Hmm didn't know that.

?

Looking for an Account for you (:

iDarky - October 17, 2010, 3:59 am

PM me your msn please. I am intrested in the exploit.

??¢??? - October 17, 2010, 4:04 am

I think exploit is included in metasploit. btw please tell US what this exploit does ? I.E what is the final result after exploiting a server ?

Th? Jok3? ™ - October 17, 2010, 4:06 am

(Oct 17, 2010 04:04 AM)??¢??? Wrote: [\[CITE\]](#) I think exploit is included in metasploit. btw please tell US what this exploit does ? I.E what is the final result after exploiting a server ?
LOL no.

You can make yourself an account on the server, or hack the Admin's account, and the server is all yours.

Diabolic - October 17, 2010, 4:12 am

You found me an account yet :) ?

Th? Jok3? ™ - October 17, 2010, 4:13 am

So how can it be a Windows exploit if its not a exploit in the actual OS?

Looks to me that webserver needs to be running so my guess is either IIS or a Apache module that you are exploiting.

010010 - October 19, 2010, 11:52 am

Apache Security XSS ,

Spoiler [\(Click to View\)](#) 2hsoror

Exploits being sold in three different threads?

Where's this from?

Th? Jok3? [™] - October 19, 2010, 12:39 pm

(Oct 19, 2010 12:31 PM)Full Control Wrote: [\[CITE\]](#) Exploits being sold in three different threads?
Where's this from?
Those are legit resellers.

Helping me kinda get more trusted or such, idk I got weak by letting them re-sell, I still get 80% ^_^
But I am the Creator of the Tools, as Exploit itself.

Full Control - October 19, 2010, 12:42 pm

Wheres proof that they are resellers of your product

Logan - October 19, 2010, 12:43 pm

PM me your team viewer ID, I want to see what it does before I make a decision.

Th? Jok3? [™] - October 19, 2010, 12:46 pm

BTW, if I buy a dedi,

1) Should I use a proxy... ??

2) If I got found out and banned, how many months warranty do you give for a new dedi as replacement ??No you don't really have to, but it wouldn't be bad.

And if your Dedi get's shut down, you get a new one asap.

.Zo - October 19, 2010, 9:46 pm

I wana see the server exploit in action...can you show me?

FaZe Rebirth - October 19, 2010, 11:45 pm

Did you block me on msn? o_O

[CX]Luke - October 20, 2010, 4:02 am

Is the newest version of Apache exploitable or is it from an older version. I had to ask a few questions to Gids to realise it wasn't a windows exploit.

Can you pm me ur msn mate got a deal if your interested

Th? Jok3?™ - October 20, 2010, 5:13 am

No, you're offline to me :S

r00tz0r, yes it is. my MSN is in the Main Thread, read it carefully, it might be at the very bottom ;)

And for all who want to see it in action, check out Gids' Video, he got the exploit from me, he is a legit reseller.

http://www.youtube.com/watch?v=7UnFLA9-m-w&feature=player_embeddedI eventually got it working with some Teamviewer help. All that was wrong was the directory default had to be set

BUMP!

Come on guys, I only got 4 sales, I am gonna sell 6 more copies, so this doesn't get too spreaded.

M?tt - October 20, 2010, 7:12 am

Now I know nothing about exploits, but reading through this thread, some of you guys seriously need to stop asking questions either already answered, or FULLY read the OP before posting. It's something half of the buyers here are lacking and ask for "PM me your MSN" when it's in the OP. I'm going to vouch for Sheesh. Seems to have many legitimate sales and after viewing the video, seems pretty badass to me.

mKn1ght - October 20, 2010, 7:12 am

Vouch for Shesh, trusted member :)

Win - October 20, 2010, 7:16 am

How many people are selling this exploit because I've seen so many threads about this.

nokia2mon2 - October 20, 2010, 7:40 am

hi
pls add me in msn:\

nokia2mon2@hotmail.com

SH??? - October 20, 2010, 9:11 am

I did not buy from sheesh, but I have seen his method and it works great, Vouch.

Th? Jok3?™ - October 20, 2010, 9:20 am

THANK you!

Also, like i said, those other threads are RE-SELLERS!

They are helping me spread this thing, since I am not well known here...

nokia2mon2@hotmail.com - added.

ipkb2010 - October 20, 2010, 9:33 am

this method is old =0 .. ////
its still work dont get me wrong, but its not gonna last...

As a certain someone once said

"As long as human stupidity exists so will this" And hes right.

method? ;)

Cats R Kewl - October 20, 2010, 4:23 pm

Vouch.

Good and quick seller.

Will buy again in the future.

1 + 3 + 3 = 7 - October 20, 2010, 4:26 pm

are you using a webdav exploit? lol

Th? Jok3?™ - October 20, 2010, 9:28 pm

(Oct 20, 2010 04:26 PM)1 + 3 + 3 = 7 Wrote: [\[CITE\]](#) are you using a webdav exploit? lol
No. ?

Spoiler ([Click to View](#))

Also, I am not selling the Exploit MAIN THING, Main Thing are the Scanners, which find Vulnerable
Servers.

??¢??? - October 21, 2010, 1:36 am

1. Scanners are available Free

Is your exploit about Remote file execution ? , Do you do something like opening the Server's
command prompt in your Browser and Make a new User account via it and get access ? Maybe it
also starts with buffer overflowing the server's Port service to gain access to service ?

These are the only known vulnerabilities in Windows servers

Th? Jok3?™ - October 21, 2010, 6:19 am

Like I said, buy the fucking Exploit and see for yourself.

I won't answer no question what it does.

CruZer - October 21, 2010, 6:45 am

Just bought it :P ..Doing some scans..

Will raport how it went soon ! :)

Aww.. cannot run any commands.. it asks for username and password :/ .

TmaxX - October 21, 2010, 3:23 pm

Use the same one ;D

From the tutorial ofc !

CruZer - *October 21, 2010, 10:46 pm*

Yeah i got it from OP (stupid me :D).

Got around 20 dedis so far.
