08:01 PM)rakistahbokyot Wrote: [\[CITE\]](#) can i have your file? i am a beginner.

No Sorry. I made the Tut so you/everyone can make their own.

mrxbdude - October 23, 2010, 3:41 am

Hi..can u please find the "Optus" Provider -- It's for Australian Mobiles...please help..i tried a lot to search on google..so it's just up to u now..please reply ASAP..

Thanks
VBDude

[EDIT] - Found it - @redcoal.net

Where did textbox5 come from in your code?...there is no mention of it in the tutorial..?

lilacscripts - October 23, 2010, 6:50 am

Ive found 2 errors "Texbox5" error and "Label1" error. I have fixed the textbox error but what is this about a label??

RockYy - October 23, 2010, 6:59 am

Hey, i got a question.

How can i bomb a mobile if the guy hasn't enabled the function of receiveing those e-mail-sms ?
I'd need a script which would for example use the icq.com feature, where you can send a sms with download link to your mobile (<http://www.icq.com/download/mobile/>), for bombing the mobile ...
right?

How can i start on coding this? Is it possible with vb.net?

Thanks in advance

RockYy

lilacscripts - October 23, 2010, 8:57 am

Bump, can somone answer my question please :(

RockYy - October 23, 2010, 9:32 am

(Oct 23, 2010 08:57 AM)lilacscripts Wrote: [\[CITE\]](#) Bump, can somone answer my question please :(
For me it looks like you dont need any lable, so delete the whole code which is working with that lable and you'll see if its really needed ;)

PURP - October 23, 2010, 9:32 am

(Oct 23, 2010 08:57 AM)lilacscripts Wrote: [\[CITE\]](#) Bump, can somone answer my question please :(
What Error Are You Getting Exactly?

As Long As They Can Get Text Messages Then You Can Use This On Them.

Hmm i tried to send an email directly to the mobile via my hotmail account, the mobile is O2 Germany and i used 0*numberhere*@o2online.de. But after a while this came back: Code This is an automatically generated Delivery Status Notification.

Delivery to the following recipients failed.

0**@o2online.de i also tried it first on my E-plus Germany mobile and it came back this :
Code Unfortunately your mail to 0**@smsmail.eplus.de
couldn't be delivered because the addressee currently doesn't
allow mail reception on their mobile phone.

You may send the mail again. However, a successful
delivery requires that the addressee allows mail reception. So i guess at least in Germany the
mobile you send an email to have to allow this first :(...

So now I'm looking for a way to bomb the mobile with an online function provided by companies like
lcq.com for sending sms with download links to the mobile... Can anyone help me? Thanks

RockYy

DaL0rd - January 2, 2011, 2:13 pm

Im having problems copying the code to button 2 :/

Exposer - January 5, 2011, 3:16 am

NICE SHARING MATE..

Bookmarked it..gonna check it soon..

Many thanks..

Con7rast - January 7, 2011, 8:07 pm

I'm also having problems with Label1. Help?

Xflinitrix - January 7, 2011, 11:26 pm

Thanks for finally making a tutorial for this so many people were bitching on how to make one! Such
a relief now I can link them to this :D

Contra - January 7, 2011, 11:35 pm

You said VB.NET and I skipped the rest of the tutorial. Lol...

AntOneSan - July 3, 2011, 12:45 pm

MMS bomber, not sms. No?

<>

KhainSolja - August 25, 2011, 10:19 am

Not to bring something back from the dead but is this possible in VB2008? I can only run this one because I dont have service pack 3 for xp.. Lol I am getting a few errors

Error 1 'Imports' statements must precede any declarations.

Error 6 Type 'MailAddress' is not defined.

Thanks to anyone who can help.

tokzikate - December 21, 2011, 12:57 am

you have to add the code below, before "Public Class Form1"

Code Imports System.Web

Imports System.IO

Imports System.Net.MailLike so:

Code Imports System.Web

Imports System.IO

Imports System.Net.Mail

Public Class Form1

'code skhds kjd chopidc

End Class (Aug 25, 2011 10:19 AM)KhainSolja Wrote: [\[CITE\]](#) Not to bring something back from the dead but is this possible in VB2008? I can only run this one because I don't have service pack 3 for xp.. Lol I am getting a few errors

It's 400+ lines of mess, nothing impressive at all.

Natas - April 26, 2012, 1:17 am

Good tut in general its not 100% proper but it is good to learn this helped me make my sms bomber and he said that is what he was trying to do

If you get a error about text box 5

add a new text box this text box is for how many times you want to send the message

now if you get the label 1 error ...

"trying to fix now will be back in a min"

OK the label one error is textbox5.text

So what you need to change is

Add Text Box 5

Then click on the label one error and add textbox5.text

~thank you you have help me make a sms bomber I will be releaseing it in a sec and will make sure to give you and your tut its credits :) <3

kolec94 - April 26, 2012, 6:13 am

DARPA - January 27, 2013, 7:10 pm

Ok thanks for the TUT Bro.

However: Here is a brief story.

Originally <https://hackforums.net/member.php?action=profile&uid=374198>

LGx Hackz zZ

bullshitted me that he made this to bullshit me some more about \$35 i leant him for a booter, He's a FW i deal with it.

So then i found this TUT.

So i stuck it all together easy as pie and fixed up the TextBox5 error and Label1 problem, i then added my own ISP smpt etc.

Build went great then i typed all the info in and SPLAT nothing, so i mixed up the area codes and jazz. SPLAT nothing.

SO I JUST WANT TO KNOW --- DOES IT ACTUALLY SEND REAL SMS MESSAGES TO REAL PHONES IN THE LAND OF REAL ??

Jaanusolen97 - April 3, 2013, 12:03 pm

WHY I NEED TEXTBOX 4 IF IT IS NOT IN SCRIPT ?

I FIXED LABEL1 AND TEXTBOX5

But there are still mistakes , I'm beginner i can't fix all of them

mindcrasher - June 8, 2013, 11:44 am

looks like a nice tut this should come in handy when I need to spam some bitches!!!

irish2385 - August 14, 2013, 7:53 am

Sorry but i need my countries SMS Gateways

But i cant find it in google can you help me?

I figured it was something like that.. thanks I'll find it and get it.

Jack unit hccc - March 1, 2014, 3:29 pm

Getting FormatException when I select which carrier in my combobox.

nvm, i put the code under the combobox, not button 1

still getting unhandled expetion input string was not in a correct format.
