Your site content must be genuine I think. They watch for many factors to decide approve or disapprove.

Sir theres user here in hackforums selling a ebook on how to get accepted in google adsense... his username is JAGUAR...

I have been rejected many many times for 'Unacceptable site content'.

I reapplied now for a blog with many posts, posts are posted every 2 days. I make sure that my content is not plagiarized and has no copy result in Copyscape.

Hope to get fucking accepted right now, I'm pissed with AdSense for rejecting me tons of times.

holy_kamote - January 2, 2011, 5:12 am

I research my blog in copyscape and theres so many results awch...

i'm from asia as well, and using Adsense.

Use blogspot, make some unique posts, and apply adsense via Blogger dashboard (it's important), alternatively you can use docstoc.com, upload your documents (about 5), and apply adsense via them. You will get 50% from adsense revenue form your docstoc pages, but you will get 100% revenue from codes you generate from adsense account, or use indyarocks.com, make some unique posts on blog and they will help you to get approved by adsense.

The last alternative way from me is BUY it, its just about \$15 or something, I guess. Or you can pm me. :)

excuse my English.

saintcj - January 2, 2011, 6:12 am

You can no longer apply to AdSense using DocStoc. :)
