Thread: [\[Free\]Decrypting Any Crypted Text\[Free\]](#)

Blue Screen of Death - *October 10, 2010, 3:05 am*

I decrypt for free any encrypted text!

I do not accept binary,md5 and aes256(ROFL)

Post below codes and encryting/decrypting method.

BlaineusTV - *October 10, 2010, 4:20 am*

Encrypted with:

Reverser --> ATOM-128 --> HAZZ-15 --> TRIPO-5 --> REVERSER --> EZIP-64

11380.496954455393/15873.178055754159/13276.307663627389/7579.1100329488145/16567.19

Wow you are God. Could you please Pm me how you do this im so stumped. Ive orderd leet. when i
get it +rep for you dude.

SpecterCraze - October 10, 2010, 10:25 am

lets try your skills

1) Pass: mV[(h)/a~]-v#'%lMcvLdc&vMdazC]wYL\$(\$L{XlcGndUf){E^Galm`x&-,fJx'0wy'v)!HQ
Encryption: MORSE > ROT14 > REVERSER > AES 128-bit > ROT20

2) guess this encyption

PASS : {101,66,-114,86,26,-102,-26,97,-80,74,43,-18,0};

Blue Screen of Death - October 10, 2010, 11:12 am

AES 128-bit cannot be decrypted actually.

SpecterCraze - October 10, 2010, 11:40 am

how about number 2 its only 1 decryption

Blue Screen of Death - October 10, 2010, 11:57 am

axis10101 - October 10, 2010, 10:53 pm

I agree, people are posting peoples noob encryptions because they can't decrypt them themselves.

Totally invalidating the whole point of putting them on in the first place.

Not the best idea dude.

SpecterCraze - October 11, 2010, 3:42 am

im checking the forum rules and i cant seem to find in any way that the OP is violating any rules for doing this.

LOL, what a failboat goodjob getting me banned for 7 days?

SpecterCraze - October 12, 2010, 6:22 am

just get over it you wont be able to stop him if he still likes to do this, especially hes not violating any

rules in doing this. if your noob protection is broken it means its just that easy to decrypt. and if your getting mad that your releases is getting decrypted then keep it to yourself and dont release it at all its like your just releasing things in the scene to get a name and not really openly sharing the knowledge for others to learn

Blue Screen of Death - October 12, 2010, 9:05 am
waiting for more encryptions to decrypt:)

axis10101 - October 12, 2010, 9:58 am

Sorry to the OP for taking this off topic,

But can't you see how you are contradicting yourself with this post?

"its just that easy to decrypt" obviously not otherwise they wouldn't need the OP to do it for them.

"for others to learn" they are not learning by getting someone to do it for them, thats like saying using someones source code is learning to program.

I don't have any software that I am defending btw, I just think its much better for people to learn to do it themselves, and in the process learn other things too.

This doesn't mean the OP shouldn't continue to do this, I just don't like the idea of people who can't be bothered to spend 5 minutes decrypting a password, to get some software that someone has spent their time creating.

Minimal - October 12, 2010, 1:52 pm

All this does is promote more shareca\$h links. There is no point whatsoever in noob protection, if you will just go on crypto and decrypt it for them. It also seems like a massive waste of your time. What stumps me is that people struggle to do it themselves. If you can read, you should be able to decrypt them.

Truth of the matter is people are too lazy to use the search function to find tutorials on exactly how to do it themselves.

SpecterCraze - October 12, 2010, 8:37 pm

i need this

PASS : {101,66,-114,86,26,-102,-26,97,-67,99,16,-49,14,73,-64,-70,-38,-49,82,-50,-64,-69,0};

encryption RXBOT

i dont have edit post so i forgot to add this

if you cant decrypt that try this

Good pass consists of three parts that will be decrypted of independent form to form a single pass...

1°. T-Ascii-- Hex--Base85

Thanks in advance

Tartarus. - November 13, 2010, 11:11 am

Dont decrypt vor don26, that is for Own's Crypter!

.Violence - November 13, 2010, 11:29 am

Poor CPC6. All leechers get hold of the password, just by 2 clicks.

Blue Screen of Death - November 13, 2010, 11:35 am

Anyway i don't decrypt anymore anti-noob protection codes!

Please DO NOT post anti-noob protection codes.

Joey Tribbiani - November 14, 2010, 1:06 am

hey

first of all i know own'z crypter password

i cracked using crypto.com

secondly, this is for twinkle crypter.

i am not getting how to decrypt TEA, i can do rest all on my own :)

hebrew878 - November 14, 2010, 1:17 am

i do not accept md5 codes. sorry.

DarkDecaydence - November 16, 2010, 6:26 am

That's cus they are DARN HARD TO CRACK.

I approve of the new u, by not attempting to crack anti-noob protection.

strength sys - November 16, 2010, 10:33 am

[End] FERON-74>ATOM-128>TIGO-3FX>ROT-14>RC4>ZONG22>TRIPO-5>TEA [Start]?

cyberjunkie - November 16, 2010, 1:19 pm

password encrypt to:

ZARA-128 --> TIGO-3FX --> ESAB-46 --> T-ASCII

the chain ascii its scrambled .

copy and past password in wordpad,notepad. pass ---> notepad or wordpad

copy password and paste crypo. notepad/wordpad ---> crypo.com

its possible you view only space (depending Brother) good ! just remove space.

tips:

all space non granted

symbol no ascii non granted

start at the end to remove space/no ascii

good luck

here the "code"

cyberjunkie - November 17, 2010, 5:51 am

(Nov 16, 2010 07:05 PM)Banksy95 Wrote: [\[CITE\]](#) cyberjunkie's is Own'Z Crypter!! Don't do it!! i know but on my pc crypto is url blocked -.- so i can't get the password if someone can help me he get a big thx

Blue Screen of Death - November 17, 2010, 6:08 am

(Nov 16, 2010 02:19 PM)cyberjunkie Wrote: [\[CITE\]](#) password encrypt to:
ZARA-128 --> TIGO-3FX --> ESAB-46 --> T-ASCII

the chain ascii its scrambled .

copy and past password in wordpad,notepad. pass ---> notepad or wordpad

copy password and paste crypto. notepad/wordpad ---> crypto.com

its possible you view only space (depending Brother) good ! just remove space.

tips:

all space non granted

symbol no ascii non granted

start at the end to remove space/no ascii

good luck

here the "code"

Sorry but i won't send the decrypt code os this because it is a Facebook cookie. Good luck
Hacking alone a facebook account.

(Nov 17, 2010 07:18 AM)cyberjunkie Wrote: [\[CITE\]](#) nice nobody can help me because the site is
blocked

really nice people hereJust unblock it. What's so hard?

cyberjunkie - November 17, 2010, 6:34 am

hmm because i can't acces to my router ? because my father had change it ?

what is so hard to help someone who can't get the password ?

do you think i haveno other things to do as ask someone that he can help me ?

- no

so help me or not but nobody should flame

Tabaq - November 17, 2010, 10:26 am

stoRNs - November 17, 2010, 11:52 am

thanks 4 sharing bro :333

Punisher200 - November 17, 2010, 12:18 pm

ZARA-128 --> TIGO-3FX --> ESAB-46 --> T-ASCII

Pm me message , its from Own'Z Crypter v.2.2.

We dont wanna leech right ? but i dont understand a sh*t about this decrypting and encrypting thingy.

Lanbo - November 17, 2010, 12:27 pm

?

It's not a facebook cookie, it's part of a facebook script and someone stuck their CPALead code in there and I can't get it out. :|

(Nov 17, 2010 07:19 AM)bomblader Wrote: [\[CITE\]](#) Sorry but i won't send the decrypt code os this because it is a Facebook cookie. Good luck Hacking alone a facebook account.

(Nov 17, 2010 07:18 AM)cyberjunkie Wrote: [\[CITE\]](#) nice nobody can help me because the site is blocked

really nice people hereJust unblock it. What's so hard?

Blue Screen of Death - November 17, 2010, 1:02 pm

Here is all qhat i could got.

```
Spoiler \(Click to View\)Quote:<?php
define("FACEBOOK_APP_ID",$appId);
define("FACEBOOK_SECRET",$appSecret);
$cookie=get_facebook_cookie(96,168);
$session;
echo "<div style='display:none;'>";
$me;
$pagesCount=0;
$pages=$facebook("/me/accounts?fields=id");

Thanks,
The Caesar cipher is named after Julius Caesar, who, according to Suetonius, used it with a shift of three to protect messages of military significance.

James Wilson M.D - December 6, 2010, 2:25 pm

What do these decrypt to and what were they encrypted with?

Password encrypt with:

ATOM-128 --> HAZZ-15 --> T-ASCII

The ASCII chain it scrambled!

copy and past password in wordpad, notepad. pass ---> notepad or wordpad

copy password and paste crypto. notepad/wordpad ---> crypto.com

its possible you view only space (depending Browser) good ! just remove space.

Tips:

All space non granted

Symbol no ASCII non granted
Start at the end to remove space/no ascii

Good luck!

* Use only winrar to decompress the password don't works with another archiver.

PASSWORD :

Code:

Issue number one:

You must decrypt the encryption in a certain order with these text encryption styles: BASE-64, OKTO3, TRIPO-5. The phrase you must decrypt to get the auth is:

579166521024054300
631329184404046700
630362947097734400
312452466915898560
560065026778494600
701445613611060500
533005632161732700
346022583046067200
307133609609499650
637199838025480400
1150578863604618.2

Issue number two:

You must decrypt the following series of letters for the numbers that represent them. Your only hints are _ = 0, A = 1, C = 3, E = 5, G = 7, and I = 9.

FGBD.G_AEAIDBIAGG/AFEDG.I_HAGB__EGFB/AAGH_.GIEBCFFEIEFD/A_IEC.EGEBHFHH_AE
B/-ABE.HGEHDAGBICGFGE

Now if you had the patience to decode that you must now use that series of numbers and decode it using one of the following: BASE-64, MEGAN-35, TRIPO-5, FERON-74, EZIP-64, AER-256, OKTO3.

Blue Screen of Death - December 8, 2010, 1:14 pm

(Dec 8, 2010 01:26 PM)pewpewpews Wrote: [\[CITE\]](#) Issue number one:

You must decrypt the encryption in a certain order with these text encryption styles: BASE-64,

OKTO3, TRIPO-5. The phrase you must decrypt to get the auth is:

579166521024054300
631329184404046700
630362947097734400

i wonder how many people came here looking for someone to decrypt the wikileaks insurance, lmao.

Mr.BTC - December 8, 2010, 8:10 pm

dude u know what?

this is a great service thanks for it :D

but please do not make the passes public because then all most all of the fud crypters will become detectable faster :S and there other many other useful things that users post with a crypted pass so "Noobs" or people who can't read get access to it :S

if u want to do this service go ahead this is great :D

but please PM them the password do not post it here :D

thanks mate

Oh great thanks I thought i find my password :D

Blue Screen of Death - December 12, 2010, 9:37 am

Accepting more requests...:)

Feel free to post any Encrypted text(NOT anti-noob protections!)

Kellendil - December 12, 2010, 10:01 am

Hi could you decrypt that password pls ? I tried it many times but i failed

Password encrypt with:

ATOM-128 --> HAZZ-15 --> T-ASCII

The ASCII chain it scrambled!

copy and past password in wordpad,notepad. pass ---> notepad or wordpad

copy password and paste crypo. notepad/wordpad ---> crypo.com

its possible you view only space (depending Browser) good ! just remove space.

Tips:

All space non granted

Symbol no ASCII non granted

Start at the end to remove space/no ascii

Good luck!

* Use only winrar to decompress the password don't works with another archiver.

PASSWORD :

Code:

%39%6F%78%47%41%57%4E%77%33%67%66%4D%58%67%77%59%2B%6B%46%69%71%78%50%77%77%3D%4A%67%33%6B%33%38%67%36%46%66%4A%65%59%6B%33%67%66%4D%58%67%77%59%2B%6B%46%69%71%78%50%49%38%6C%37%6E%45%34%46%49%39%6F%53%66%44%62%2F%54%7A%78%2B%35%53%50%41%43 %45

The following lines are not very clear. I can decrypt other passwords but this one is not working. Something is not right. That is not anti n00b protection. The following lines need to be rephrased. copy past wordpad.. . or crypto. <--- microsoft word etc.. then back.. go.. --> notepad.. wordpad.. what kind of cryptic sentence is this? That is another cryptic sentence to tell what you have to do. Only poster can decrypt this sentence. No punctuation.. no capitalisation.. nothing.. nada...

copy and past password in wordpad,notepad. pass ---> notepad or wordpad
copy password and paste crypto. notepad/wordpad ---> crypto.com
its possible you view only space (depending Browser) good ! just remove space.

How do you decrypt hex and ROT-13? Its not on crypto.com. Somehow the following line doesn't make sense as the title is "decrypt method". Does that mean it was encrypted from left to right or you have to decrypt it from left to right?

Decrypt Method:

Hex > Reverse String > ROT-13 > FERON-74 > BASE-64 > ATOM-128

Where is the reply I just posted from Quick Reply? Why I can't see it?

•ANONYMOUS™ - December 20, 2010, 8:59 am

Please Decrypt this: 1119417.5808389513, 1076516.3171685394, 1032202.524164794, 690708.4278202248, 1119501.6894581772, 1205204.474596754, -0.8306317103620415

BASE-64 > ZARA-128 > AER-256 (< THAT IS NOT AES! It is AER)

can you decrypt this pleas

intheoz - December 22, 2010, 6:45 pm

(Dec 21, 2010 10:36 AM)\$anata\$ Wrote: [\[CITE\]](#) Will you please link me to the original thread of this encryption,
maybe there's something wrong with the encrypted pass.
Here is the link to the original thread. I think the author deliberately contaminated the code or changed/removed some text while encrypting.

\$anata\$, were you able to decrypt it?

\$anata\$ - December 23, 2010, 1:45 am

(Dec 23, 2010 02:28 AM)intheoZ Wrote: [\[CITE\]](#) \$anata\$, were you able to decrypt it?

I cant decrypt it bro, maybe the TS delete some character in the password.

Try to decrypt the hex [HERE](#) and see the result, it gives you invalid characters.

lionking642 - December 23, 2010, 1:56 am

Thanks \$anata\$!

To short...

(Oct 10, 2010 09:19 PM)pklocus Wrote: [\[CITE\]](#) This thread ruins noob protection and will ruin FUD crypters that are free. this is hurting the Hackforums community.

TOTALLY AGREED. This will ruin N00b Protections of Crypters and other tools.

It's better to let them learn to decrypt by themselves.

Also, I agreed that services like this is promoting Shitcash links.

neosnk35 - December 23, 2010, 1:09 pm

hi can you check this out

9489d869b00d0a1926486c32cbc815caa13a3a37

is it sha1?

laou - December 23, 2010, 1:46 pm

please decrypt Password encrypt with:

ATOM-128 --> HAZZ-15 --> T-ASCII Code:

%39%6F%78%47%41%57%4E%77%33%67%66%4D%58%67%77%59%2B%6B%46%69%71%78%50%77%77%3D%4A%67%33%6B%33%38%67%36%46%66%4A%65%59%6B%33%67%66%4D%58%67%77%59%2B%6B%46%69%71%78%50%49%38%6C%37%6E%45%34%46%49%39%6F%53%66%44%62%2F%54%7A%78%2B%35%53%50%41%43 %45

intheoz - December 24, 2010, 10:04 am

(Dec 23, 2010 03:00 AM)T0X1CV1RU5™ Wrote: [\[CITE\]](#) TOTALLY AGREED. This will ruin N00b Protections of Crypters and other tools.

It's better to let them learn to decrypt by themselves.

Also, I agreed that services like this is promoting Shitcash links.

I don't agree. This is not the most effective way to stop n00bs. This is not n00b protection. There are many people who is not n00b but still cannot decrypt it. They just want you to pay.

King_Roger - December 24, 2010, 11:09 am

Could you please decode this. I will be very thankful to you for this.

????????????

ravens - December 24, 2010, 2:11 pm

hi this is encrypted in mysql i think

Code 47515c5d5503beb2

BornToHackXD - December 25, 2010, 5:11 am

Password encrypt with:
ATOM-128 --> HAZZ-15 --> T-ASCII

The ASCII chain it scrambled!
copy and past password in wordpad,notepad. pass ---> notepad or wordpad
copy password and paste crypto. notepad/wordpad ---> crypto.com
its possible you view only space (depending Browser) good ! just remove space.

Tips:
All space non granted
Symbol no ASCII non granted
Start at the end to remove space/no ascii

Good luck!

* Use only winrar to decompress the password don't works with another archiver.
Code:

%39%6F%78%47%41%57%4E%77%33%67%66%4D%58%67%77%59%2B%6B%46%69%71%7

http://www.cryo.com/eng_feron74d.php

http://www.cryo.com/eng_trip05d.php

http://www.cryo.com/eng_base64d.php

Not that difficult.

Hint: l*m*n*w*r

c_o_d_y - December 30, 2010, 4:48 pm

Password encrypt with:

ATOM-128 --> HAZZ-15 --> T-ASCII

The ASCII chain it scrambled!

copy and past password in wordpad, notepad. pass ---> notepad or wordpad

copy password and paste crypo. notepad/wordpad ---> crypo.com

its possible you view only space (depending Browser) good ! just remove space.

Tips:

All space non granted

Symbol no ASCII non granted

Start at the end to remove space/no ascii

Good luck!

* Use only winrar to decompress the password don't works with another archiver.

Code:

Use www.cryo.com and decrypt in reverse-order (starting with MEGAN-35).

The final thing should be (only a hint, starred some characters out): as*Ti*e*ont*ive*u

.HyPeRiOn - February 2, 2011, 2:33 pm

Code
