Well i don't allow nulled billing software only license script, this hosting is for 1 year and because we use a high hosting service there is no downtime.?

Hey, thanks for the free hosting, but the site doesn't seem to be loading. I've set the DNS to what you provided in the thread, but it still doesn't seem to work. :/ And I can't help notice that most of the ones that you say are hosted don't work either. :/ Help?

BTW, your inbox is full.
