Thread: [\[TuT\] How to patch almost all Sony Products \[TuT\]](#)

ariton - October 15, 2010, 10:34 am

Here are the easy steps that you will need to follow:

1. First of all, we'll need to download the sony product/program patcher at this mediafire link:

<http://www.mediafire.com/?0es2anu27i1zqq8>

Link is safe, uploaded by me.

2. Once downloaded, you can save the program in the desktop.

3. Now, it's the time to open the patcher/keygen. Make sure that if you run Vista/Windows7, you run As Administrator.

It should look like this:

[img]http://embedded.members.winisp.net/blog/sarah/vista_updated.JPG[/img]

Credits for this image are going to images.google.com

4. The program should look like this when opened:

[img]<http://t0.gstatic.com/images?q=tbn:soaw7qTOuCOfiM:http://image.ipost.in.th/upload/6c5c6695ec6e17b725878ab7080cc94c.jpg&t=1>[/img]

Credits for this image are going to images.google.com

5. Product name: Chose what product do you wan't to patch.

6. Ignore the keys, exept if you wan't to enter them, but it's faster and better to patch.

7. Click Patch ... button.

8. A window will open asking you for the programs' directory.

Will look like this:

[img]<http://www.ethernut.de/img/sam7-ir01.png>[/img]

Credits are going to images.google.com for the image, again.

9. Go to programs' directory and chose the .exe of sony programs.

10. The program should begin to patch the .exe and create some files in the directory.

11. Wait some time, then run the sony program from desktop.

Hope this guide helped you. If so, please say thanks.

And ofcourse, the virus scan for unsure users:

<http://www.virustotal.com/file-scan/report.html?id=9606188bf930d3efc9cf08fe44947939a97afb5f30b52b0be969555fb592cc58-1287174819>

It's detected only by Nod32 as: a variant of Win32/Keygen.AR ---> Nothing to scare, just a keygenerator. ;) Enjoy it!

zombiehacker - October 15, 2010, 10:37 am

hey, nice tut! ;)

i patched sony vegas pro 9, but i did need 2 programs, keygen and sony vegas (patch me) tool. worked awesome ;)

Virus Scan

<http://www.virustotal.com/file-scan/report.html?id=9606188bf930d3efc9cf08fe44947939a97afb5f30b52b0be969555fb592cc58-1287174819>

Thanks for this, I was looking for it since I lost my old one.
