Thread: [\[Render/Resource Community\] Manga Renders - Free Anime Renders - Official Opening.](#)

I have just finished a complete anime render and graphics resource community. It has a complete home site, a forum and a coppermine gallery which has been integrated into mybb so any accounts are shared between the two as well and many other cool features. There are currently over 1000 anime renders to download from our gallery!

This will soon be a great place for anime fans and normal gfx artists to get renders, stocks, fonts, brushes and tutorials for their work. ^^

The homesite, forum and gallery all boast custom made themes designed by me from scratch and took around 4 days of hard struggle to get running properly.

There are 3 levels of membership which can be reached by posting or faster by submitting renders.

Points will also soon be able to be traded and donated which can be used to upgrade your account. This is not a profit website currently so you can't buy upgrades.

Each new upgrade will unlock a new section of the gallery where better renders are constantly posted by members.

We really hope to see some people join the site and even if you aren't into anime, feel free to come and be a part of a new and friendly graphics community. ^^

Thanks for reading up to this point haha - The End.

I clicked the forum part and I see dango.. FUCKING REGISTERING.

Tasemu - October 13, 2010, 6:31 am

Cool man. We will be regularly adding lots of renders to the user gallery. Ill be putting my best stuff

in the elite gallery though.
