Thread: [Downtime and MySQL](#)

Omniscient - October 10, 2010, 7:00 pm

Today we had about 90 minutes of downtime. MySQL basically crashed. Good news is that it had not crashed in 46 days. That's great. The crash today was because MySQL and our ever growing site demanded more resources. Our DB is over 5GB right now and seems to grow at nearly 1GB per month. I estimate 3-5 months and I'll be forced to upgrade our MySQL server to something very expensive.

Right now I'm watching it closely but I think it will be fine.

Sorry about the downtime. I wasn't home this afternoon.

btw I'll be catching up on orders and my PMs this evening so please be patient.

Thank you.

Robie - October 10, 2010, 7:01 pm

Just good to see that were back up.

iDuL - October 10, 2010, 7:01 pm

Longest downtime ever..seemed like forever!

Butter - October 10, 2010, 7:02 pm

good admin'ing...

:)

hope it works out...

SIM-38442 - October 10, 2010, 7:03 pm

I was wondering what was going on. Well thankfully you finally got it sorted out.

ClubPen15 - October 10, 2010, 7:03 pm

Thanks for getting it back up quickly. Looking forward to the time when HF needs to upgrade, would be glad to throw some more cash to the site!

Kaleb - October 10, 2010, 7:03 pm

2 episodes of cleveland show, 2 episodes of simpsons, one episode of family guy.

I was warped into fox anyways.

I AM BLACKOUT - October 10, 2010, 7:04 pm

Right on Omni.

:)

I am sure people will donate to help you pay for it. :)

Bansil - October 10, 2010, 7:04 pm

Glade we're back up, 1 GB a month, God damn.

DeMeR - October 10, 2010, 7:04 pm

Wow, 90 minutes of not having HF = around 2 episodes of CSI. (:

Dizzy Wright™ - October 10, 2010, 7:04 pm

Wooh you saved HF Omni, also how much more is it ?

oneechan - October 10, 2010, 7:04 pm

Nice to see the site back up. :)

I havent seen the simpsons in ever.

Augustus - October 10, 2010, 7:05 pm

Finally, i thought i would fap all night without being on the fourms once.

Da Loser - October 10, 2010, 7:05 pm

Would it be possible to mod mybb to run across 2 sql servers, putting <SQL heavy thing #1> on 1 server and the rest on another?

I am fool - October 10, 2010, 7:05 pm

Everyone donate 10\$ to Omniscient right now.

No you don't have a choice.

MySQL > Rent/Food

Kotei - October 10, 2010, 7:06 pm

It seems that MySQL likes to crash a lot when you aren't home... It is out to get you Omni...

Shades - October 10, 2010, 7:06 pm

You can guess what I didn't do for 90 minutes today.

Win64 is iarkey.1. Me having worked for vuze has nothing to do with posting on hf.

2. I'm just trying to help omni out.

3. I changed my name for a good reason.

4. Say iarkey a few more times in your post, It will only make you look even more retarded.

Finally we're back up. I suspect the reason for this was that recent video of the kid threatening Justin Bieber haters.

Smubii - October 10, 2010, 7:18 pm

This really rustled my jimmies, Omni.

Glad HF is up :D

The fact that it is a threat and it doesn't matter if you actually do it, the fact that you threatened is viable for punishment as is in most countries. I am sure if you were to threaten to swat Omni he would take legal action against you, anyways, no I will not remove my post, nor will I continue this off topic conversation.

I am glad HF was back <3 90 minutes i really miss HF ~

I am happy i donated 50\$ Today ^^ hope it will help

Thanks to Omni for fixing the site asap, more powers HF'ers ~

Was Omni getting it on with the Missus?

April Fools. - October 10, 2010, 7:27 pm

I see, so we aren't being hacked by the one they call "Mastermind". Thanks for letting us know mate.

ryan1918 - October 10, 2010, 7:27 pm

Burn Notice - October 10, 2010, 7:33 pm

Didn't even notice it, was too busy cleaning my room >.<

This site will never stop growing.

Uncle Drew - October 10, 2010, 7:36 pm

I was freaking waiting the whole morning. Needed something important in my PM's. :) Good that we're back up again. :)

Maurice Moss - October 10, 2010, 7:39 pm

Good you got this fixed.

I hope to some time in the future, I plan to donate as much money as I can.

Cam G - October 10, 2010, 7:43 pm

Thank you for the update, shocking to hear that the site is growing that fast.

Hack a Day [™] - October 10, 2010, 7:46 pm

It was chuck norris fault he sneezed so he shook the sql database and hf went down.

Officialipaul - October 10, 2010, 8:02 pm

Wow, because I was like, why is HackForums down tonight? But thanks for the good news!

[[R9]] - October 10, 2010, 8:09 pm

This wasn't longest downtime according to me.
During summers we faced many of these.

Sudo - October 10, 2010, 8:25 pm

Glad we're back up.

Just curious: Why don't you just get a physical server, upgrade your home internet, and run HF from home? It may sound stupid, but I'm just curious (as afformentioned).

bourd - October 10, 2010, 8:31 pm

Well 90 minutes of work can't hurt.

I was slipping behind anyway.

Wild Card - *October 10, 2010, 8:32 pm*

I was busy working on a video project, didn't even notice.

It is still good news that the site is back up and running though, nice work. (:

Taserz - *October 10, 2010, 8:43 pm*

What are the current specs of the mysql server? Just wondering maybe we can all go deal hunting and find the best server for hf needs at a reasonable price.

Omniscient - *October 10, 2010, 8:44 pm*

Quote:Would it be possible to mod mybb to run across 2 sql servers, putting <SQL heavy thing #1> on 1 server and the rest on another?

MyBB allows for that since 1.4.x So far I don't think anyone has used it but I'll probably be the first.

Quote:It seems that MySQL likes to crash a lot when you aren't home... It is out to get you Omni...

Not really true. I state we've not had a mysql crash for 46 days. We used to have them weekly and even daily for a while.

Next time your at the airport and you see a pilot ask him why he doesn't just grow wings to fly.
