CREDITS:

In Shadow Batch Virus Gen - 4.1.exe

Used the batch filemaker, so all creds to him, I take absolutely NO responsibility or rights or any credits for this program, don't claim it as mine or anything.

INFO:

It will like.. well.. basically screw up a computer (=

I don't know if it's harmful but it is definitely fucking annoying xD.

LINKS:

Here's the link for the .bat [With viewable source] and .exe [Compiled].

[MediaFire](#) << Psst, you click that link T_T

Alternatively:

Uppit.com: [Batch With Viewable Source](#) OR [Compiled .exe](#)

Post the source code on the forum using the code tag. Or if it is a long code and you think it is to big to post, post it under the spoiler tag and then wrap the source code in code If that makes sense?

So
